BUILT IN OVENS

This is the trend in the modern kitchen: Built-in ovens and closed hobs. With our products you can combine to your heart's content. Our ovens are particularly appealing due to their high level of comfort. All our appliances are finished in black enamel making them especially easy to clean. The double-glazed safety glass is also easy to clean and keeps the oven door cool on the outside. In addition, some ovens are fitted with side rails and can be upgraded to accommodate up to four telescopic slide-outs.

GENERAL FEATURES OF OVENS

Wire-Shelves Preventing Scratch of Oven Enamel

Right and left shelves are more usable and protectable than embossed ones. They prevent the scratch on enamel, when you place or take of the trays.

Slow and Soft Close Door

With the help of soft close system, you can prevent glass breakage in your ovens due to fast closing.

Wide Color and Decoration Options

Built-in ovens have 8 different color options from anthracite to yellow, bordeaux to blue, so our built in ovens are fit well on all colour kitchens. In addition, the stainless inox decorations on the panels and doors of the products change the atmosphere of product.

Traditional Commentary on Stylish Kitchens

Antique appearance rustic products of our product range provide retro feelings to stylish kitchens.

Child Safety

Owing to the lock key on the control panel, you can provide child safety.

Cold Glass Feature

The two and three glazed oven doors prevent heating of the oven door during cooking. In this case, a possible hand burn is prevented.

Failure Notification Panel

Owing to this function, any malfunction or fault on the oven is notified to the user. In this view, large breakdowns and large accidents can be avoided.

Owing to Thermic Flow, amazing flavor spreads to all over food

Thanks to the thermic flow in our ovens, all the air in the oven is distributed in equal amounts. Because of this feature, every point of your meal is cooked at the same rate, which makes your food more delicious.

Auto Cooling

The cooling fan in the oven is automatically switched on after the cooking process is done. This feature protects kitchen cabinets and electronic appliances which are near the oven, in terms of the possible damage of hot oven.

Meat Probe

Owing to this feature, your meats will be better cooked both inside and surface. There is no way to not to be well and equal cooked.

Heat Holding-Defrosting Feature

Thanks to the heat holding feature, the oven automatically keeps its internal temperature at 80 degrees after cooking your food. Therefore, your meals will stay hot. Thanks to the automatic defrosting function, you can defrost your frozen products easily and quickly without using radiation devices such as microwave ovens.

Extra Drawer in your kitchen

Thanks to the drawer in the solo ovens, you will have an extra cabinet for the kitchen utensils.

GENERAL FEATURES OF OVENS

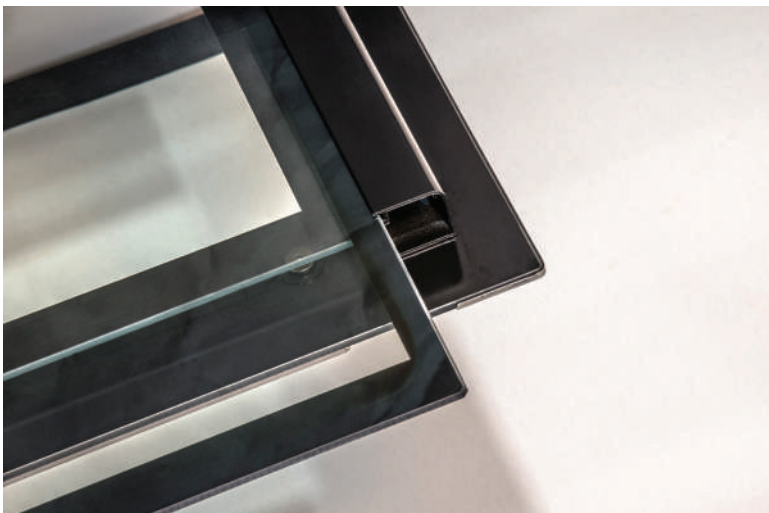

Telescopic Rail

Owing to the telescopic rails, you can control the food cooked in your oven more easily. You can take the trays out to check your food easily. In addition, after cooking, you can easily remove and clean the telescopic rails.

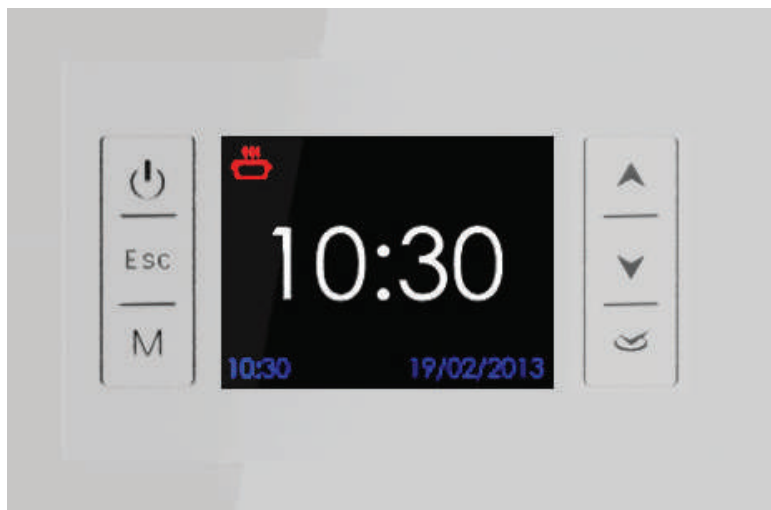

Determine the time of cooking with Timing Feature

With the programmable digital timers, you can determine the cooking time and cook time of your food. All you have to do is prepare your meal and place it in the oven and schedule the time and cooking time from the digital timer.

Easy Removable And Cleanable Inside Door Glass

Owing to the Self-Cleaning mode, the structure of the oven can be easily cleaned. However, oven windows can not be cleaned by using this method. Especially, in the grilled or oily meals, the oven windows are very polluted. However, the easy removable oven interior door glass is very easy to clean.

Your Kitchen Assistant; Colourful TFT Screen

Thanks to 10 different food menus which are recorded on the color TFT screen, cooking will be easier.

Elegant Design Handle

Stylish design handles on the oven door make your oven more elegant than the classic colored handles and metal handles.

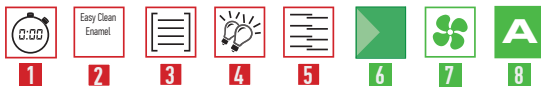

You do not have to spend too much time for cleaning - Easy Cleaning

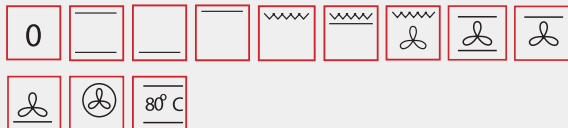

The enamel used in the inner surface of the our ovens is a structure that can not easily hold food residues and oils. In this respect, cleaning the inside of the ovens is quite easy. In addition, you will not have to clean the oven enamel for hours because with a few methods you will follow after you have cooked, cleaning will be so easy. After cooking, you remove all the utensils in the oven, select the top and base positions of the oven functions, and bring the oven interior temperature to 250 degrees and start the oven for 45 minutes. All food residues are poured into the bottom of the oven. The only thing left to you is throwing the ashes out of the oven. In this way, you will not have to clean your oven with chemical cleaners containing carcinogenic substances.
