▶ DIAGNOSTIC DEVICES	70-77
▶ DIGITAL OPERATING ROOM	78-79
▶ DIGITAL INTENSIVE CARE	80-81

Turnkey Operating Room Projects

Luvis Operating Light

Luvis M200

- › 120.000 Lux. Light Intensity
- › 3 Level Adjustable Color Temperature
- › Touchscreen Control Panel
- › Optional HD Camera Option

Luvis L200

- › 160.000 Lux. Light Intensity
- › 3 Level Adjustable Color Temperature
- › Touchscreen Control Panel
- › Optional HD Camera Option

re

SeaMed Operating Table

Genel Cerrahi, Üroloji, Jinekoloji, Ortopedi, Göz, Beyin Cerrahisi, KBB, Kardiyoloji vb. Birçok Operasyon Kullanımına Uygun Olarak Tasarlanmıştır.

- › Tüm Cerrahi Operasyonlar İçin Pozisyonlandırılabilir
- › El Kumandası Yardımı ile Kolay Kullanım İmkânı
- › 300 Kilograma Kadar Hasta Taşıma Kapasitesi
- › Açısı Ayarlanabilir Ayak ve Baş Bölümü
- › Opsiyonel Eklenebilir Ortopedi Traksiyon Seti

General Surgery, Urology, Gynecology, Orthopedics, Ophthalmology, Neurosurgery, ENT, Cardiology etc. It is Designed For Many Operation Uses.

- › Can Be Positioned For All Surgical Operations
- › Easy to Use With the Help Of Hand Control
- › Patient Carrying Capacity Up to 300 Kilograms
- › Angle Adjustable Foot and Head Section
- › Optional Add-On Orthopedics Traction Set

SeaMed Anesthesia Device

- Possibility of Use in Adult / Pediatric / Neonatal Patient Groups
- TFT-LCD Parameter Monitor
- Use of Double Vaporizer
- VCV, PCV, SIMV-PC, SIMV-VC, CPAP-PSV, AGCO and Manual Ventilation Modes
- Optional EtCO₂, BIS, AG, O₂ parameters

SeaMed Anesthesia and Medicine Cart

- Drug Storage Drawers In Different Sizes
- Antistatic Lockable Wheels
- Sliding Foldable Writing Board
- Central Lock System
- Dustbin With Lid

SeaMed FT-2800 Blood and Infusion Warmer

- › High Performance Double Dry Heating System
- › Micro Processor Controlled
- › Compatible With Standard Sets for Medical Fluids
- › With Heater Profile Holder
- › High Accuracy Operation to the Temperature Controller

SeaMed S8 Defibrillator Device

- › 8.4" TFT LCD Color Screen
- › Possibility of Use In Pediatric and Adult Patients
- › Energy Selection Between 1-360 Joules
- › Use up to 6 Hours With Its Battery
- › Optional SpO₂ / EtCO₂ / NIBP Features

Zerone Zeus-400 Electrocautery Device

- › Micro Processor Controlled Reliable Operation
- › Cutting, Coagulation and Bipolar Usage Modes
- › Spray and Contact Coagulation
- › Comfortable Working With Cautery Pen or Foot Pedal
- › 400 Watt Output Power
- › Optional Argon Plasma Coagulation Compatibility

Cheiron Versa Surgical Aspirator Device

- › Silent and Non-Vibration Working Opportunity in All Surgical Operations
- › Easy to Use with Foot Pedal
- › 39.4 dB Sound Level
- › Micro Biological Bacteria Filter
- › Overflow Protection System
- › Design Suitable for Continuous Working
- › Cooling with Extra Fan Against Heating

Cheiron Liposuction Aspirator Device

- › Quiet and Vibration-Free Working Opportunity in Liposuction Operations
- › Vacuum Power up to -1 Bar
- › Easy to Use with Foot Pedal
- › 39.4 dB Sound Level
- › Micro Biological Bacteria Filter
- › Overflow Protection System
- › Design Suitable for Continuous Working
- › Cooling With Extra Fan Against Heating

SeaMed Infiltration Pump

- › It Can Be Used In Liposuction Flushing Processes
- › Speed Range 0.5 - 600 rpm.
- › Minimum Power Consumption
- › Lightweight Compact Design

id

Turnkey Sterilization Systems

Hydrogen Peroxide (H₂O₂) Sterilization Device

- › Touchscreen Control Panel
- › Internal Thermal Printer
- › Production Standards: ISO 9001, ISO 13485 and ISO 14001
- › Sterilization Time: 30 Minutes

Autoclave Device

- › Compact Design For Sterilization of Packed and Unpackaged Dental, Operating Room Materials, Plastic and Glass Materials
- › Microprocessor Control System
- › Touchscreen Color Control Panel
- › 7 pcs. Ready-Made, 1 pc. Liquid, 1 pc. Drying and 50 pcs. Program Memories
- › Test Programs: Bowie & Dick and Vacuum Test

Cutting - Sealing Machine

- › Closing, Writing and Labeling to Operate at the Same Time
- › Color Touchscreen Control Panel
- › 5000 Package Production Speed Per Hour
- › Energy Saving With Sleep Mode
- › User Safety Emergency Stop Button
- › Optional Datamatrix Reader

Washing Disinfection and Drying Device

- › Touchscreen Color Control Panel
- › Number of Programmes: 50 pcs.
- › Cabin Volume: 250 lt.
- › 600 lt / min. Recirculation Pump
- › Optional Printer, Water Softening System

Turnkey Medical Oxygen Generating Systems

Medical Oxygen Generating Systems

- › Quality Standards: ISO 10083
- › Manual, Automatic and Service Mode
- › Working Technique: Filtering Under Variable Pressure (PSA)
- › Installation and Assembly Opportunity Suitable for All Hospital Conditions
- › Standard 95% Purity Output Feature

Turnkey Medical Gas Systems

Bedside Medical Gas Units

- › Oxygen, Air and Vacuum Outlets
- › Phone, Internet and Patient Call System Outputs
- › Rail Transport System: Max. 100 kg.
- › Electricity and UPS Sockets

Turnkey Stainless Steel Hospital Equipment

› Operating Theatre Cabinet

› Bonnet and Mask Cupboard

› Instrument Table

› Working Table

› Washing Sink

› Instrument Cabinet

› Mayo Table

› Medical Waste Trolley

Turnkey Radiology Systems

Digital X-Ray Device

- › Quiet Movement and Easy Operation
- › Easy Setup
- › Easy to Connect to PACS and DICOM Compatible
- › Full Control of X-Ray Generator
- › Access to 100% Digital Images in Maximum 2 Seconds

C-Arm Scopy

- › Rapid & Easy Positioning With Patient Accessibility
- › High Reliability with Full Automatic Control
- › Flexible C-Arm Movements
- › DVD/CD/USB Writer, Hard Copy Film or Printer
- › Optional DICOM Internal Interface

Automatic Injector Pump

- › Easy to Use With Wireless Connection
- › Touchscreen LCD Control Screen
- › Hand Control for Start and Stop
- › Automatic or Manual Syringe Fill Functions

Portable X-Ray Device

- › HF High Frequency and High Heat Capacity
- › Easy-to-Use Opportunity for Hospitalized Patients in Mobilized Clinics
- › Easy Driving and Effective Use
- › Manual / Automatic Control
- › Optional DICOM

Turnkey Intensive Care Projects

Neumovent Intensive Care Ventilator Device

- › Color Touchscreen TFT LCD Screen
- › Adult, Pediatric and Neonatal Using Modes
- › Tidal Volume: 5-2500 ml
- › Low Cost Maintenance Opportunity
- › Usage Modes: VCV / PCV / PSV / CPAP / SIMV (PCV) + PSV / SIMV (VCV) + PSV / MMV + PSV / PSV + VT ASSURED / APRV / NIV / TCPL / SIMV (TCPL) + PSV / CPAP + Steady flow

MdkMed IZ-15 Patient Monitor

- ECG, NIBP, RESP, PR, SpO₂, TEMP and 2xIBP Parameter
- 15" Touchscreen Color TFT LCD Display
- 3 Level Audible and Visual Alarm
- Optional Central Monitor System Connection
- Optional EtCO₂ (Capnograph) Parameter

rs

SeaMed XM-550 Patient Monitor

- ECG, NIBP, RESP, PR, SpO₂, TEMP and 2xIBP Parameter
- 10.4" or 12.1" Color TFT LCD Display
- 3 Level Audible and Visual Alarm
- Up to 6 Hours Built-in Battery
- Optional Central Monitor System Connection
- Optional EtCO₂ (Capnograph) Parameter

rs

MdkMed MI-27 Infusion Pump

- › Set Free Peristaltic Pump
- › Ability to Work with All Infusion Sets
- › Turkish User Menu
- › Microprocessor Controlled Reliable and Precise Operation
- › KVO, Bolus and Purge Functions
- › Audible and Visual Alarms
- › Connecting to HBYS With Optional Wi-Fi Support

MdkMed MS-37 Syringe Pump

- › Set Free
- › Ability to Work with All Syringe
- › Turkish User Menu
- › Automatic Syringe Recognition
- › Microprocessor Controlled Reliable and Precise Operation
- › KVO, Bolus and Purge Functions
- › Audible and Visual Alarms
- › Connecting to HBYS with optional Wi-Fi Support

Ampall PCA Pain Pump

- › Microprocessor Controlled Reliable and Precise Operation
- › Turkish User Menu
- › Saving Drug Name and Infusion Information
- › Self Test At Each Power On
- › KVO, Bolus and Purge Functions
- › Audible and Visual Alarms
- › Possibility of Use with Battery

SeaMed BN-702 Feeding Pump With Automatic Flushing

- › Color TFT LCD Screen
- › Set Free Easy to Use
- › Bolus and Purge Functions
- › Transparent Viewable Pump Cover
- › Up to 8 Hours of Use with the Internal Battery

SeaMed Capnometer Device

- › Use in Neonatal, Child and Adult Patients
- › EtCO₂ / CO₂, Ability to Monitor Respiratory Parameters
- › Graphically Monitoring EtCO₂ Parameters
- › Audible and Visual Alarms
- › Data Transfer to Computer with Optional USB Port

SeaMed PC-900B Capnograph & SpO₂ Device

- › Color TFT LCD Screen
- › Use in Neonatal, Child and Adult Patients
- › Monitoring EtCO₂, Respiratory and SpO₂ parameters
- › Graphically Monitoring EtCO₂
- › Up to 10 Hours of Battery Time
- › Audible and Visual Alarms

Insighters iS-3L Video Laryngoscope

- 3.5" Touchscreen LCD Display
- HD Image Quality
- Compatible With All Patients: Adult, Pediatric, Neonatal
- Photo and Video Recording
- Anti-fog Feature

SeaMed Intensive Care Medicine Cart

- Drug Storage Drawers in Different Sizes
- Antistatic Lockable Wheels
- Sliding Foldable Writing Board
- Central Lock System
- Dustbin With Lid

SeaMed S8 Defibrillator Device

- 8.4" TFT-LCD Color Screen
- Possibility of Use in Pediatric and Adult Patients
- Energy Selection Between 1-360 Joules
- Use up to 6 Hours With its Battery
- Optional SpO₂ / EtCO₂ / NIBP Features

Bed Pan Washing and Disinfection Device

- › Modern Technology, Ultra Hygienic Safety For Patients
- › Work Safety With Steam Tightness,
- › Multifunctional Gripper Concept
- › Drying-Cooling Process With Filtered Air
- › Internal Temperature Control Sensors

SeaMed Intensive Care Patient Bed

- › Easy to Clean Hygienic Structure
- › Special Plastic Material With UV and Sunlight Resistant Protection Layer
- › Easy Control With Hand Control
- › Battery Support Unit Against Power Cut

SeaMed Intensive Care Air Mattress

- › Patient Carrying Capacity up to 200 kg
- › Cover Washable at 90°C
- › Working in Alternative and Static Modes
- › CPR Function

Turnkey Neonatal Intensive Care Projects

Neumovent Neonatal Intensive Care Ventilator Device

- › Color Touchscreen TFT LCD Screen
- › 2ml Tidal Volume Start
- › Low Cost Maintenance Opportunity
- › Usage Modes: VCV / PCV / PSV / CPAP / SIMV (PCV) + PSV / SIMV (VCV) + PSV / MMV + PSV / PSV + VT ASSURED / APRV / NIV / TCPL / SIMV (TCPL) + PSV / CPAP + Steady Flow

SeaMed Neonatal Intensive Care Incubator

- › Microprocessor Servo Controlled, Precise and Reliable Temperature Control
- › Temperature Control: Air and Skin Usage Modes
- › Precise Humidity Control On Digital Display
- › Built-in LED Phototherapy Unit
- › Built-in Baby Scale Unit

SeaMed LED Phototherapy Device

- › Design Compatible With All Incubators
- › High Intensity LED Phototherapy
- › Adjustable Radiance Level
- › Adjustable Time Mode

SeaMed Tunnel Type Phototherapy Device

- › Touchscreen LCD Control Panel
- › In-cabin Temperature Control
- › Adjustable Luminous Intensity at Different Levels
- › Adjustable Time Mode

SeaMed Radiant Warmer

- LCD Control Panel
- Low-High Temperature Control
- Visual and Auditory Alarm Function
- X-Ray Cassette Chamber

SeaMed T Piece Resuscitator

- Easy and Practical Use
- Portable Lightweight Compact Design
- Oxygen Level Adjustable From 21% to 100%
- -10 to 80cm H₂O Traceable Manometer

Kejian KJ-8000 Bilirubinmeter Device

- › New Generation Fiber, Photoelectric and Information Processing Technology
- › Quick Result Without Disturbing the Baby
- › Easy to Read LCD Display
- › Full Battery Charge in 3 Hours With Quick Charge
- › Auto Calibration Feature

MdkMed MI-27 Infusion Pump

- › Set Free Peristaltic Pump
- › Ability to Work with All Infusion Sets
- › Turkish User Menu
- › Microprocessor Controlled Reliable and Precise Operation
- › KVO, Bolus and Purge Functions
- › Audible and Visual Alarms
- › Connecting to HBYS with optional Wi-Fi support

MdkMed MS-37 Syringe Pump

- › Set Free Structure
- › Ability to Work with All Syringe
- › Turkish User Menu
- › Automatic Syringe Recognition
- › Microprocessor Controlled Reliable and Precise Operation
- › KVO, Bolus and Purge Functions
- › Audible and Visual Alarms
- › Connecting to HBYS with optional Wi-Fi Support

Turnkey Cardiology Polyclinic

Stress ECG Test Device

- 12 Channel Simultaneous Full Recording ECG Rhythm
- Blood Pressure Measurement: Automatic and Manual
- Anti-Interference Filter Options
- Electrode Non-Contact Detection
- Advanced Analysis Technology

SeaMed H12 ECG Device

- 10" Touchscreen LCD Screen
- Automatic Arrhythmia Detection And Report
- Reporting In DICOM, BMP, JPG, PDF, SCP-ECG, FDA-XML Formats
- Connecting to the Hospital Information Management System

Edan IT20 Telemetry Device

- › Easy to Read OLED Display
- › Monitoring ECG, Respiration, SpO₂ , PR Parameters
- › 64 pcs. Devices can be Connected to the System at the Same Time
- › Nurse Call and Patient Call Functions
- › Connecting to the Central System With Wifi

SeaMed Wi-Fi Mobile Ultrasound Device

- › Possibility of Use With Phone/Tablet Computer
- › Lightweight and Compact Design
- › Color Doppler Specific
- › B, B/M, PW and PDI View
- › 128 pcs. Ceramic Piezzo With Electrical Elements

SeaMed BS6930 Rhythm Holter

- › Up to 7 Days of Recording Capacity
- › Comfortable and Lightweight Design
- › Suitable For 3/12 Channel Operation
- › SD Card Supported
- › Pacemaker Sampling

SeaMed Echo Blood Pressure Holter

- › Compact and Lightweight Design
- › Suitable For Use In All Patients
- › Long Battery Usage Due to Low Power Consumption
- › Carrying Bag and Sleeves Suitable for Use
- › Easy Analysis to Its Software

Turnkey Obstetrics and Gynecology Unit

SeaMed Star5000 Fetal Monitor

- 12.1" Color Touchscreen Foldable LCD Display
- TOCO, FHRI, FHR2 FM, Internal Thermal Printer Configurations
- Data Transfer Feature to USB Memory
- Waterproof FHR and TOCO Probes
- Connecting to Central Fetal Monitoring System

SeaMed Star5000 Maternal Fetal Monitor

- 12.1" Color Touchscreen Foldable LCD Display
- Monitoring EKG, SPO2, PR, NIBP, ISI and Respiration Parameters
- TOCO, FHRI, FHR2 FM, Internal Thermal Printer Configurations
- Ability to Transfer Data to USB Memory
- Waterproof FHR and TOCO Probes
- Connection to the Central Fetal Monitor System

Seamed T12 Wireless Fetal Monitor

- 12.1" Color LCD Foldable Screen
- TOCO, FHRI, FM, Internal Thermal Printer Configurations
- Wireless FHR, TOCO Probes
- Waterproof FHR and TOCO Probes

Optomic OP-C5 Binocular Colposcopy Device

- › Possibility to Use With Tilted Stereoscopic Head and Straight Binoculars
- › Halogen, Xenon or LED Light Source
- › High Lighting Intensity to Fiberoptic Cable
- › Rubber Eye Protection on Both Eyes
- › Magnification Range: 2.5x-27x

SeaMed KN-2200I (HD) Colposcopy Device

- › Configured Interface and Software for 175 Kinds of Cases
- › Video Recording, Image Freezing, Editing, Sectioning, Report Output and Storage
- › Image Enlargement, Reduction, Marking, Regional Enlargement
- › Report Editing, Printing, Ready Templates, Diagnostic Reporting, RGB Image Printing

SeaMed KS-Q5N Examination Lamp

- Gradual Light Adjustment With Dimmer
- 5 Wheel With Brake System
- 1x LED Light Source
- Adjustable Lighting Field Diameter

SeaMed KS-Q7 Examination Lamp

- 7 LED Lighting
- 5 Wheel With Brake System
- 5 Levels of Brightness Control
- Head that can be Moved 320°

SeaMed Gynecological Delivery Bed

- › Control With 3 DC Motors
- › Lithotomy, Cardiac and Bed Positions
- › Fixed Floor Surface With Artificial Leather Covering Consisting of 3 Parts.
- › Easy to Use With Hand Control
- › Metal Parts Are Electrostatic Powder Coated

Seamed Gynecological Examination Table

- › Manufacture From Completely Steel Construction
- › 2 Motorized Back Adjustment, 1 Motorized Height Adjustment
- › Height and Back Adjustment With Remote Control
- › Lying Surface Made of Artificial Leather
- › Electrostatic Powder Paint Coating

SeaMed Wi-Fi Convex Mobile Ultrasound Device

- Possibility of Use With Phone/Tablet Computer
- Lightweight and Compact Design
- Color Doppler Feature
- B, B/M, PW and PDI Imaging

SonoScape Ultrasound Device

- Color Touchscreen LCD Screen
- Super Wide Bandwidth Platform
- High Resolution Display
- 4D Diagnostic Technology

Dr.Oppel ST-501 Radiofrequency Electrocautery Device

- Precise Cutting and Coagulation with 4 Mhz Radio Frequency
- Minimal Damage to Peripheral Tissues
- Time Selection: Continuous, 1sec, 1/2sec, 1/4sec, 1/8sec
- Monopolar Operating Power: 130 W
- Bipolar Operating Power: 90 W

SeaMed Fetal Doppler

- Handheld Compact and Lightweight Design
- Real Time Fetal Pulse Detection
- Large Backlit LCD Display
- High Sensitivity 2 MHz Ultrasound Probe
- With Battery Charge Indicator

SeaMed Water Birth Pool

- High Durable and Healthy Material in 6P-PVC Quality
- 6 pcs. Handles
- Internal Water and Air Pump
- Suitable for Professional Use

Turnkey Emergency Service Unit

SeaMed Capnometer Device

- › Use in Neonatal, Child and Adult Patients
- › EtCO₂ / CO₂, Ability to Monitor Respiratory Parameters
- › Graphically Monitoring EtCO₂ Parameters
- › Audible and Visual Alarms
- › Data Transfer to Computer with Optional USB Port

SeaMed NC-5 Vital Monitor

- › 8" Color Touchscreen TFT LCD Display
- › Monitoring ECG, SpO₂, PR, NIBP, Respiratory and Skin Temperature Parameters
- › Thermometer Usage Opportunity
- › Neonatal/Pediatric/Adult Use Modes
- › Carrying Stand with Wheels and Baskets
- › Ability to Transfer Wired or Wireless Data

SeaMed PC-g00B Capnograph & SpO₂ Device

- › Color TFT LCD Screen
- › Use in Neonatal, Child and Adult Patients
- › Monitoring EtCO₂, Respiratory and SpO₂ Parameters
- › Graphically Monitoring EtCO₂
- › Up to 10 Hours of Battery Time
- › Audible and Visual Alarms

SeaMed H12 ECG Device

- 10" Touchscreen LCD Screen
- Automatic Arrhythmia Detection and Report
- Reporting in DICOM, BMP, JPG, PDF, SCP-ECG, FDA-XML Formats
- Connecting to the Hospital Information Management System

SeaMed S8 Defibrillator Device

- 8.4" TFT-LCD Color Screen
- Possibility of Use in Pediatric and Adult Patients
- Energy Selection Between 1-360 Joules
- Use up to 6 Hours With its Battery
- Optional SpO₂ / EtCO₂ / NIBP Features

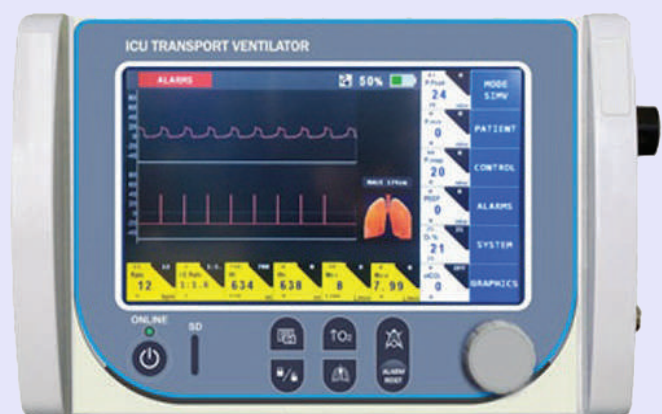

IISM Vein Imaging Device

- › Color Touchscreen LCD Display
- › Non-invasive Infrared Technology
- › Possibility of Use With Internal Battery
- › Automatic Brightness Adjustment

Transport Ventilator Device

- › Color Touchscreen LCD Display
- › Suitable For Use In Adult and Pediatric Patients
- › Use With Internal Battery
- › 21%-100% Oxygen Adjustment

Emergency Stretcher

- › Adjustable Height, Trendelenburg Positions
- › 2 pcs. Metal Lockable, Concealable Side Rails
- › Plastic Protective Crash Bumpers
- › Electrostatic Powder Paint
- › Liquid Proof Mattress

Crash Cart

- › Stainless Metal Body
- › 3 pcs. Small, 1 pc. Medium and 1 pc. Large Drawers
- › The Inside of the Drawers is Optionally Adjustable
- › Defibrillator/Monitor Stand
- › Resuscitation (Cpr) Board
- › Lockable Wheels

SeaMed Laryngoscope

- › Reliable Use in Patients
- › Maxilite Fiberoptic System
- › Easy Bulb and Battery Change
- › Autoclavable Blades at 134°C Temperature
- › Miller-Macintosh Blades
- › Optional Handle Charger
- › Stainless Steel Structure

SeaMed Otoscope-Ophthalmoscope

- › Possibility of Use With a Spiral Cable of 4 Meters
- › Adjusting the Intensity of Light on the Handsets
- › Ability to Use Both Hands at the Same Time
- › With Speculum Box for Otoscope

Turnkey Pulmonary Medicine Department

MeHow LA-104 Console Type Spirometer Device

- › Faster Measurement with Dual Processors
- › Color Touchscreen LCD Display
- › Internal Battery and Printer Support
- › Connection with USB Support

MeHow LA-204 Hand Held Spirometer Device

- › Accurate Measurement With Digital Turbine Sensor
- › Color LCD Monitoring Screen
- › Ability to Connect to Phone via Bluetooth
- › Rechargeable Lithium Battery
- › 0-16 L/S Flow Scale

MeHow LA-303 Spirometer Device

- › Accurate Measurement with Digital Turbine Sensor
- › Ability to Connect to Computer Via USB
- › Use in Adult and Pediatric Patients
- › 0-16 L/S Flow Scale

Cheiron Thorax Drainage Device

- Quiet and Vibration-Free Operation Opportunity in Thorax Drainage Procedures
- Use With Dual Thorax Regulator
- Intermittent Shooting 6 Times a Minute
- 39.4 dB Sound Level
- Microbiological Bacteria Filter
- Overflow Protection System
- Design Suitable for Continuous Operation
- Cooling With Extra Fan Against Heating

SeaMed H12 ECG Device

- 10" Touchscreen LCD Screen
- Automatic Arrhythmia Detection and Report
- Reporting in DICOM, BMP, JPG, PDF, SCP-ECG, FDA-XML Formats
- Connecting to The Hospital Information Management System

Turnkey Dental Clinic

Dental Unit

- Synchronized Movement of Backrest and Footrest Without Disturbing the Patient
- Shock Absorber System With 24 V DC Motors
- Automatic Stop Button on Under the Seat and Assistant's Arm in Emergency Situations
- Wide Table Where the Doctor Can Work Comfortably
- Pneumatic Brake System Offering Ease of Working to the Physician
- Seat Mounted 90° Rotating Autoclavable Glass Bowl Cresau
- Timed And Autoclavable Cup Filler And Dish Washer
- Cold Light Near Natural Daylight
- Water and Disinfectant Tank

Panoramic Dental X-Ray

- Auto Focus Technology
- Panoramic / 3D / Cephalometric (Optional) System
- 12 pcs. Different Shooting Modes
- Panoramic Shooting Modes
 - Standard / Right / Front / Left
 - Bitewing Standard / Right / Front / Left
 - Orthogonal Standard / Right / Front / Left
- Special Shooting Modes
 - TMJ LAT (On-Off) / Sine PA
 - TMJ PA (On-Off) / Sine LAT (Optional)

Turnkey ENT Polyclinic

ENT Examination Unit

- Full HD Endoskopik Kamera
- Dahili Aspiratör Sistemi
- Farklı Boylarda Malzeme Çekmeceleri
- LCD Kontrol Paneli

- Full HD Endoscopic Camera
- Internal Aspirator System
- Material Drawers in Different Sizes
- LCD Control Panel

Dr.Oppel ST-501 Radiofrequency Electrocautery Device

- Precise Cutting and Coagulation with 4 Mhz Radio Frequency Current
- Minimal Damage to Peripheral Tissues
- Time Selection: Continuous, 1sec, 1/2sec, 1/4sec, 1/8sec
- Monopolar Operating Power: 130 W
- Bipolar Operating Power: 90 W

SeaMed Wall Mounted Otoscope

- UV - Free Lighting
- Pneumatic Ear Testing Facility
- Light Intensity Adjustment Via Handle
- 4 Parts Speculum Box

High Frequency Audiometer

- Air Conduction, Bone Conduction, Free Field and Speech Audiometry Tests
- Pure Tone, Pulse Tone, Warble Tone, Narrowband, White and Speech Noise
- Up to 20000Hz Loud Sound Option
- Speech Tests From SD Memory Card, CD or Microphone

Multi Frequency Tympanometer

- Tympanogram and Test Results Display on the LCD Screen
- Fast and Quiet Thermal Printer
- Pure Sound and Noise Signal in Ipsi and Contralateral Reflex Tests
- Adjustable Pressure Range and Pressure Speed
- Multi-Frequency Probe

Neonatal Hearing Screening Device

- Fast and Automatic ABR imaging
- Automatic Impedance Adjustment With Direct Skin Contact
- Functional Data Output and Monitoring
- Warning Volume 35 dB NHL
- Data Transfer Facility to USB Connection

Turnkey Patient Service Rooms

SeaMed NC-5 Vital Monitor

- 8" Color Touchscreen TFT LCD Display
- Monitoring ECG, SpO₂, PR, NIBP, Respiratory and Skin Temperature Parameters
- Thermometer Usage Opportunity
- Neonatal/Pediatric/Adult Use Modes
- Trolley With Wheels and Basket
- Ability to Transfer Wired or Wireless Data

SeaMed XM-550 Patient Monitor

- ECG, NIBP, RESP, PR, SpO₂, TEMP and 2xIBP Parameters
- 10.4" or 12.1" Color TFT LCD Display
- 3 Level Audible and Visual Alarm
- Up to 6 Hours Built-in Battery
- Optional Central Monitoring System Connection
- Optional EtCO₂ (Capnograph) Parameter

SeaMed H12 ECG Device

- › 10" Touchscreen LCD Screen
- › Automatic Arrhythmia Detection and Report
- › Reporting in DICOM, BMP, JPG, PDF, SCP-ECG, FDA-XML Formats
- › Connecting to the Hospital Information Management System

SeaMed S8 Defibrillator Device

- › 8.4" TFT-LCD Color Screen
- › Possibility of Use in Pediatric and Adult Patients
- › Energy Selection Between 1-360 Joules
- › Use up to 6 Hours With its Battery
- › Optional SpO₂ / EtCO₂ / NIBP Features

Crash Cart

- › Stainless Metal Body
- › 3 pcs. Small, 1 pc. Medium and 1 pc. Large Drawers
- › The Inside of The Drawers is Optionally Adjustable.
- › Defibrillator/Monitor Stand
- › Resuscitation (Cpr) Board
- › Lockable Wheels

SeaMed Patient Bed

- › Easy to Clean Hygienic Texture
- › Special Plastic Material With UV and Sunlight Resistant Protection Layer
- › Easy to Control With Remote Control
- › Battery Support Unit Against Power Failure

Diagnostic Devices

Covidien Handheld Pulseoximeter

- › Color TFT LCD Display
- › Use in Adult, Pediatric, Neonatal Patients
- › Fast and Reliable Measurement
- › Audible and Visual Alarms
- › Use With Built-in Battery

Covidien Console Type Pulseoximeter

- › Color TFT LCD Display
- › Use in Adult, Pediatric, Neonatal Patients
- › Fast and Reliable Measurement
- › Audible and Visual Alarms
- › Use with Built-in Battery

SeaMed SP20 Handheld Pulseoximeter

- › Color TFT LCD Display
- › Use in Adult, Pediatric, Neonatal Patients
- › Fast and Reliable Measurement
- › Audible and Visual Alarms
- › Different Screen Display Modes
- › Up to 18 Hours of Battery Use
- › Optional Ear Thermometer

SeaMed Pediatric Finger Type Pulseoximeter

- › Accurate Measurement of SpO₂ and Pulse Rate Values
- › SpO₂, Pulse Rate, PI, Heart Rate and Plethysmogram Display on Color Screen
- › 4 pcs. Different Screen Display Modes
- › Automatic Start of Measurement After Placement on Finger
- › Automatic Signal Off After 4 Seconds No Signal
- › More than 30 Hours of Continuous Working Time With 2 pcs. AAA Batteries
- › Visual and Audible Alarms

SeaMed Adult Finger Type Pulseoximeter

- › Color OLED Display
- › Fast and Reliable Measurement
- › Audible and Visual Alarms
- › 4 pcs. Different Screen Display Modes
- › Auto Power On/Off
- › Opportunity to Work up to 50 Hours

SeaMed Wall-Mounted Sphygmomanometer

- Easily Readable Display Screen
- 0-300 mmHg Measurement Scale
- Easy Mounting Apparatus With Top Slide and Plug-in Type
- Spiral Hose That can be Extended up to 3 Meters
- Mercury Free Healthy Design

SeaMed Pediatric Sphygmomanometer

- Nickel Coating and Chrome Coating Manometer Chamber
- 0-300 mmHg Measurement Scale
- Easily Inflated, Flexible Cuff
- Safe, Fixed Air Cock Screw

SeaMed Adult Sphygmomanometer

- Nickel Coating and Chrome Coating Manometer Chamber
- 0-300 mmHg Measurement Scale
- Easily Inflated, Flexible Cuff
- Safe, Fixed Air Cock Screw

SeaMed Pediatric Stethoscope

- › Head Made of Stainless Steel
- › Extra Large Bell for Frequency Response
- › Ultra Sensitive Diaphragm for Clear High Frequency Response
- › Superior Easy of Use and Acoustic Gasket
- › PVC Ear Mushrooms

SeaMed Adult Stethoscope

- › Head Made of Stainless Steel
- › Extra Large Bell for Frequency Response
- › Ultra Sensitive Diaphragm for Clear High Frequency Response
- › Superior Easy of Use and Acoustic Gasket
- › PVC Ear Mushrooms

SeaMed Neonatal (Miller) Laryngoscope

- › Reliable Use in Patients
- › Maxilite Fiberoptic System
- › Easy to Change For Bulb and Battery
- › Autoclavable Blades at 134°C Temperature
- › Optional Handle Charger
- › Stainless Steel

SeaMed Adult (Macintosh) Laryngoscope

- › Reliable Use in Patients
- › Maxilite Fiberoptic System
- › Easy to Change For Bulb and Battery
- › Autoclavable Blades at 134°C Temperature
- › Optional Handle Charger
- › Stainless Steel

SeaMed Difficult Intubation (McCoy) Laryngoscope

- › Reliable Use in Patients
- › 70° Flexible Blade Tip
- › Maxilite Fiberoptic System
- › Easy to Change For Bulb and Battery
- › Autoclavable Blades at 134°C Temperature
- › Optional Handle Charger
- › Stainless Steel

SeaMed Wall Mounted Ophthalmoscope

- UV - Free Lighting
- Eliminated Corneal and Iris Reflections
- Possibility of 6 pcs. Different Views With Pairs
- Star Coordinate System, Great-Small Circle, Half Circle, Grid, Stenopaic Slit
- 3 pcs. Different Light Modes (White, Blue, Green)
- Ability to Adjust the Light Intensity Via the Handle

SeaMed Wall Mounted Otoscope

- UV - Free Lighting
- Pneumatic Ear Testing Facility
- Light Intensity Adjustment Via Handle
- 4 Parts Speculum Box

SeaMed Diagnostic Set

- Light Adjustable Handle
- Use with C Size Battery
- In the set;
 - 1 pc. Otoscope
 - 1 pc. Ophthalmoscope
 - 2 pcs. Laryngeal Mirrors (Sizes 3 and 4)
 - 3 pcs. Ear Speculum (2.5 / 3.5 / 4.5 mm Sizes)
 - 1 pc. Light Holder (For Laryngeal Mirrors)
 - 1 pc. Nasal Speculum (Reusable)

SeaMed Speculum

- PVC Material Does Not Show Any Allergic Reactions
- A Burr-Free and Smooth Structure
- Does Not Block Obstruct Clear View
- Disposable
- Blackness that Reduces Light Loss
- 2.5 mm and 4 mm Diameter

Digital Operating Room Information Management System

Operating Room Information Management System is a new generation digital clinical information system platform that enables healthcare professionals to access and follow patient files from their own dashboards after individual authorization and to monitor information such as warning notes, allergies, chronic diseases. By adding diagnostic codes such as ICD 10, they can access data such as blood group, age, gender, patient relatives, location and length of stay and verify their information using wireless technologies such as QR code, barcode, RF-ID and NFC.

This WEB-based system can be integrated with HBYS (Hospital Information Management System) systems and all medical devices that can transfer data at the patient's location. The system constantly receives up-to-date patient data from these devices. It ensures that all paper forms in the patient location are transferred to digital media via tablet computers.

Operation History, Dose Period, Fluid Period, Bolus and method-based drug administration records can be monitored on the system. Anesthesia Drug set definition and application processes, event - discovery - observation - intervention follow-ups, ventilator set identification and applications and the entire operation process are recorded instantly in the digital environment. Thanks to the step-by-step registration entry infrastructure, mandatory forms such as secure surgical forms and anesthesia follow-up forms are easily recorded in the digital environment.

All parameters and events are recorded in the correct order by adding time stamps on the integrated devices. If the patient leaves the operating room with the devices connected to the system, this information is also stored in the system. With the HIMS integration, patient demographic information is obtained and the patient's current laboratory data can be displayed graphically and numerically.

Thanks to the clinical photographing feature, active process-based records can be tagged, notes can be added to these tags, and relevant users can comment on these notes.

Digital Intensive Care Information Management System

The Intensive Care Information Management System (YBBYS) enables the electronic recording of the medical processes of the patients who are followed up and treated in the intensive care units (ICUs) of the hospitals, accessing the data of the patient (blood type, age, gender, patient relatives, location and length of stay). It aims to provide treatment processes through the system, to monitor medical parameters, to calculate intensive care-specific medical scores (Glaskow Coma Scale - GKS, Apache II, SOFA, SAPS, Sedation, etc.) and to report the results, to create reporting and quality measurement tools. Although the Intensive Care Information Management System is a web-based system, it works in integration with the Hospital Information Management System and all devices that can transfer data at the patient's location. The system constantly receives up-to-date patient data from the devices. It ensures that all paper forms in the patient location are transferred to digital media via tablet computers.

It allows intensive care healthcare personnel to transfer their patients to each other during shift changes, to follow the orders given by the doctors in charge on the active order screen, and to easily implement these orders at the right time.

From the order set explanation menu of the system, all related order types such as routine applications, nutrition, activity-care medicine and laboratory can be saved as a set. It can be calculating and the screen can be viewed with graphical and digital visual infrastructures such as Apache 2, Sofa or Glasgow.

Thanks to the user-friendly reporting menu, instant and daily reports can be easily accessed in the digital environment. Thanks to the clinical photographing feature, active procedure-based records can be tagged and notes can be added to these tags.
