Think Big with 10.3" LCD

HALOT-MAGE features a large LCD screen for a 228x128x230mm build volume, about 45% larger than an 8.9" printer. Now, more can be done at will to amplify the joy. Just work magic in a bigger way.

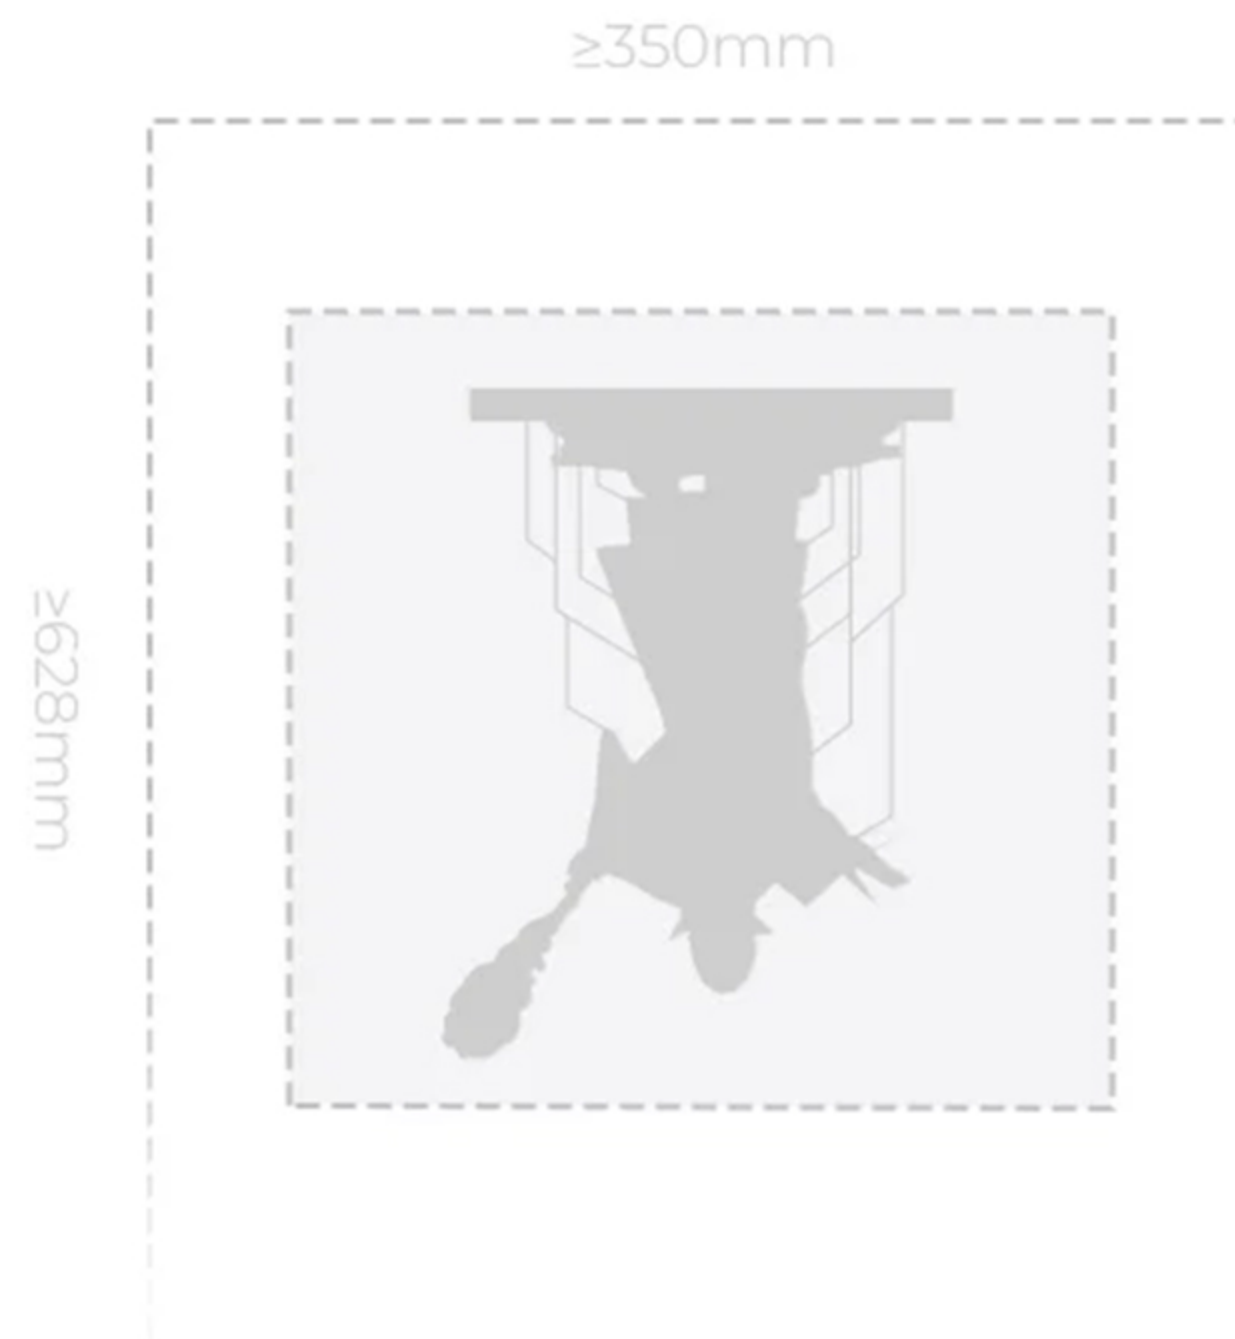

Compactest in Its Class

32% more size-efficient, HALOT-MAGE is the compactest among the mid-size resin printers with a similar build volume. Leaving more room to do other cool stuff.

HALOT-MAGE

Others

8K Magic for Exciting Details

HALOT-MAGE adopts an 8K mono LCD, which brags 33,177,600 pixels and 29.7 μ m XY resolution, a huge leap from the 50 μ m of regular 4K. Hair, fabric, skin textures, and organic shapes all come to life. Every print is a sight to behold.

Wow, “MageArch” Flip Lid

The flip lid of HALOT-MAGE is easy to open and close with one hand and needless to place aside. It is only 1/4 taller when opened, saving more room.

The orange tint is practical to block 99.89% of ambient UV light for minimal interference.

Rigid lines with subtle chamfering, strike stylish, simple, and sleek.

Air Purifier Really Saves the Day

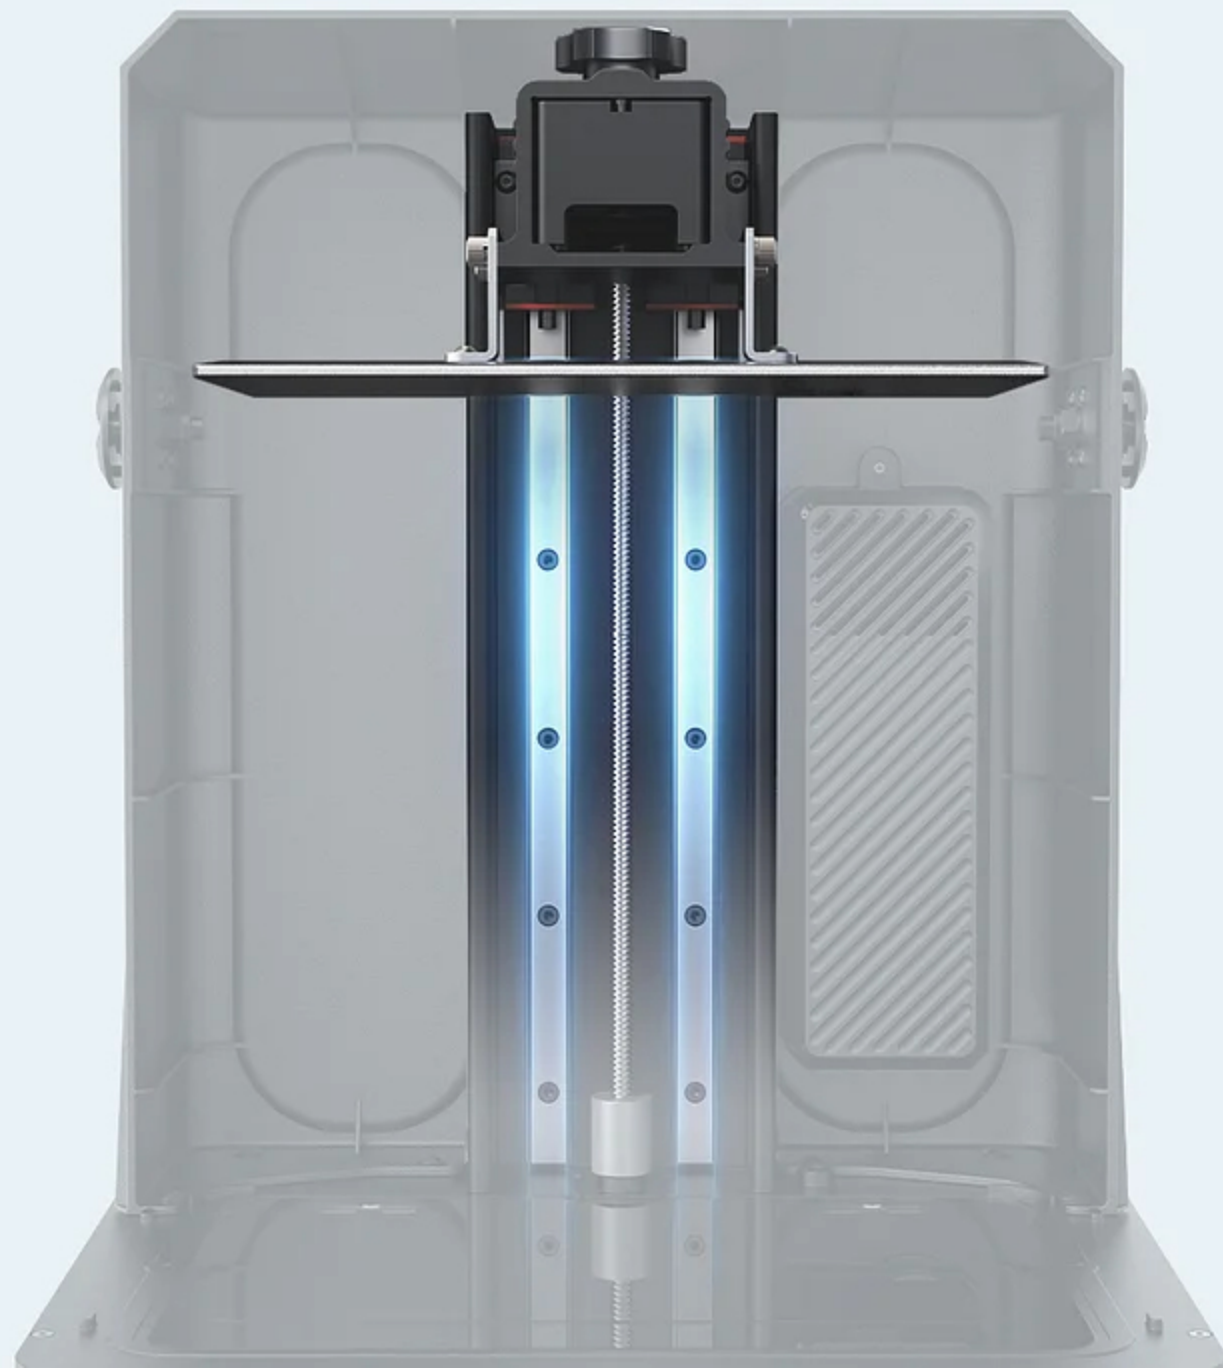

Powered and controlled via the printer directly, it includes a replaceable activated carbon filter that is 5.8 times larger than others. It absorbs irritant resin odor more efficiently.

A vent hole is at its back to connect a vent tube.

*The carbon filter lasts about 3 months after each replacement.

Ultra Steady Z-axis with Dual Linear Rails

The Z-axis of HALOT-MAGE features dual rigid linear rails and is driven up and down by a powerful motor. It reduces wobbling vastly and deals well with larger, heavier prints.

Wider Choice, Better Slicing

The self-developed HALOT BOX adopts an intuitive 4-stage workflow and includes many presets. HALOT-MAGE is also compatible with other slicer software.

HALOT BOX

chitubox[®] Pro

* With HALOT-MAGE,
you will get a 3-month VIP of CHITUBOX Pro for free.

Glass LCD Protector, Rest Assured

The LCD screen is covered by tempered glass with a tight sealing. It holds well against impacts, scratches, and resin leaks.

Specifications

Printing Technology	LCD MSLA	Light Source	Integral Light
Build Volume	228x128x230mm (6712cm³)	Light Intensity	5000±10%μW/cm²
Product Dimensions	333x270x608mm	File Transfer	USB drive
Package Dimensions	420x350x675mm	Air Purifier	Yes
Net Weight	12kg	Input Power	100W
Gross Weight	15kg	Resin	405nm resins
Printing Speed	1-5s/layer	Slicing Software	HALOT BOX, CHITUBOX, LycheeSlicer
Layer Height	0.05-0.15mm	Computer OS	Windows/Mac
LCD Screen	10.3" monochrome screen	File Formats	STL/OBJ
LCD Resolution	8K (7680x4320)	Display Screen	4.3" color touchscreen
XY Resolution	29.7μm
