

**CERTIFYING A FUTURE  
FOR MAINTENANCE  
AND RELIABILITY  
TECHNICIANS**

## The Society for Maintenance & Reliability

**Professionals (SMRP)** strives to develop and promote excellence in maintenance, reliability and physical asset management.

SMRP provides professional certification for technicians and advocates for **career and technical education (CTE)** for the next generation of qualified professionals.

## WHY CERTIFY

### The Certified Maintenance & Reliability Technician (CMRT)

recognizes technicians with real-world knowledge and expertise by testing their competency in four areas:

- Maintenance Practices
- Preventative and Predictive Maintenance
- Troubleshooting and Analysis
- Corrective Maintenance

Earning the CMRT shows employers, colleagues and peers your commitment toward continuing education and training.

## SMRP VALUES CAREER AND TECHNICAL EDUCATION

### Continuing Education and Training

Technicians can continue their education outside of the classroom or job training through SMRP:

- Professional Development Webinars
- Annual events like the SMRP Symposium or Annual Conference
- Approved Provider Education Program (APEP)
- Guides, best practices and other resources available in the SMRP Library

### Government Relations

SMRP members work to ensure workforce development is at the forefront of U.S. legislative decisions. Activities include:

- Fly-in events to meet with policymakers
- Commenting on legislation
- Presentations at government agency meetings

### Student Advancement Opportunities

- Annual scholarship program offering five (5) scholarships
- Free student webinars
- Discounted student membership
