

AlgoVogue Maestro – Licensed Version Installation Guide

Product: AlgoVogue Maestro – Licensed Trading Version

Supported Accounts:

- MetaTrader 4 Live Accounts
- MetaTrader 4 Demo Accounts

Chart & Timeframe Requirement:

- Attach EA to **BTCUSD on M1 (1-minute timeframe)** only

Installation Steps:

1. Open MetaTrader 4
2. Click File → Open Data Folder
3. Go to MQL4 → Experts
4. Copy the licensed EA file into the Experts folder
5. Restart MetaTrader 4 or refresh Navigator

How to Attach EA to Chart:

1. Open BTCUSD chart
2. Switch timeframe to M1 (1 minute)
3. Drag AlgoVogue Maestro onto the chart
4. Enable AutoTrading
5. Allow DLL imports if prompted

IMPORTANT – Allow Website for License Verification:

The EA requires permission to communicate with the AlgoVogue license server.

Steps to allow website:

1. In MetaTrader 4, click Tools → Options
2. Open the **Expert Advisors** tab
3. Tick **Allow WebRequest for listed URL**
4. Click **Add new URL** and enter:
<https://algovogue.uk>
5. Click OK and restart MetaTrader if required

License Activation:

- License is verified automatically after purchase
- Active internet connection is required at all times
- If the license is invalid or expired, the EA will remove itself automatically

Best Settings:

Recommended presets and optimized parameters are available at:

<https://algovogue.com/preset>

Broker Recommendation:

- Preferred brokers: Vantage International, IC Markets
- Recommended BTCUSD spread: below 2000 points

Risk Warning:

Trading involves significant risk. AlgoVogue provides software tools only and does not provide investment advice.
