About Global Tech

Global Tech Solutions is a leading IT/AV/SECURITY/Telecommunications company providing state-of-the-art office automation products and security & video surveillance solutions. Established in the year 2019, the service protfolio includes Communications Technology, Security Solutions, Access Control, Time Attendance, Video surveillances & IT Networking.

Our vast experience, spanning over a decade, of providing customised and dependable solutions to our clients and strong foothold in Western India, gives us a better understadigng of the market and makes us a more dependable partner than other service providers.

Why Choose Global Tech?

Dependable and expert solutions is the backbone of success for most industries. And yet it remains one of the unorganized service area. With telecommunications industry experiencing a major industrial boom, there is a need of more customised, dependable and economically viable office automation products and security systems.

It is important to have a partner who can ensure highly specialised services for growth. Taking this thought forward, we focus on providing service driven dependable and economically viable solutions.

Our Vision

To be the ideal telecommunications and security services partner, providing customised, dependable and economic solutions that business can prefer.

Our Mission

To make Global Tech Solutions region's most reputable and customer centric IT/AV/SECURITY/Telecommunications and security services partner.

Our Presence

Having our Corporate Office at Pune City, Maharashtra, We are on a trajectory of providing unmatched and dependable services to other cities in Maharashtra.

Management / Founder

Manisha Pachpute, the Founding Member and Director of **Global Tech Solutions** is a self-motivated and result-oriented leader with proven ability to scale up business operations, leading the organisation to newer heights and at the same time ensuring customer satisfaction.

An I.T. and Networking Graduate Engineer from reputed college, she has hands on experience in driving Sales and Marketing functions of the organizations. She has worked with leading Indian organizations dealing in office automation products and security services.

Her experience and in-depth understanding of the business helps in developing and maintaining sustainable and profitable relationships with customers, suppliers and stakeholders.

Our Team

Our team of experts include engineers, technicians and programmers with hands on industry specific experience. They are well aware of the latest technological developments and are trained to adapt to the Chang in the business needs, in line with the latest developments. Our dedicated team ensures that highest standards of quality are adhered.
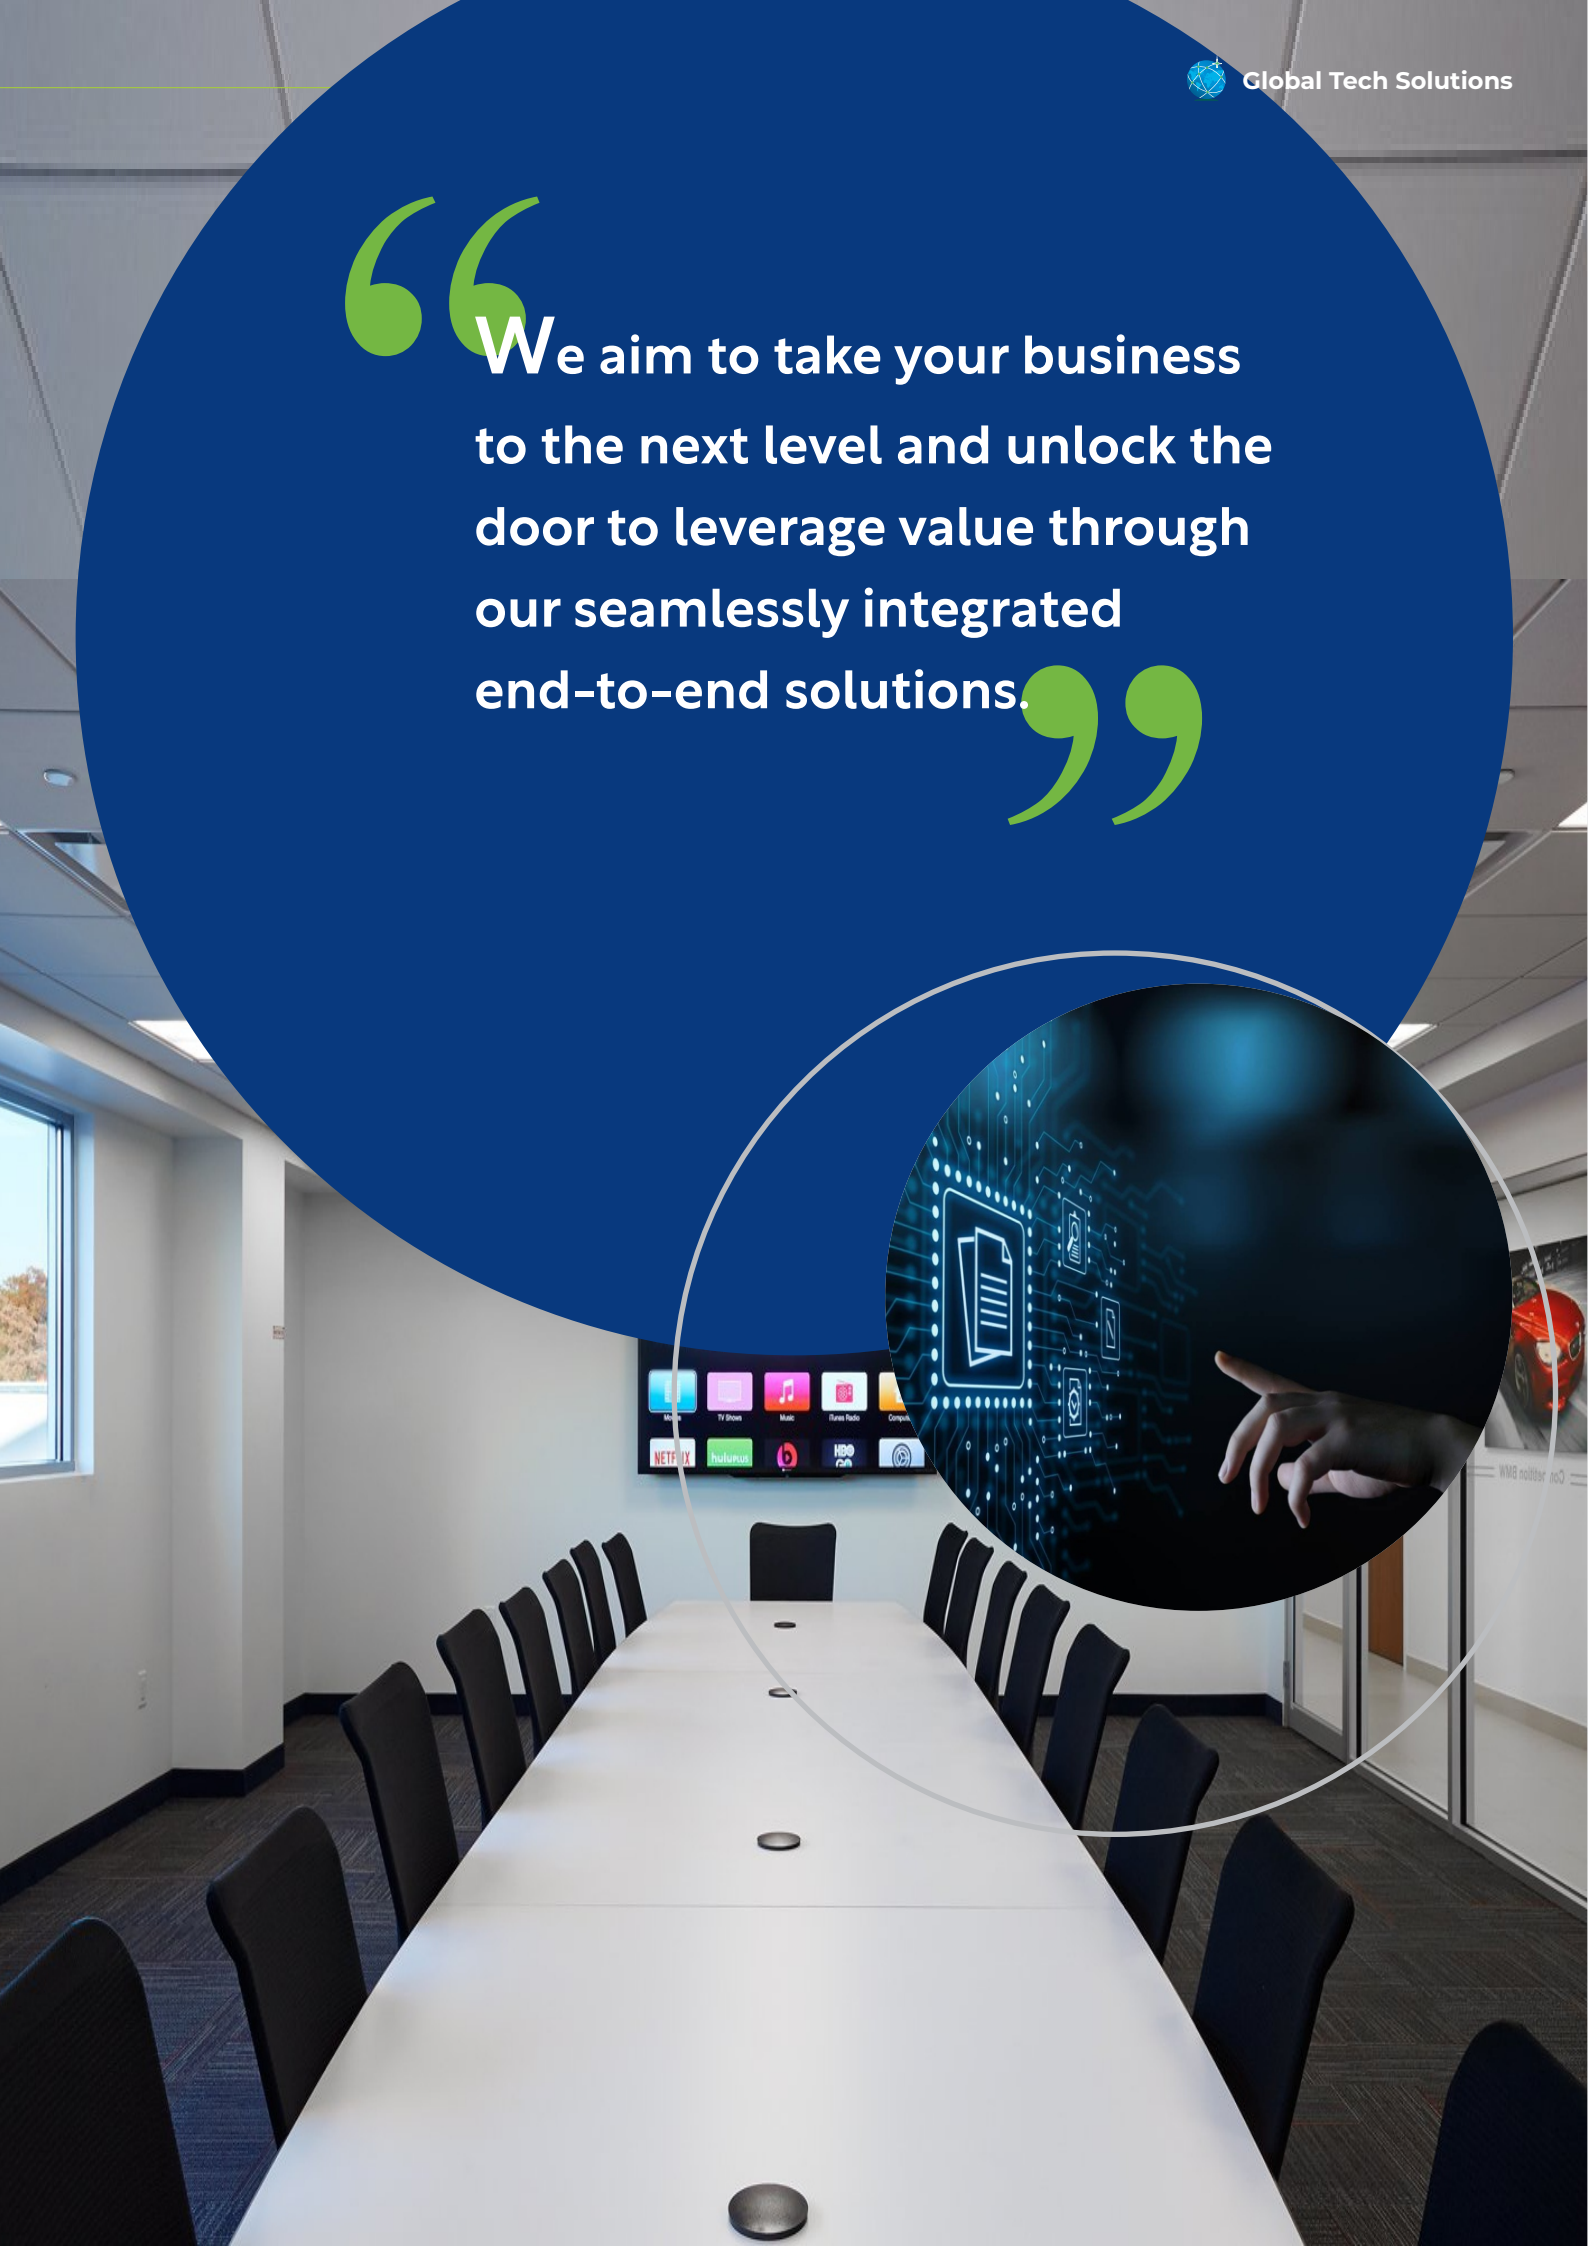

We are committed to providing prompt service and effective solutions to minimize downtime for routine maintenance as well as major repairs. With agile response and quick turnaround times, our service teams always exceed our Customer's expectations.

IT and Networking

We design & create networking & IT infrastructure which help your business to maximise productivity, reduce operational cost & manage future scalability. We deliver turnkey projects with solutions that leverage the right solution for your IT environment.

Our specialists create a resilient and redundant network which optimizes high availability, uptime and eliminates points of failures in the event that network components fail. We ensure that your network is available when you need it the most.

Boardroom AV & Automation

In today's fast paced commercial environment, easy access to key information and seamless communication are fundamental to enabling management and teams to operate more effectively. The ever-increasing demands on businesses to increase their output, whilst keeping time and travel costs down, is driving more organisations to organize their business around high quality boardroom AV technology. Global Tech designs & implements single platform integrated solutions with leading edge audio visual & automation to enable real time & collaborative working.

Annual Maintenance Contracts – Support & Services

We provide top notch IT & BMS services & AMC through our focused support team with a strong engineering background & expertise. A well maintained BMS & IT assets brings significant benefits to your building, and business. Our regular Preventative Maintenance visits will ensure your BMS & IT assets are working optimally, but if a breakdown or performance issue occurs, you have can have peace of mind if you have taken our Service Contract.

Experience Centre

For many organizations, from technology to finance to sports Customer Experience Centers are the catalyst for developing and fostering customer relationships. As audiences become more savvy, diverse and informed, they want an experience that feels both personal and authentic.
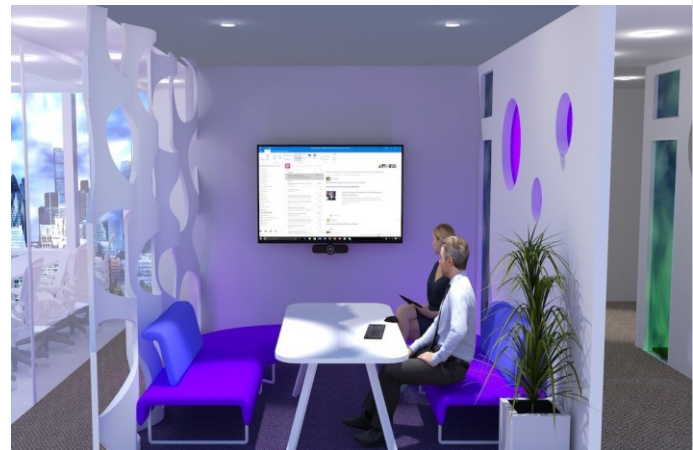

We create immersive spaces with multi-faceted digital experiences which connect your customers to your brand.

Huddle Rooms

Huddle rooms have become 'Most Productive Spaces' in many businesses. Looking at the improved collaboration after adopting these small meeting spaces, businesses of all sizes and industries are designing multiple huddle rooms within their organization.

We create wireless content sharing to deliver impactful design your huddle room. We design solutions for devices that can allow multiple simultaneous connections & minimize the transition time between presenters.

Town Hall & Digital Cafeterias

Today's corporate cafeteria's is more than just a place where people go to grab a quick bite for lunch. Equipped with the latest technology, modern cafeteria is now a place for employees to connect and collaborate.

Global Tech designs & delivers solutions which enables your organization to give presentations in part or all of the space, distribute video feeds of events to your employees, conduct team building activities & town hall sessions.

Auditoriums & Command Centres

When there is a need to disseminate and present information to large groups, auditoriums and large meeting spaces are the ideal rooms to convey your message.

We design & deliver high quality projection system, large format displays, intuitive control systems & touch panels, wired & wireless presentation capabilities & digital audio systems for your auditoriums.

Smart Classrooms

We design technology-enhanced learning classrooms that enhances the way of teaching and learning digitally. We integrate classrooms with the digital displays, tabs, whiteboards, audio/visual components & software that make lectures easier, engaging, and more interactive.
Learning content can be streamed to remote students or can be accessed offline at any point of time.

Video Surveillance

Our capabilities ranges from cameras and DVRs to video management software & cabling infrastructure. Businesses are vulnerable to constant threats.

We understand the unique needs of various industries & verticals and offer reliable solutions that you can bank on.

Fire Alarm Systems

We design & deploy high sensitivity smoke detectors, heat detectors, intelligent Fire panels, notification appliances & audio devices for early detection of fire. Our system can be integrated with access control systems & PA system for safe evacuation in case of fire emergency.

Fire Suppression System

Our gas suppression systems are ideal for data center environments, electrical rooms, generator rooms & battery rack rooms.

Our systems are non-reactive to chemical interactions making them exceptionally safe & effective for putting out fires without damaging your sensitive IT hardware.

Our systems are compact & modular & ideal solution where space & weight are critical. We offer simple & economic installation, Long service life & durability.

Public Address (PA) System

High-quality public address and voice evacuation systems are essential for security and safety of all facilities & factories. To be truly effective, a public address and emergency sound system must deliver exceptional performance and reliability.

We provide public address systems and components for transportation terminals, houses of worship, public buildings, medical facilities, office buildings, schools, shopping malls & industrial facilities.

Access Control System

We deploy Access Control Systems to facilitate high security in areas that require monitoring and surveillance of the physical activity of people/material. Access control solutions are especially useful in areas such as data centers, government/military institutes, IT facilities, and any other premises where movement of people have to be captured.

Our solutions deliver advanced security features & integration with customer's IT network.

Voice and Telecom Services

We design & deploy high availability solutions, help enterprise users to lower the communication costs and provide efficient, high-quality and comfortable phone call experience.

Our customer contact centre solutions provide enhanced experiences for both customer and employee. Engaged, empowered employees in your contact centre have a direct and positive impact on your customer experience.
