

Features

COOLING TECHNOLOGIES

>

NoFrost Multicooling

On the contrary with conventional technology, NoFrost MultiCooling technology includes two independent air circulation with two separate fans and evaporators. Since there is no transfer of cold air between fridge and freezer cabinets, NoFrost MultiCooling provides extra freshness with optimum humidity levels in each compartment, prevents odor mixing, and keeps flavor of foods.

Less Frost

Thanks to the wrap around evaporator, LessFrost technology offers more efficient cooling, less manual defrost requirement, and more flexible storage room.

Freezer Shield

Conventional refrigerator appliances are able to work at a minimum ambient temperature of **10°C**. However, with the new Freezer Shield Tech, appliances can work even if the ambient temperature is as low as **-15°C**, which makes it possible to place the appliances in the garage or in the balcony.

FRESHNESS TECHNOLOGIES

PureBeam+

The Purebeam+ Technology at the top of the fridge includes a UVC LED light source and a carbon filter. While the filter absorbs bad odors, UVC LED breaks down bacteria and viruses on the filter surface into harmless substances. Purebeam+ Technology effectively reduces volatile organic compounds formed by the spoilage of food in the refrigerator. The quality of the air in the refrigerator improves and is always kept clean.

Vacuum Bag

Prolongs the shelf life of foods and keeps dairy products fresh up to 8 times longer.*
Increases life of food by removing air.
Prevents the occurrence of unpleasant odours.

*Tested and certified by Third Party Laboratory.

Ferment store

FermentStore helps customers take homemade food to a new level; allowing them to join the growing trend towards fermented foodstuffs and helping them enjoy the known health benefits. As well as being tasty and appealing, fermented foods are known to be rich in probiotics which help restore balance in the stomach. In turn this aids digestion and boosts the immune system. The FermentStore feature allows users to create and store seven different types of food and beverage: yoghurt, kefir, bread dough, wine, beer, vinegar and pickles, which all can be fermented and kept with ease. After the fermentation process, the results can be chilled and stored in the optimum conditions.

Natural Ion Tech

Natural Ion Tech contains an electrically charged wire, which sends charged molecules into the air. These negative ions interact with pollutants and dust particles in the air due to an electric attraction.

By removing these particles from the air in the refrigerator, Natural Ion Tech improves air quality.

** Tested and certified by Third Party Laboratory.*

Vita Mode

Thanks to a special light source close to the natural spectrum of sunlight, VitaMod ensures that fruits and vegetables stored in the refrigerator continue their natural ripening process, thus preserving their nutritional values at higher levels.

**Tested and certified by Third Party Laboratory.*

Humidity Controlled Crisper

Thanks to air channels and special filter, humidity level can be adjusted precisely to keep your fruits and vegetables fresh and crisp.

Chill Zone

Ensures that the food inside is preserved at ideal temperature of around 0 °C. The frozen meat or fish can also be kept in this compartment for proper thawing before consuming. Chill Zone also ensures that your meat & fish stays fresh for longer while keeping out unwanted odour.

Maxi-fresh Preserver

Maxi Fresh Preserver technology helps keeping food fresh longer time by absorbing ethylene gas (a volatile organic compound released naturally from fresh foods) and unpleasant odors from the crisper.

CONVENIENCE TECHNOLOGIES

V-Lift

With the adjustable height mechanism, height of bottle shelf can be maximized for higher bottles or can be reduced to save space for the dairy shelf. Position of rack can be set to **6** different height.

V-Shelf

Provides more flexible storage room and higher shelf space thanks to the two-part shelf mechanism sliding on each other.

Door Reversible

Depending on the location of your refrigerator, you can adjust door opening direction thanks to the reversible door feature.

Zero Clearance

You can place your refrigerator next to the wall or cabinets and the door can be opened easily without need of any additional space at **90°**.

Water Dispenser

Offers quick and practical cold water access, and ergonomic use with **2** liter reservoir. Easy to replenish water

Ice Slide

Provides convenient storage spaces with a simple movement. The slide icematic ensures flexible storage and max capacity anytime you need.

Product Line-up
