South West Subsea Recommendation Letter

To Whom it May Concern,

This letter is to be used as a recommendation for South West Subsea for the work they performed for 888 Abalone in repairing our ocean infrastructure for our Greenlip abalone facility in Bremer Bay Western Australia. We have had a fantastic working relationship with Cat and his team over the past three years. Their knowledge, work ethic and can-do attitude made them our preferred commercial dive team to use for all our underwater infrastructure repair and install needs.

South West Subsea has completed works for us that include installation of weights onto our ocean intake lines, the dredging and adjusting of water intake towers positions and ocean intake line extensions, which resulted in improved function of our ocean intakes. We found the team to be very professional, with them taking into consideration the safety of his team, and ours, at all times. They also ensured that our ocean assets were not damaged during the project, consulting with us regularly and identifying possible risks for consideration. Cat and his team were always eager to problem solve within the budgetary constraints of the company allowing for the best possible outcome with the resources available.

I can not recommend South West Subsea highly enough for any future commercial project. I have no doubt that the team there will tackle any future project with the professionalism and standard work that we have experienced here.

Mathew Skye
Business Development Manager
