Why Choose The Lifty?

The Lifty addresses a critical workplace hazard – Repetitive Strain Injuries (RSIs), which account for 34% of all lost working days in hospitals¹. With The Lifty in your workplace, you will safeguard your team's health, and keep your operation running at peak performance.

¹ Journal of Safety Research 2022

Repetitive Strain Injuries (RSIs)

In a hospital with 60 reported injured staff members, an additional 40 may be suffering in silence, quietly working slower with less productivity and much more mental stress.

That's a staggering 40% with unreported RSIs².

² Injured Workers' Under Reporting in the Healthcare Industry 2010

The Essential Tool for Healthcare Efficiency

Designed by a healthcare professional for healthcare professionals.

The Lifty effortlessly removes caps from IV and injectable vials, protecting nurses and healthcare workers from Repetitive Strain Injuries (RSIs) that erode productivity and wellness. Its compact, lightweight design easily attaches to IV poles, can be carried by staff on retractable lanyards, or stationed in med rooms, infusion clinics, and pharmacies.

lost working days due to RSIs.

26%
Hospital staff turnover rate due to RSIs

The High Cost of Dealing with RSIs

Each Repetitive Strain Injury costs hospitals an average of \$40,000³ and contributes to a

turnover rate of 26% among hospital staff⁴. Implementing **The Lifty** can drastically lower these significant expenses by reducing

the cause of many RSIs - removal of vial caps. Making The Lifty a long-term investment in the health of your staff and the financial well-being of your facility.

On average, each RSI costs hospitals **\$40,000**
