AMERICAN GENOCIDE IN THE 21ST CENTURY

White Paper

TURTLE ISLAND/USA, JAN/2023 —

BRIEF STATEMENT:

In today's American egalitarian society, the level of acceptance and inclusion is at an all-time high created by law and policy. If someone isn't on board with inclusion of ALL, the repercussions would be detrimental. Unfortunately, the Aboriginal Copper-Colored Peoples of American Indian (aka Negro, Colored, Blacks, and now African Americans) heritage are not afforded the same level of acceptance and inclusion. Based on the historical revisionism of American history, we've become a suspect class of people with no human rights, but with only scant privileges that can be taken away for a mere violation of statutes and policies.

United States officials sit on the UN Human Rights Council yet ignores the indictment of 5 counts of Genocide on October 21, 2021, by an international jurist panel for human rights abuses against “*Black, Brown, and Indigenous Peoples*” on Turtle Island (New York). But has the audacity to pledge 55 billion in aid to the African continent for the alleged crime of stealing 12 million slaves from that continent which cannot be proven by any empirical information from any country in the world. The United Nations Human Rights Council and International Criminal Court remain complicit concerning the continuum of American Genocide. We implore the international community to STOP participating in American Genocide by turning a blind eye to what has happened to Aboriginal Americans in the past and is still happening to us in the present.

THIS IS A CALL TO ACTION!
