**LGMT 2**

**SKF general purpose industrial and automotive bearing grease**

LGMT 2 is mineral oil based lithium soap thickened grease with excellent thermal stability within its operating temperature range. This premium quality, general purpose grease is suitable for a wide range of industrial and automotive applications.

**Characteristics**
- excellent oxidation stability
- good mechanical stability
- excellent water resistance and rust inhibiting properties

**Recommended applications**
- agricultural equipment
- automotive wheel bearings
- conveyors
- small electric motors
- industrial fans

---

**LGMT 3**

**SKF general purpose industrial and automotive bearing grease**

LGMT 3 is mineral oil based lithium soap thickened grease. This premium quality, general purpose grease is suitable for a wide range of industrial and automotive applications.

**Characteristics**
- excellent rust inhibiting properties
- high oxidation stability within its recommended temperature range

**Recommended applications**
- bearings with a bore diameter > 100 mm
- outer bearing ring rotation
- vertical shaft applications
- continuous high ambient temperatures >35 °C (95 °F)
- propeller shafts
- agricultural equipment
- car, truck and trailer wheel bearings
- large electric motors
SKF heavy load, extreme pressure bearing grease
LGEP 2 is mineral oil based lithium soap thickened grease with extreme pressure additives. This grease provides good lubrication in operating temperatures ranging from –20 to +110 °C (–5 to +230 °F)

Characteristics
- excellent mechanical stability
- extremely good corrosion inhibiting properties
- excellent EP performance

Recommended applications
- pulp and paper machines
- jaw crushers
- dam gates
- work roll bearings in steel industry
- heavy machinery, vibrating screens
- crane wheels, sheaves

SKF food compatible bearing grease
LGFP 2 is clean, non-toxic bearing grease, which is based on medical white oil using an aluminium complex soap. This grease is formulated using only FDA\(^1\) listed ingredients and is authorised by the NSF\(^2\) for category H1\(^3\) service.

Characteristics
- compliance with all existing legislation on food protection
- high resistance to water washout making it suitable for applications subject to frequent wash down
- excellent grease life
- excellent corrosion resistance
- an essentially neutral pH value

Recommended applications
- bakery equipment
- food processing equipment
- multi-pack cassette bearings
- wrapping machines
- conveyor bearings
- bottling machines

---
\(^1\) Food and Drug Administration
\(^2\) National Sanitation Foundation
\(^3\) Incidental contact with food
LGEM 2

SKF high viscosity bearing grease with solid lubricants
LGEM 2 is a premium quality, high viscosity, mineral oil based grease using a lithium soap containing molybdenum disulphide and graphite.

Characteristics
- good lubrication for bearings operating under heavy loads and slow rotation
- safe lubrication due to the inclusion of molybdenum disulphide and graphite

Recommended applications
- rolling element bearings running at low speed and very heavy loads
- jaw crushers
- track laying machines
- lift mast wheels
- building machines such as mechanical rams, crane arms and crane hooks

LGEV 2

SKF extremely high viscosity bearing grease with solid lubricants
LGEV 2 is a premium quality, extremely high viscosity, mineral oil based grease using a lithium-calcium soap containing molybdenum disulphide and graphite.

Characteristics
- excellent lubrication properties due to the inclusion of molybdenum disulphide and graphite solid
- very suitable for lubricating large spherical roller bearings subject to heavy loads and slow rotation, a situation where microslip is likely to occur
- extremely mechanically stable providing good water resistance and corrosion protection

Recommended applications
- trunnion bearings on rotating drums
- support and thrust rollers on rotary kilns and dryers
- bucket wheel excavators
- slewing ring bearings
- high pressure roller mills
- crushers
SKF low temperature, extremely high speed bearing grease
LGLT 2 is premium quality, fully synthetic oil based grease using lithium soap. Its unique thickener technology and its low viscosity oil (PAO) provide excellent lubrication performance at low temperatures (–50 °C (–60 °F)) and extremely high speeds, n d_m values of 1,6×10⁶ can be reached.

Characteristics
- low frictional moment
- low level of power loss
- quiet running behaviour
- extremely good oxidation stability and resistance to water

Recommended applications
- textile spinning spindles
- machine tool spindles
- instruments and control equipment
- small electric motors used in medical and dental equipment
- in-line skates
- printing cylinders
- robots

SKF green biodegradable bearing grease
LGGB 2 is biodegradable, low toxicity, synthetic ester oil based grease using a lithium-calcium thickener. It has excellent lubrication properties for a wide range of applications operating under different conditions.

Characteristics
- compliance with current regulations on toxicity and biodegradability
- good performance in applications with steel-on-steel spherical plain bearings, ball and roller bearings
- good low temperature start-up performance
- good corrosion inhibiting properties
- suitable for medium to heavy loads

Recommended applications
- agricultural and forestry equipment
- construction and earthmoving equipment
- mining and conveying equipment
- water treatment and irrigation
- locks, dams, bridges
- linkages, rod ends
- other applications where contamination of the environment is a concern
LGWM 1

SKF extreme pressure (EP) low temperature bearing grease

LGWM 1 is a mineral oil based grease using a lithium soap and containing extreme pressure additives. It is very suitable for the lubrication of bearings operating under both radial and axial loads, e.g. transport screws.

Characteristics
- good oil film formation at low temperatures down to –30 °C (–20 °F)
- good pumpability at low temperature
- good corrosion protection
- good water resistance

Recommended applications
- windmills
- screw conveyors
- centralized lubrication systems
- spherical roller thrust bearing applications

LGWM 2

SKF heavy load, wide temperature bearing grease

LGWM 2 has been developed for lubrication under a wide temperature range, heavy loads and wet environments. LGWM 2 is a synthetic-mineral oil based grease using the latest complex calcium sulphonate thickener technology. LGWM 2 is suitable for temperatures down to –40 °C (–40 °F).

Characteristics
- excellent corrosion protection
- excellent mechanical stability
- excellent heavy load lubricating capacity
- good false brinelling protection
- good pumpability down to low temperatures

Recommended applications
- wind turbines
- heavy-duty off road applications
- snow exposed applications
- marine applications
- spherical roller thrust bearing applications
LGWA 2
SKF heavy load, extreme pressure (EP), wide temperature range bearing grease
LGWA 2 is premium quality mineral oil based lithium complex grease with extreme pressure (EP) performance. LGWA 2 has such properties that it can be recommended for a wide range of industrial and automotive applications.

Characteristics
- excellent lubrication at peak temperatures up to 220 °C (430 °F) for short periods
- protection of wheel bearings operating under severe conditions
- effective lubrication in wet conditions
- good water and corrosion resistance
- excellent lubrication under heavy loads and low speeds

Recommended applications
- wheel bearings in cars, trailers and trucks
- washing machines
- electric motors

LGHB 2
SKF heavy load, high temperature, high viscosity bearing grease
LGHB 2 is a premium quality, high viscosity, mineral oil based grease using the latest complex calcium, sulphonate soap technology. This grease contains no additives and the extreme pressure characteristics are created within the soap structure.

Characteristics
- excellent anti-oxidation and anti-corrosion properties
- good EP performance in applications running at heavy loads

Recommended applications
- steel on steel plain bearings
- pulp and paper machines
- asphalt vibrating screens
- continuous casting machines
- sealed spherical roller bearings operating up to 150 °C (300 °F)
- withstands peak temperatures of 200 °C (390 °F)
- work roll bearings in steel industry
- mast rollers of fork lift trucks
LGHP 2

SKF high performance, high temperature bearing grease
LGHP 2 is premium quality mineral oil based grease, using a modern polyurea (di-urea) thickener. It is suitable for ball (and roller) bearings required to run extremely quiet, operating at a wide temperature range from −40 to +150 °C (−40 to +300 °F), at medium to high speeds.

Characteristics
• extremely long life at high temperature
• wide temperature range
• excellent corrosion protection
• high thermal stability
• good low temperature start-up performance
• compatibility with common polyurea greases
• compatibility with lithium complex thickened greases
• low noise level characteristics
• very good mechanical stability

Recommended applications
• electric motors: small, medium and large
• industrial fans, including high-speed fans
• water pumps
• rolling bearings in textile, paper processing and drying machines
• applications with high-speed ball bearings operating at medium and high temperatures
• clutch release bearings
• kiln trucks and rollers
• vertical shaft applications

LGET 2

SKF high temperature, extreme condition bearing grease
LGET 2 is premium quality, synthetic fluorinated oil based grease using a PTFE thickener. It has excellent lubrication properties at extremely high temperatures exceeding 200 to 260 °C (300 to 500 °F).

Characteristics
• long life in aggressive environments such as very reactive environments or areas with a presence of high purity gaseous oxygen or hexane
• excellent oxidation resistance
• good corrosion resistance
• excellent water and steam resistance

Recommended applications
• bakery equipment (ovens)
• kiln truck wheels
• load rollers in copying machines
• wafer baking machines
• textile dryers
• film stretching tenders
• electric motors running at extreme temperatures
• emergency/hot fans
• vacuum pumps
