

How to create a tournament in TK Pro

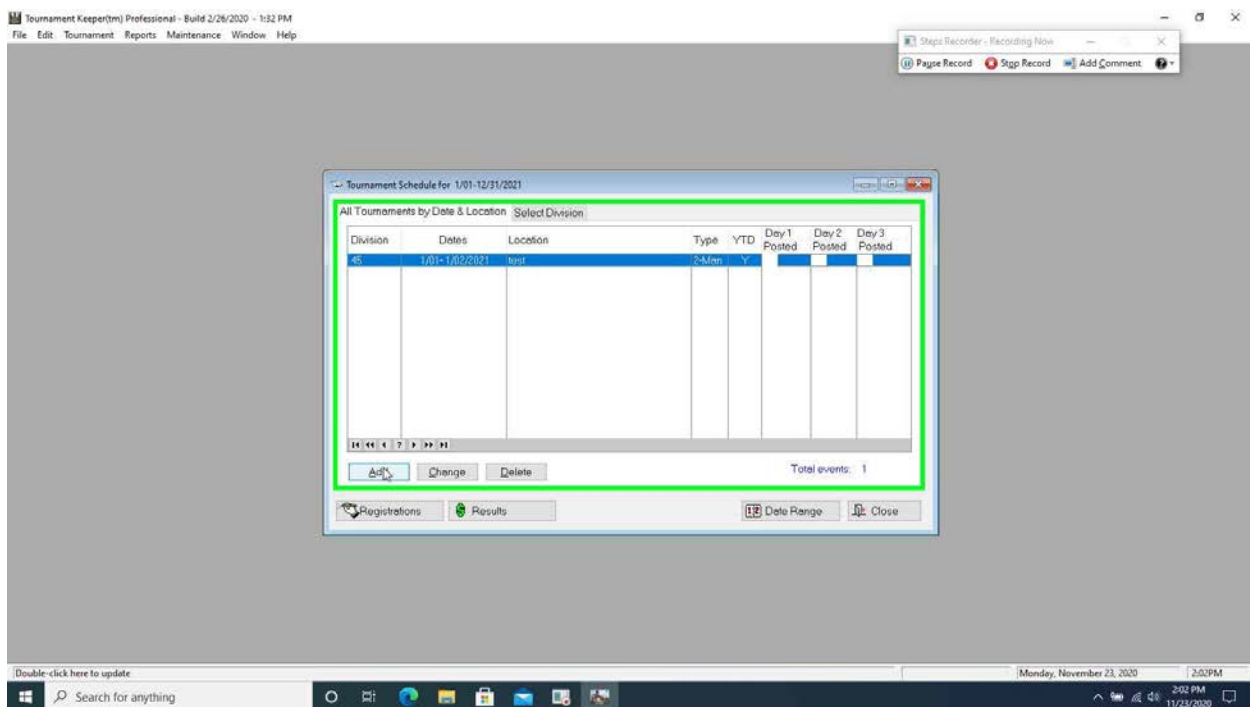

Open TK pro

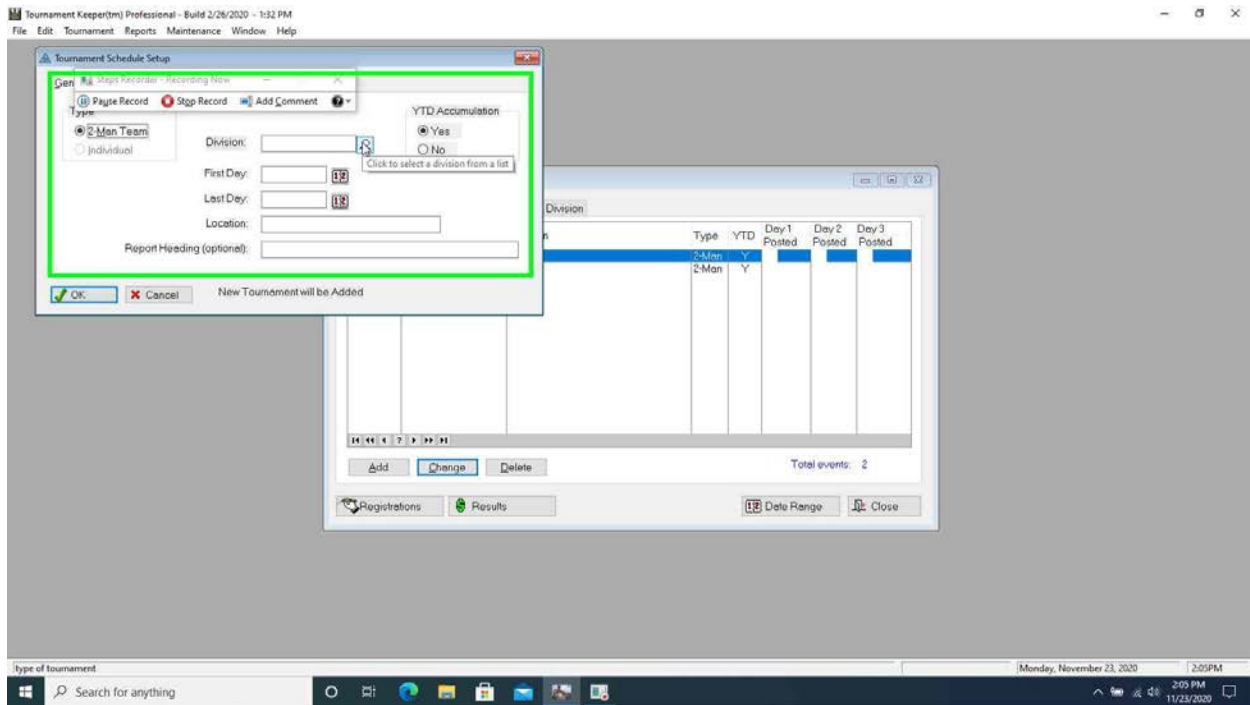

Go to Tournament-Schedules

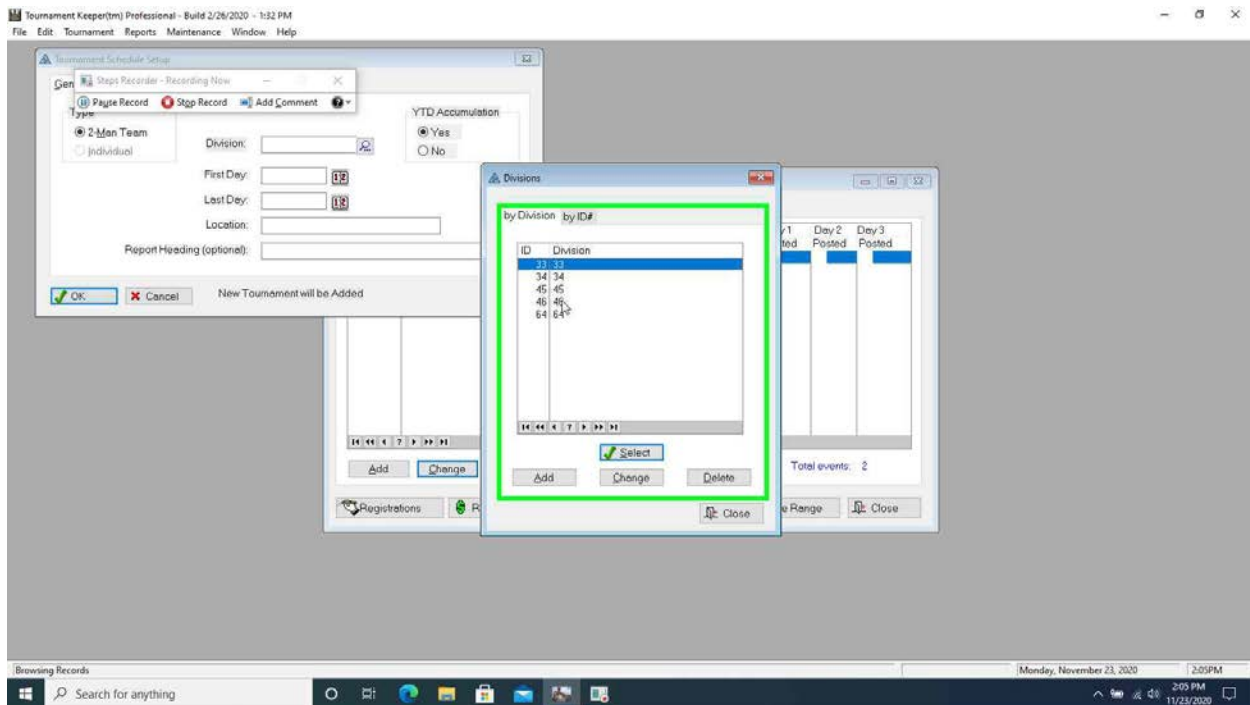

Choose "All tournaments by Date & Location"

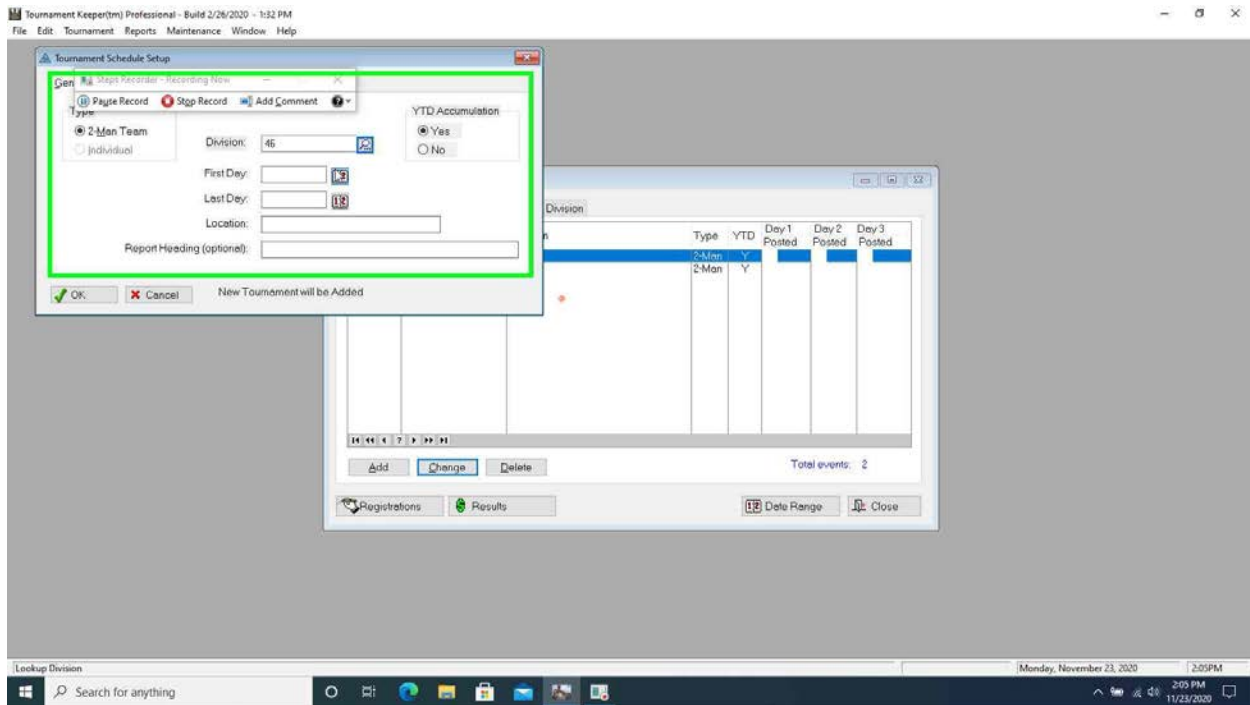

Click "Add"

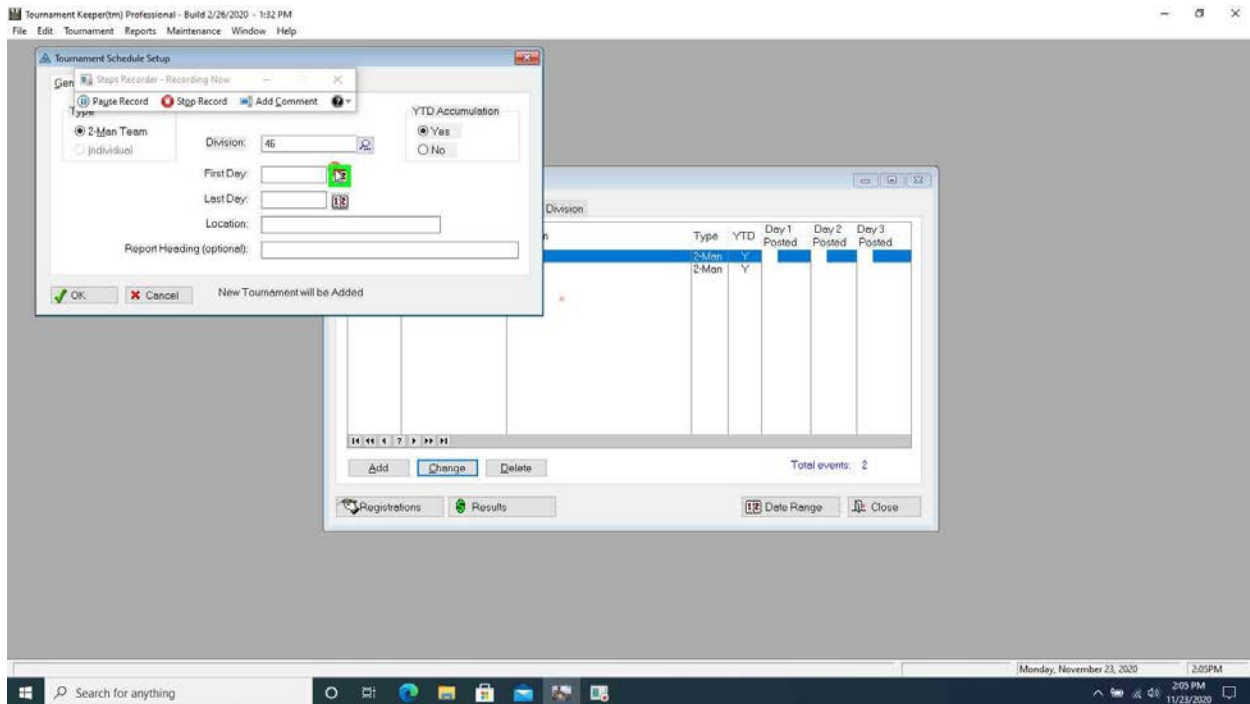

Click the magnify glass on Division section

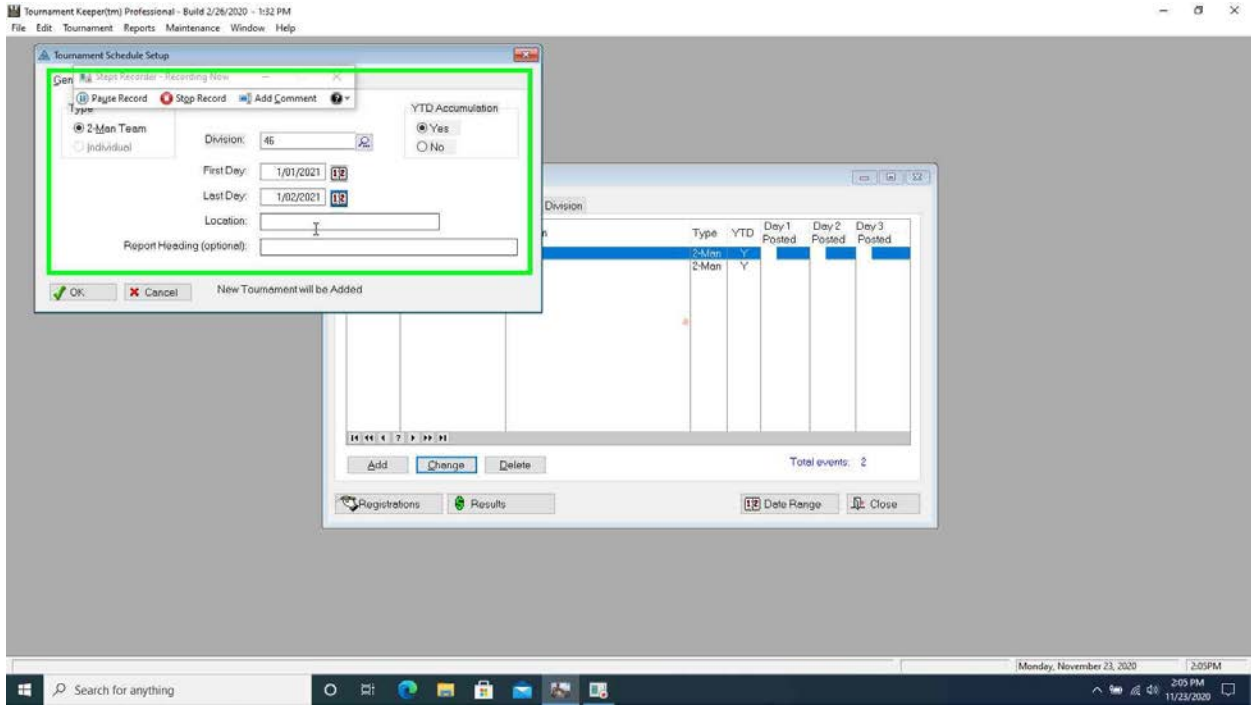

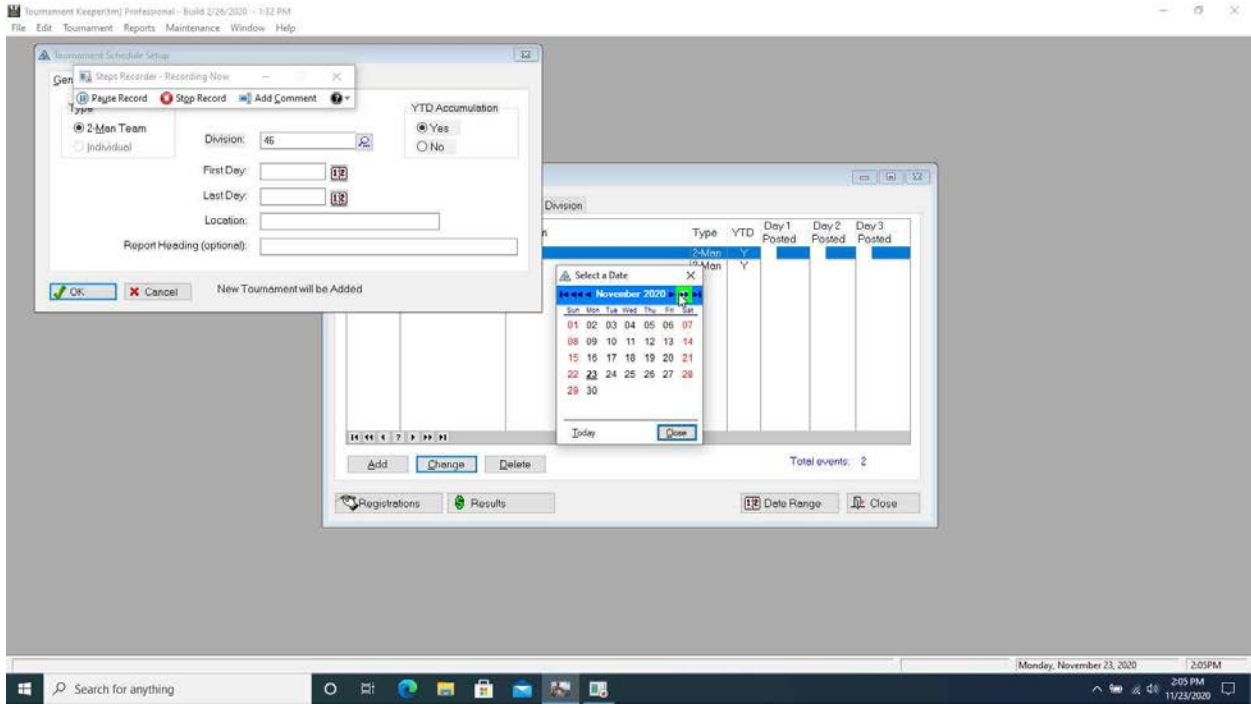

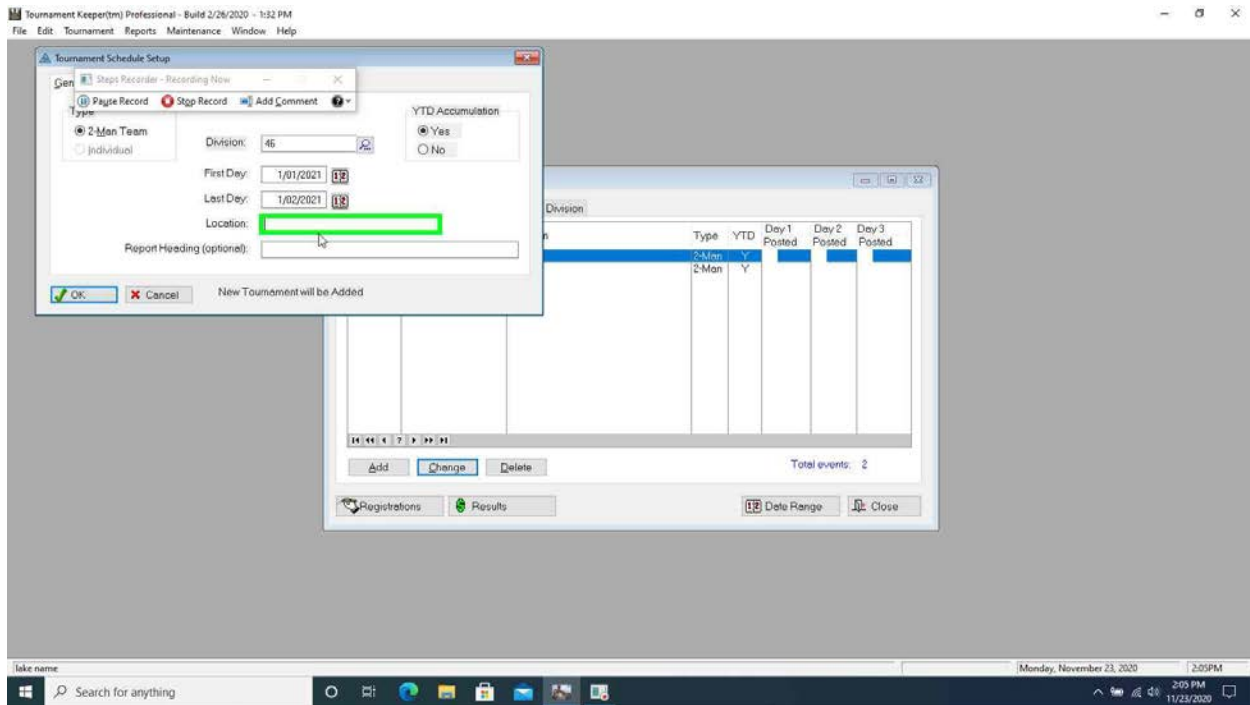

If you do not have your division then click "Add"

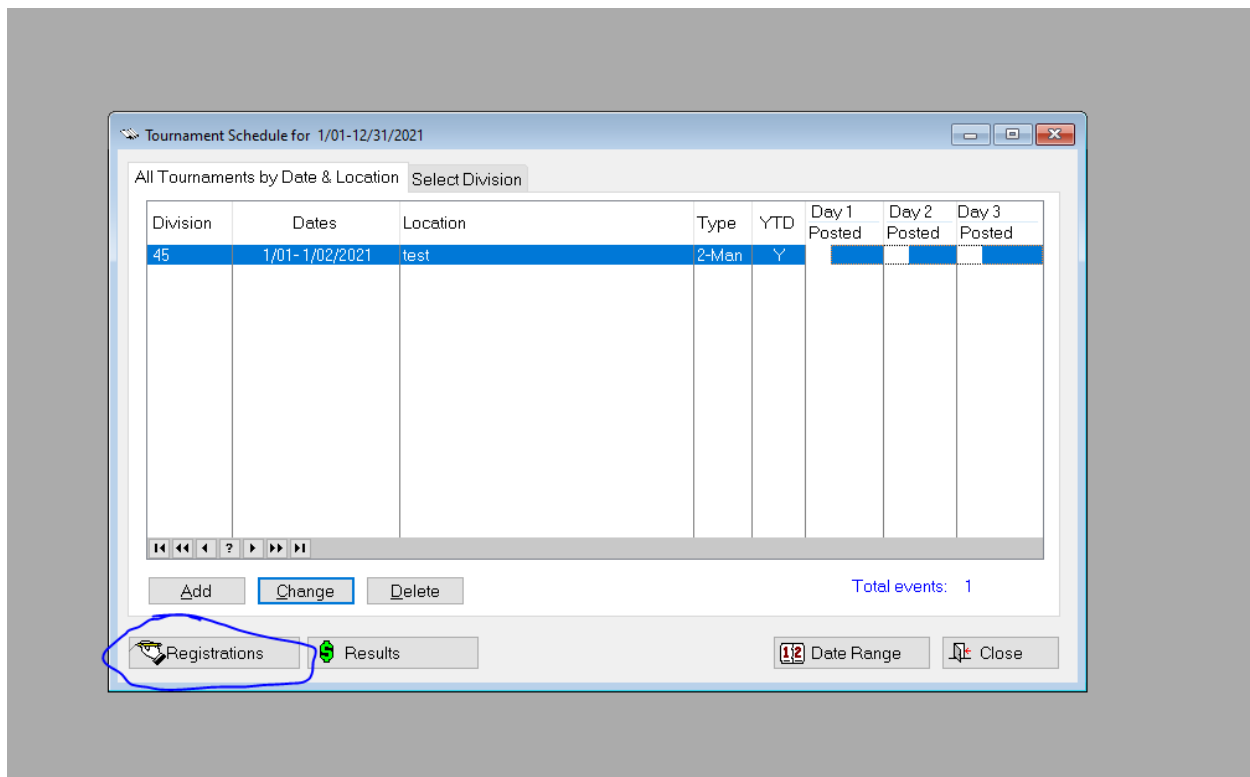

Then select division and now choose dates of the tournament.

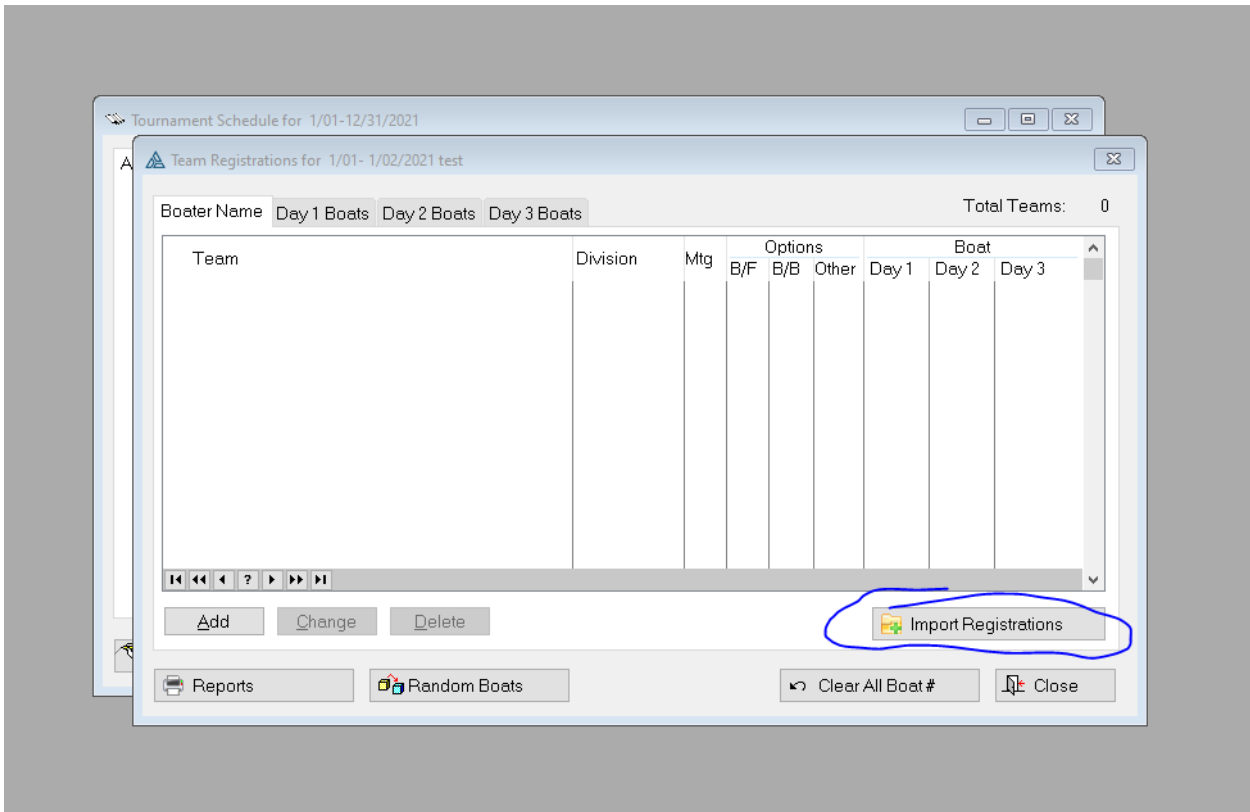

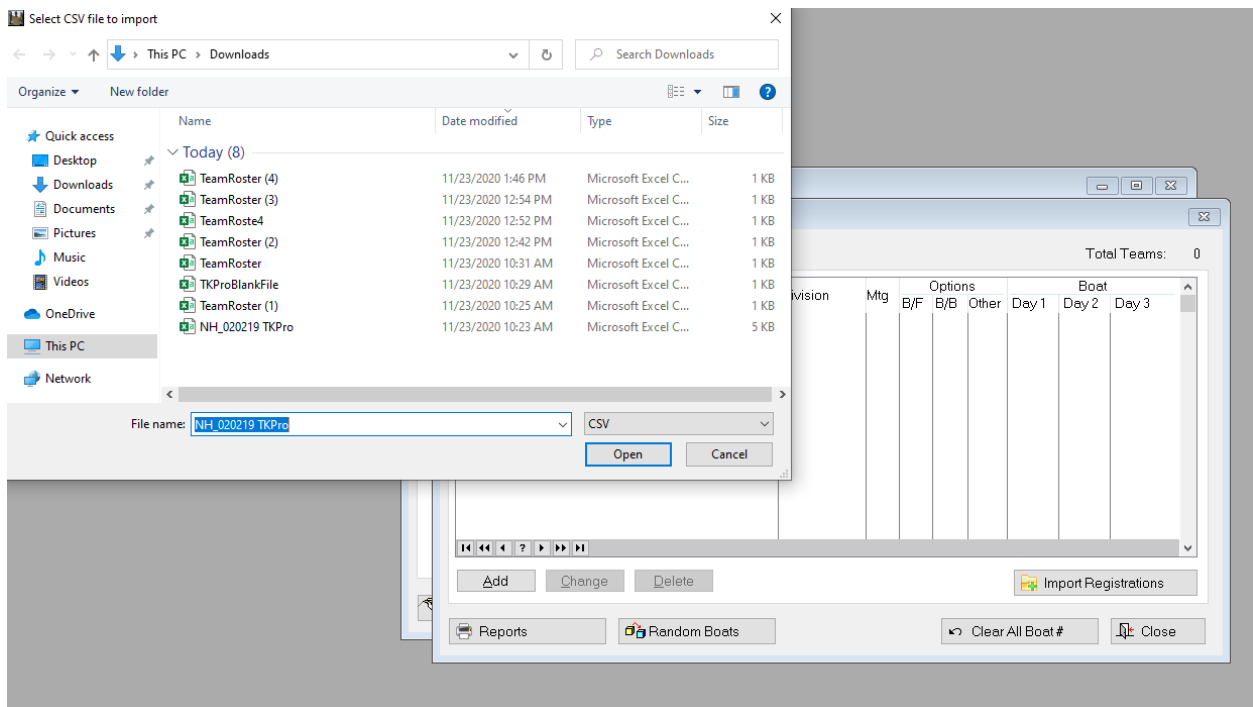

Now add location of the tournament and click "OK"

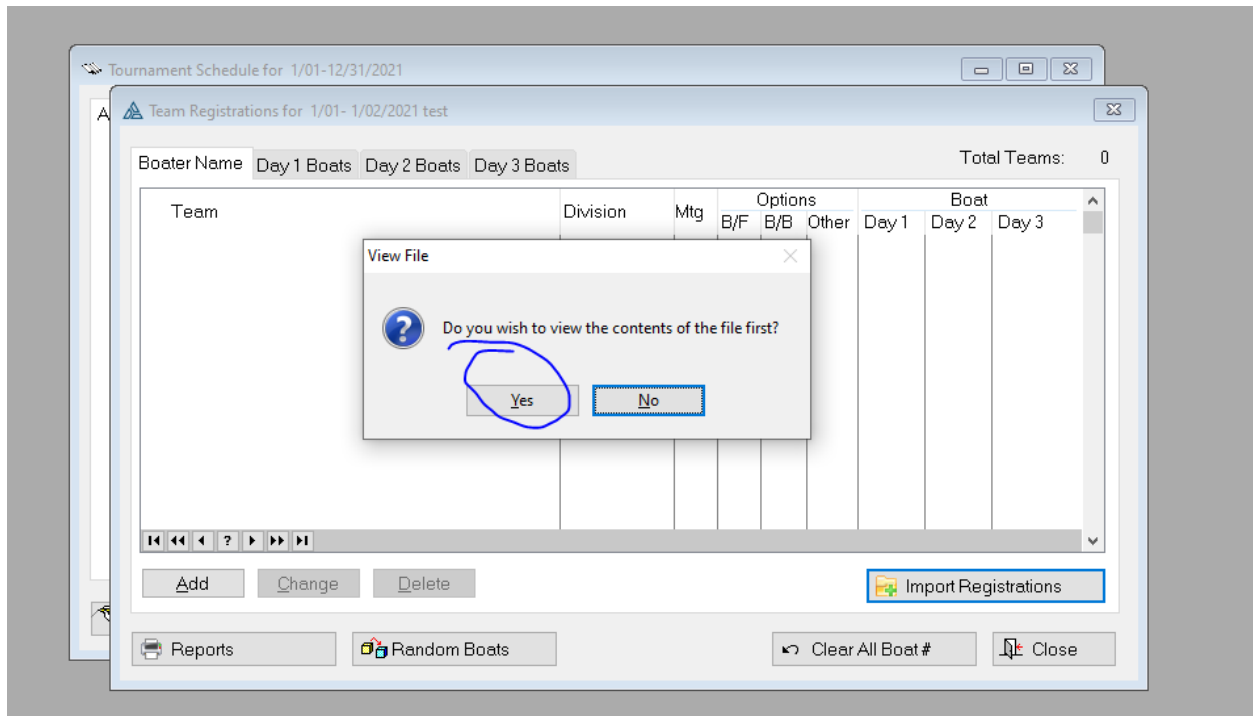

Now import your registration from the directors' page.

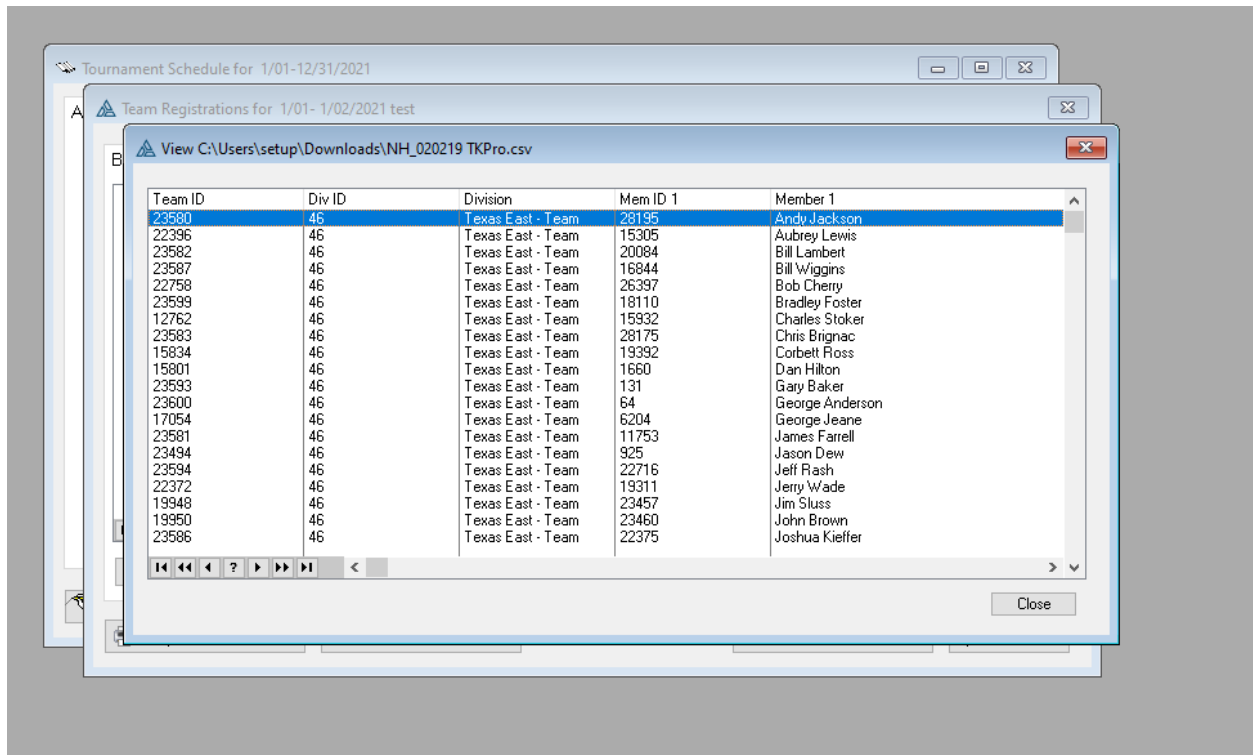

Click "Import Registrations"

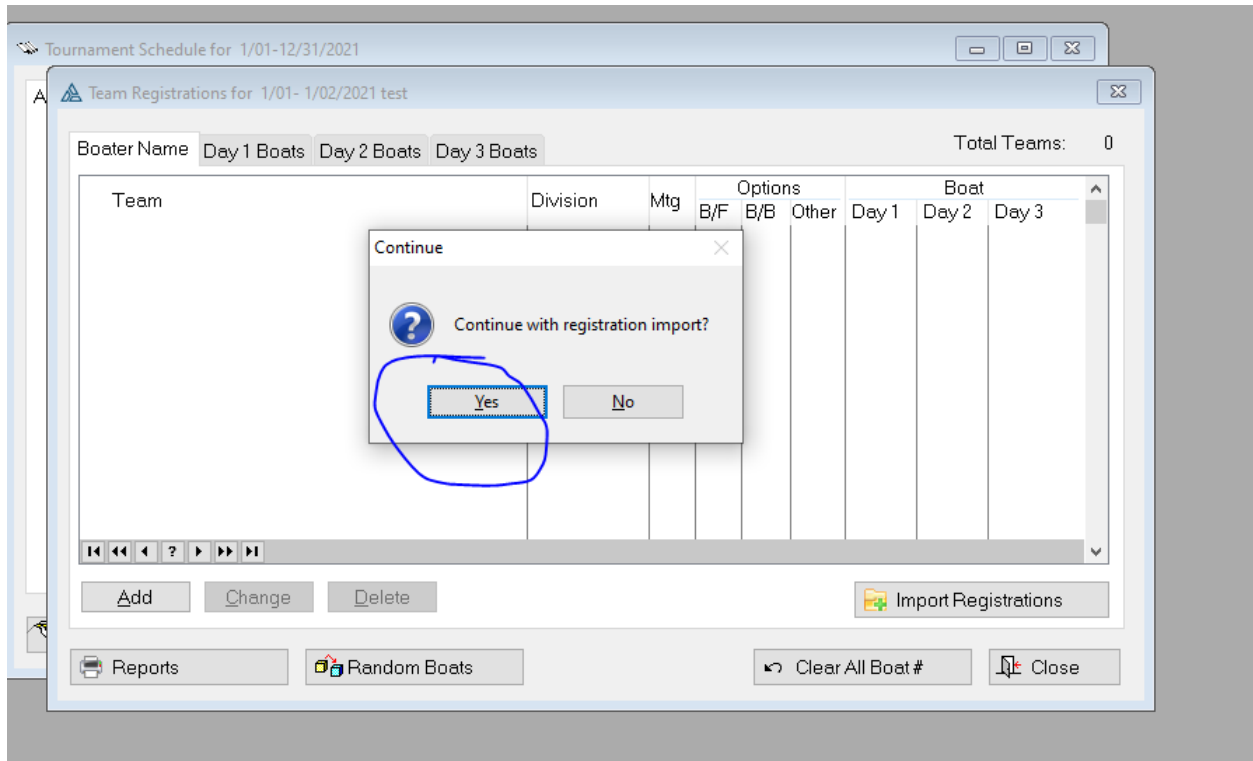

**Now Choose file you exported from Directors' page and
Click "Open"**

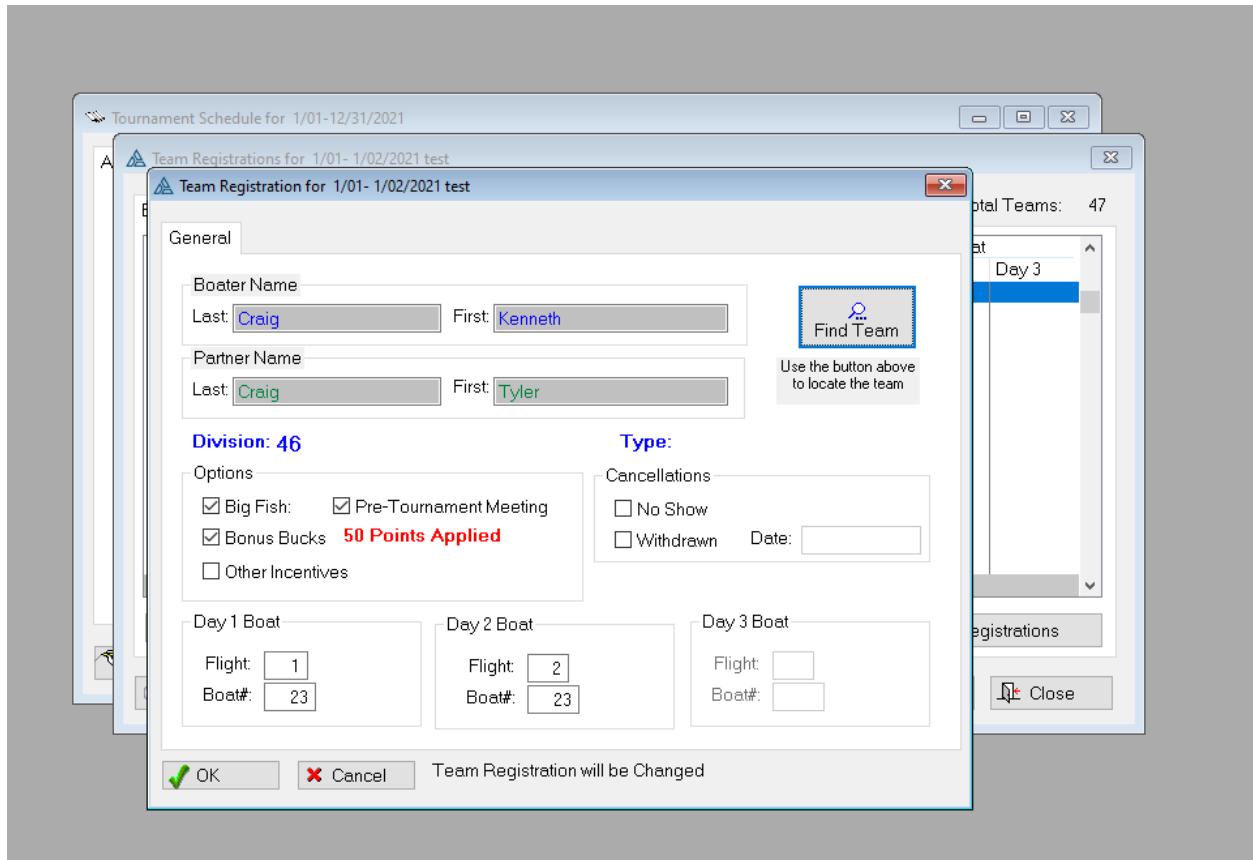

**Click "Yes" to preview and make sure every team is
there.**

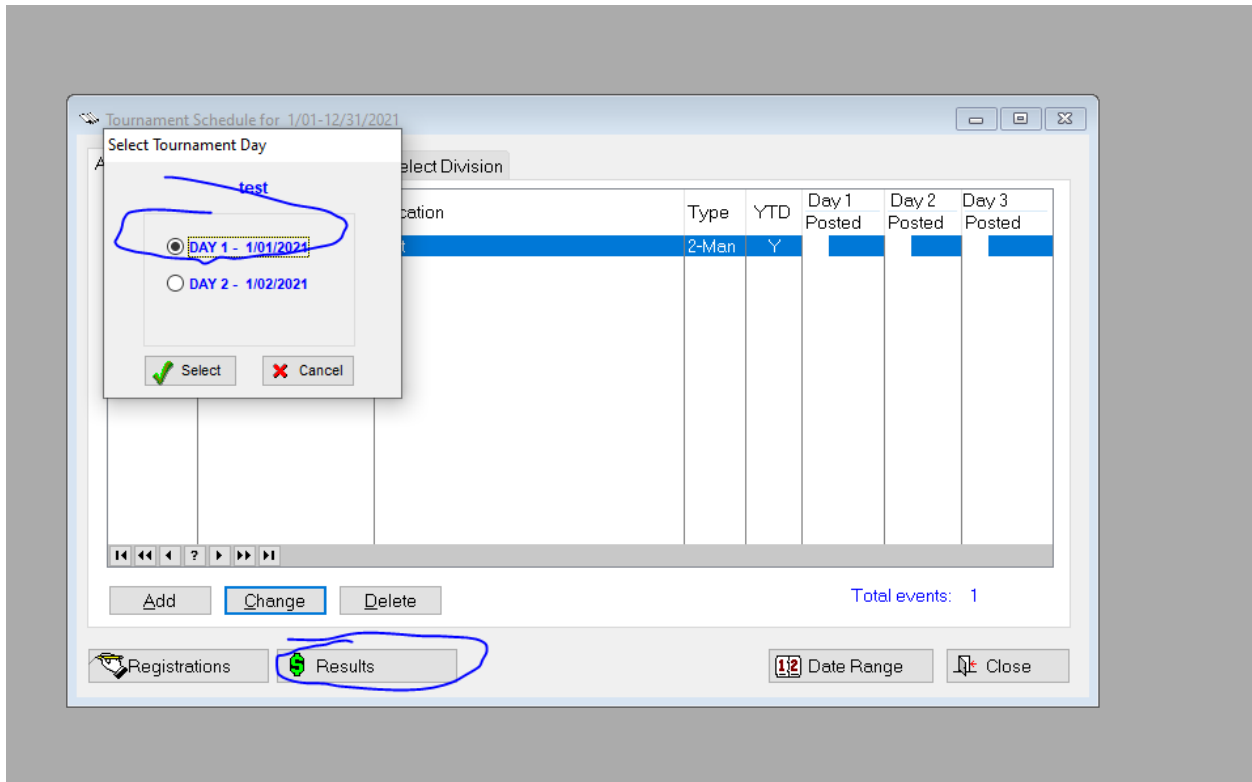

This is where you verify and then click “Close”

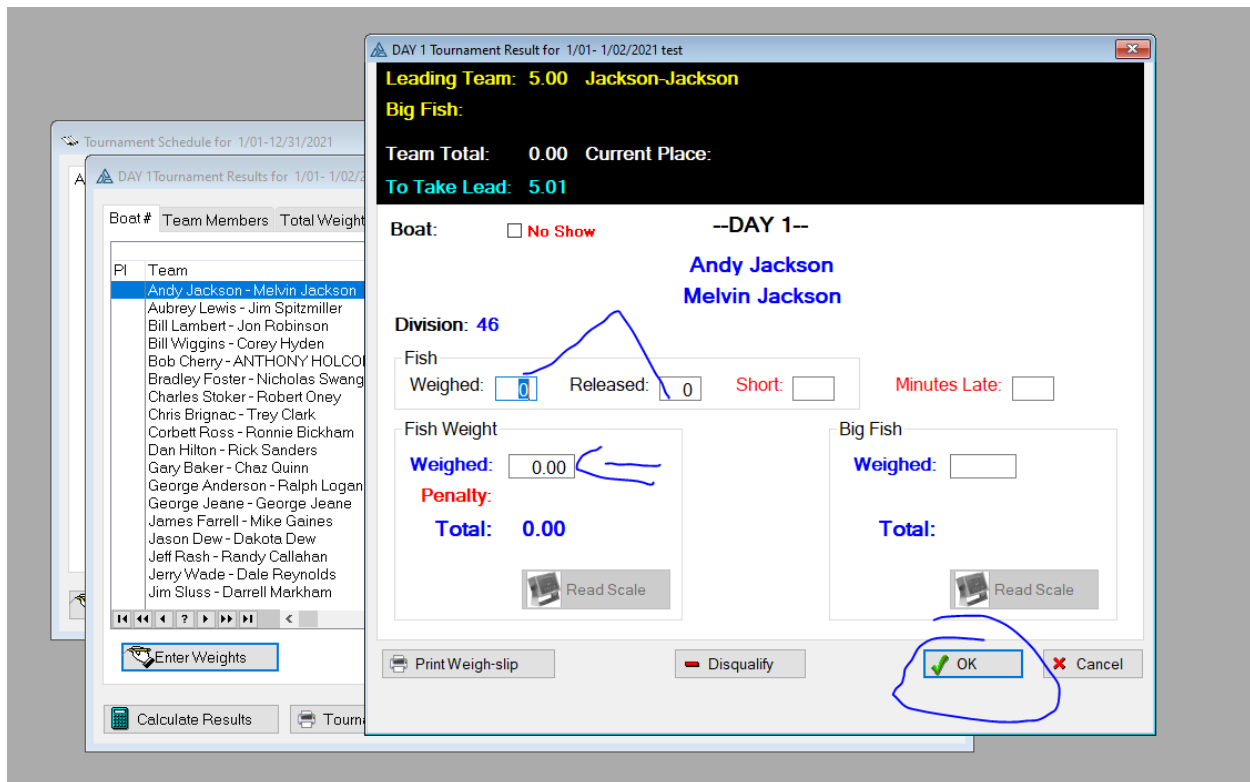

If everything looks good, then click “Yes”.

Once the teams show, Double click on the names to add “Big Fish, Pre-tournament meeting, Bonus bucks, Flight numbers, and boat numbers. After all teams are done, you are ready to start the tournament.

**Choose the Day of the tournament and then click
"Results"**

Then double click each team as they weigh in and enter number of fish, how many released, and totals for bag and big fish. Then click “OK”
