ISO9001 and NHSS Accreditations

Elevating Standards and Strengthening our Services

To support our current clients with highway contracts, we have successfully obtained **ISO 9001** and **National Highways Sector Scheme** accreditations. These certificates demonstrate the high standard of our work and provide assurance that we are a reliable and high-quality contractor. Additionally, the recent renewal of our **CHAS**, **Constructionline** and **Alcumus Safe Contractor** accreditations reinforces our commitment to excellence in safety and quality operations.

AS ALWAYS, A HEARTFELT THANKS TO ALL OUR ONGOING AND NEW CLIENTS FOR ENTRUSTING US WITH YOUR PROJECTS.

DC yard expansion: With the acquisition of additional land adjacent to our current premises, we're gearing up to increase the square meterage and space available for our plant, boats and equipment.

Talks with our local MP: Declan Colleran MD, chats to our MP about the work we are carrying out and our plans for future.

Scaling Our Marine Fleet

INVESTING IN IMPROVEMENTS TO THE WATERWAYS

We have recently upgraded our marine fleet with the addition of a brand new Truxor and a brand new Conver Boat. They're already hard at work alongside our existing vessels, enhancing our capabilities in dredging, weed clearance, and aquatic restoration operations.

Pictured:

Truxor

Operations:

Dredging, aquatic weed clearance

Benefits:

Amphibious, lightweight, eco-friendly, versatile, cost effective

By continually upgrading our fleet, we not only enhance performance but also reduce costs and downtime linked to breakdowns, often experienced with the use of older machines. Our commitment to innovation ensures smoother operations as it enables us to deliver effective services without unnecessary interruptions.

Working Night and Day

ROUND-THE-CLOCK EFFORTS FOR SAFE OPERATIONS ON THE HIGHWAYS

Contracted to work night shifts and weekends as needed, our dedicated teams are available to our clients 24 hours, 7 days a week. Each of our operatives hold Highways England Passports, undergoes regular Safety Critical Medical checks, and possesses ROLO certification, along with all the necessary tickets relevant to their individual roles and operations. This enables us to deliver safe, effective and efficient services to our clients whilst working on the highway networks.

Tree, shrub and bulb planting on the highways

Highway vegetation clearance works using one of our Robo Flails

Flytip clearance along a council ringway.

Fencing repairs and gate installation.

Reservoir embankment grass cutting using our Roboflail

Large vegetation clearance using our Robo and finishing off with hand tools.

Nicospan fencing installation to form a new embankment for silt deposition.

Aquatic weed clearance using one of our convers and harvester,

Our aquatic tree teams using our hopper and 40ft powered work boat to complete general vegetation works.

Heavy build up of reeds cleared with our truxors.
