EEOI REPORT

M.V. MY VESSEL II

EEOI CALCULATION

We provide EEOI calculations on a voyage, daily, weekly or monthly basis. We cater for the individual requirements of our clients needs. EEOI provides a real-time assessment of a ship's operational efficiency and is often used by ship operators to monitor and improve their vessel's energy performance. It helps shipowners and operators make operational adjustments to reduce fuel consumption and emissions.
