The Netherlands

I am not a medical doctor. I am an attorney in New York who has successfully used the drug Ivermectin to recently treat himself from something that appeared to be a coronavirus related illness, and who has personally heard and read testimony of persons who have been cured of COVID-19 with Ivermectin. Several clients of mine, primarily Spanish speaking working class people in the area of Queens, New York, and their families in South America, people of a demographic which has been known to have been hit disproportionately hard by COVID-19, have informed me that they have been rapidly healed with the use of this drug which, upon information and belief, has known anti-viral properties and which scientists in Australia have proven kills COVID-19 in vitro within 48 hours.

I write this because I am concerned that evidence (anecdotal or otherwise) regarding the effectiveness of this extremely inexpensive and accessible drug, which has been available since the 1980's, and which is so relatively safe and so inexpensive that it is administered for free to hundreds of millions of people in Africa (at a cost to the provider of around 12 cents per person) is being suppressed by governmental agencies here in the United States, including without limitation the Food and Drug Administration, which has either distorted truth, provided partial truths in a misleading fashion, and/or withheld truth regarding this drug, for some reason other a true concern for the wellbeing of the people. Moreover, recently there have been certain revelations regarding the United States National Institutes of Health which I have also found, to say the least, disconcerting and which if true, I believe, as an attorney (I am a graduate of Harvard College, Class of 1989, and Harvard Law School, Class of 1992, who over the past 28 years has practiced law on three different continents [Asia (Japan), South America (Bolivia) and North America (the United States, New York and San Francisco)]), might very well constitute crimes against humanity, subjecting individuals, as well as public and private entities, to criminal liability. Similar concerns are being raised, upon information and belief, in other countries regarding their own governmental authorities, for example, in Bolivia and Brazil.

To this point, I am of the view that a study or a panel of some sort must be established to determine whether and where criminal liability might lie, and that this panel must be given the authority to impose, if necessary, all punishments which might under the circumstances be deemed reasonable and just, both to compensate the victims and to deter any future similar illegal actions or omissions. The instant matter involves what appears to be the unnecessary deaths and/or permanent injury of thousands, tens of thousands and even hundreds of thousands of persons in both their body and their economy, and the people, the dead, the injured, and their families deserve justice. Moreover, to simply ignore something of this nature would threaten the very foundations of the people's trust in the rule of law, thus threatening the very foundations of democracy not only in the United States, but internationally.

I add below testimony from Brazil, roughly translated into English with the simple use of Google Translate, to demonstrate to you that it very much appears that this drug is working to cure COVID-19 and that people in Brazil believe that their own government is resisting its use and making it more difficult to secure, resulting in death and injury to thousands. As you may be able to discern, their testimony reveals both a relief at being healed from the disease, and fear and frustration at the perceived resistance of their government in making this drug available to them. In the United States, it is even worse because apparently the information regarding the effectiveness of the drug was earlier and more effectively suppressed here, perhaps resulting in the fact that the percentage of recovered to reported cases in Brasil is 42%, while in the United States that same percentage is a mere 17%.

Thank goodness, this ivermectin medicine is cured the people of coronavirus

[Maria Fernanda Pimenta de Pádua 5 days ago \(edited\)](#)

Good Morning. I also left a restaurant and my throat started to burn, chills, diarrhea, pain in the whole body, cough, headache. So, the night I took 3 ivermectin 6 g, in a single dose. I am diabetic and hypertensive. There is no Hydroxychloroquine in my entire city, there is no bed in RJ, if I went to the UPA, if I was not a covid19, I would get it inside. So I self-medicated myself, trying to save my life. It was 3 horrible days! But on the fourth day, I improved a lot and I'm here and I didn't die.

[paulo roberto Paulo 3 days ago \(edited\)](#)

IVERMECTIN IS EFFECTIVE YES !!! MANY HAVE REPORTED BETTER AFTER USE !! HERE IN RIO DE JANEIRO ALREADY SUMMED WITH

THE MEDICINE !!! PHARMACIES SAY THE LABORATORIES HAVE SUSPENDED THE SALE !!! WHY IT'S NOT INTERESTING TO GOVERNMENT THAT PEOPLE IF YOU CURE !! THEY WANT P CHAOS !! SOMEONE PLEASE NEED TO REPORT THESE LABORATORIES !!!

I would like to pass on what happened to me. My wife works in the healthcare field and I am subject to COVID. 4 days ago, I started with body pain and a sensation of virosis and a mild and constant fever, without other symptoms, on the third day I was already worried about the evolution and the possibility of being COVID. I decided to take the dose of 3 pills, because I used to take it for the purpose of worms. The other day, it was 90% better. and Today it is practically 100%. I remain in observation and isolation. The improvement was evident. You can't deny it.

[EDILEUSA DE SOUZA Macedo 3 days ago](#)

I am a nurse and I had irritation in my throat, cough, malaise and headache, I took 4 pills and all the symptoms disappeared.

[Rosangela Poças 1 day ago](#)

I had no fever or shortness of breath. I had a lot of back pain, a lot of nausea, lack of taste and smell and a lot of prostration. Total lack of appetite, very chills and the flesh all sore and the bones of the head hurt too.

[Rosangela Poças 1 day ago](#)

I took one today and I will take one tomorrow. I improved 70 percent of the damn cough. Thank you very much for the information.

[Waldyrenne jessyka 12 hours ago](#)

I am a self-medicated, I took ivermectin on my 4th day of symptoms! Today I am in my 10 \* day of my first symptoms and I am feeling super good!

[laizacs1 5 days ago](#)

My husband was in bad shape for 10 days, having a fever every day. I was taking fluimucil inhalation every day and it didn't get any better. I gave him ivermectin, after about 4 hours they were getting better. The other day he coughed up some blood and it just got better! Thank God that medicine worked! He healed thanks to that medicine and God!

[Amanda Alves de Freitas 3 days ago](#)

I was feeling bad, chills, pain in the throat, headache, feeling of heaviness in the chest and after a few days I started to get very tired with shortness of breath ... it seemed that something was missing in the air that I breathed. I called Diskcovid, they sent me to look for the hospital, I was afraid to go ...

because the situation is very critical in SUS. I live in Rio, I rode a lot to find ivermectin, I got it ... I took a pill yesterday, I woke up better ... I took one today, I intend to take the rest one a day. I don't know if I was with Covid but I got better.

[Ana Paula Fonseca 3 days ago](#)

I am indicating ivermectin p to all friends who have symptoms of covid. My husband was sick in bed. I didn't eat or drink anything, I felt chills. Headache pain throughout the body. When I gave him ivermectin, 2 days later, he already ate, took juices, with 3 days he was standing.

[Dilma Viana 21 hours ago \(edited\)](#)

I agree with you intubation and the end, the treatment has to be at the beginning of the symptoms, this business of staying home taking paracetamol and hoping to evolve seriously, the chances are minimal, take ivermectin and then azithromycin and corticosteroids and anticoagulants, you are cured, I am talking about personal experience, do not wait for public or private health to do your part, take the medicines. Because this medicine is cheap, the pharmaceutical industry and public authorities have no interest in talking about this medicine.

[Sirleia Chermout 22 hours ago \(edited\)](#)

Good morning, I had a lot of headache. My heavy body started with a scratching throat .. I didn't think twice I bought it and took it I don't know if it was covid19. I know I got well. I had already lost my sense of smell. I couldn't take it but I couldn't even get out of bed ... believe it or not, whatever it was I know I improved for the honor and glory of the Lord Jesus ... even WHY I saw that it is good even for HN1) details I had a lot of chills.

[Rosangela Poças 1 day ago](#)

Thanks to my good Lord I am almost recovered. I believe that the way it came is going out in the name of the Lord Jesus Christ.

[Adriana Tavares 16 hours ago](#)

Did you use ivermectin ?? Glory to God 🙌

[Leirbag T-Shirt 1 day ago \(edited\)](#)

I gave my wife two pills of ivermectin for her to take yesterday. She has already improved a lot. She had a cough, but it is already better, are two pills essential?

[Ligiane Souza 1 day ago \(edited\)](#)

I only know that I had all the symptoms of the corona virus, I even went to the doctor, he prescribed me only dipyrone, I didn't think twice and I took two pills of ivermectin on the second day I had nothing more I'm not lying, I had an unbearable headache apart from back pain and a lot of fever, I

didn't take the test either but the doctor was very clear with me and the symptoms yes of the covid 19 I didn't have a cough

[Vantoir Toniolli 3 days ago](#)

Look, I don't know if you were covid, but last Monday I was tired and a little weird, Tuesday when I woke up I was a bit feverish and had a dry cough, my throat was scratching, I had already bought ivermectin a month ago, I took 2 pills, 2 more, nothing went wrong, on Thursday it was better, today I'm zero today, I repeat again I don't know if you were a covid, but I'm a show.

[Gleidson Filho 2 days ago](#)

Friend, I'm 20 years old I speak from Caruaru-pe, I saw your video at 4:00 am on Saturday morning for Sunday, I took ivermectin at that time, today Monday, May 4, I find myself in a healing situation of about 90%, this remedy really works, thank god i'm much better, i have been with covid-19 for 11 days, i never had high blood pressure and i started to have a lot of pains in my lungs and heart, today these symptoms came out.

[Elvecy Castrelly 5 days ago \(edited\)](#)

Many people died with this diabolical covid for lack of quick action! You are a man of action.

[Floriano Lopes 4 days ago](#)

My wife, my son and I, we have the symptoms, contagion was very fast. The pain in the body and the sore throat is very strong. I bought the ivermectin now, we take 2 each. Let's see what will happen I have faith that it will work!

[Denys Frasão 5 days ago](#)

My wife and I had covid 19, confirmed by testing, we took ivermerctin, and she already took azithromycin and hydroxychloroquine, as she had a slightly worse picture than mine, but we treated her at home, because thankfully we didn't have any serious symptoms. I also kept our diet Good, vitamin C and vitamin D. My wife also took coid D. We are already healed. I felt an improvement when taking the medicine. My wife after azithromycin and hydroxychloroquine improved a lot after two days.

[Vanessa Carneiro Costa 5 days ago](#)

I had several symptoms of the corona virus. I went to the medical clinic twice, reported that I had symptoms, sent me home, it was a cold, and follow the evolution! I asked to take the test, I was told that only for hospitalized people and the condition has evolved! I started with a headache, an earache, a burning and aching throat, pressure for two days 19 out of 10, and then a dry cough! When I started to have difficult breathing, I had no doubts, I called the pharmacy and bought two Caxias of

ivermectin. I took two pills the same day! On the second day at night, I started to improve, with 4 days I was very well. Just be very tired one more week. I was quarantined for 35 days later! Since then, 45 days have passed and I haven't had anything else!

[Jane Ildefonso 5 days ago](#)

I know two who took this medicine and got well!

[Urso37 5 days ago](#)

I used it when I had a sore throat with a headache and onset of fever .... it passed the next day, if it was the effect of ivermectin I don't know, but I think it helped. I just think it helped ... a situation similar to what this video described.

[carlos Valerio 3 days ago](#)

I spent a couple of weeks with a sore throat, I had no fever, no cough, no other symptoms, I used two boxes of benetette lozenges and one of potassium diclofenac, and the throat improvement was only for two days and the irritation would come back again. , I learned about ivermectin and used two and a half pills, which is for my weight and thank God, I didn't have any more irritation in my throat.

[Edna Maria 21 hours ago](#)

Remember what they did with hydroxychloroquine , just because the president released the drug , there is a twist of the virus, which is a twist of chaos . This medicine already disappeared from the pharmacy , who is going to sell expensive , and a lot is taking advantage of the virus. If you have a lot of death of covid , and because they do n't give the medication that the president released , I know people who take it , and they 're fine .

[Pedro Antonio 1 day ago](#)

All the governments federal, estsdual , municipal, justice and Congress seem not to be not there for the people , we have that in turn alone . They are concerned with spending money .

[joao lirio 1 day ago](#)

Of course, they want that the people die They do not are interested in healing the people . They are concerned that the schedu le you meet .

[João Gustavo de Lima Teixeira 1 day ago \(edited\)](#)

The people do not 're calling because they know that the ivermectin and praziquantel kills this miserable . The governors and the media already know and are locking the truth to overthrow the Bolsonar

o . How much more time the terror and suspense in the media for the market to stay closed , most will be the arrival emergency of money to the governors .

MAX SILVA 1 day ago

I have tried to look here in pharmacies in the city of Rio and do not have in place any !! It looks like they took it off the shelves on purpose . In Australia it has already been approved and staff are saving themselves . I do n't know why they have n't approved yet !!!

Marilia Verçosa 1 day ago

People pq not use just this medication in PSUs, Hopitais.Muita deaths is a remedy that could have saved.

João Gustavo de Lima Teixeira 1 day ago (edited)
