

Scarf = Vest

(Off Sides Vest Pattern)

This vest was made from 1 Pashmina scarf.

Please note: width of scarf must be half of your fullest hip measurement plus at least 2". Side opening can be made higher if room is needed but it won't look great if there is too much gap. Length can be determined by how long you want the vest.

Pictured: this scarf was perfect as a reversible vest. Both sides are beautiful. No facings were used. The neck has fold over braid as the finished edge. The seams were turned under and stitched down.

Be sure and test stitch and quality of scarf before you start.

Lay out:

Cutting the high jewel neck on pattern. Place front on selvage edge, using it for the finish. Place back on folded edge. Determine desired length and place patterns evenly so bottoms match. **Measure from side marked point to bottom on both to be sure bottom is matching on front and back.

Except for this neckline, the construction is the same as “Off Sides” pattern from All Dunn Designs. There is no facing on mine but, if needed, you can use a different fabric for a facing. Information is in pattern for cutting and sewing a facing. ** Shoulders are stitch together.

NECKLINE:

- Stay stitch around neck being careful not to distort or stretch the delicate fabric.
- Trim neck seam allowance close to stay stitching line.
- Turn under raw edge of fold-over braid (a patch of fusible web on each end can be helpful for control)
- Fold braid over neck raw edge matching end of braid to center front.
- Topstitch braid to neck.
- Stitch side seams same as pattern or you may use a braid over the seams and stitch flat.
