

CASH IS FREEDOM

USE IT OR LOSE IT!

Use cash everywhere to keep the cash infrastructure in place.

THE GOVERNMENT IS PLANNING A DIGITAL PROGRAMMABLE CURRENCY

- **Without cash all money would depend on the internet – vulnerable to cyber attacks, power cuts and technical failure.**
- **In a cashless society there would be a record of every single transaction, which means ZERO financial privacy.**
- **The state would be able to monitor every transaction and could dictate how, when and where you spend your digital money.**
- **It could even invalidate your money after a certain time period making it impossible to save and accumulate money.**
- **You could be financially cut off for your opinions (as happened recently to the Free Speech Union) without having cash as a fallback.**
- **There would be no cash for the homeless either and the elderly who struggle with tech would be excluded.**

**WOULD A DIGITAL PROGRAMMABLE
CURRENCY BE FOR OUR BENEFIT OR WOULD
IT ROB US OF FREEDOM AND AUTONOMY ?**

Please ask your local shopkeeper to display this flyer.
