GRP/FRP PIPE INSTALLATION

ENGINEERING AND CONSULTANCY

ABOUT US ABOUT GRP/FRP

Euphoria®

Glass Reinforced Polyester / Fiberglass Reinforced Polyester
Pipe Technology

Fiberglass pipe is a composite material system produced from glass fiber reinforcements, thermosetting plastic resins and additives. By selecting the right combination and amount of materials the designer can create a product to meet the most demanding requirements.

Still proper design and installation processes are crucial for the long lifetime of the GRP/FRP Pipes which is at least 50 years. In this regard, we are aiming to help our customers get the maximum performance from the product.

WHAT WE DO

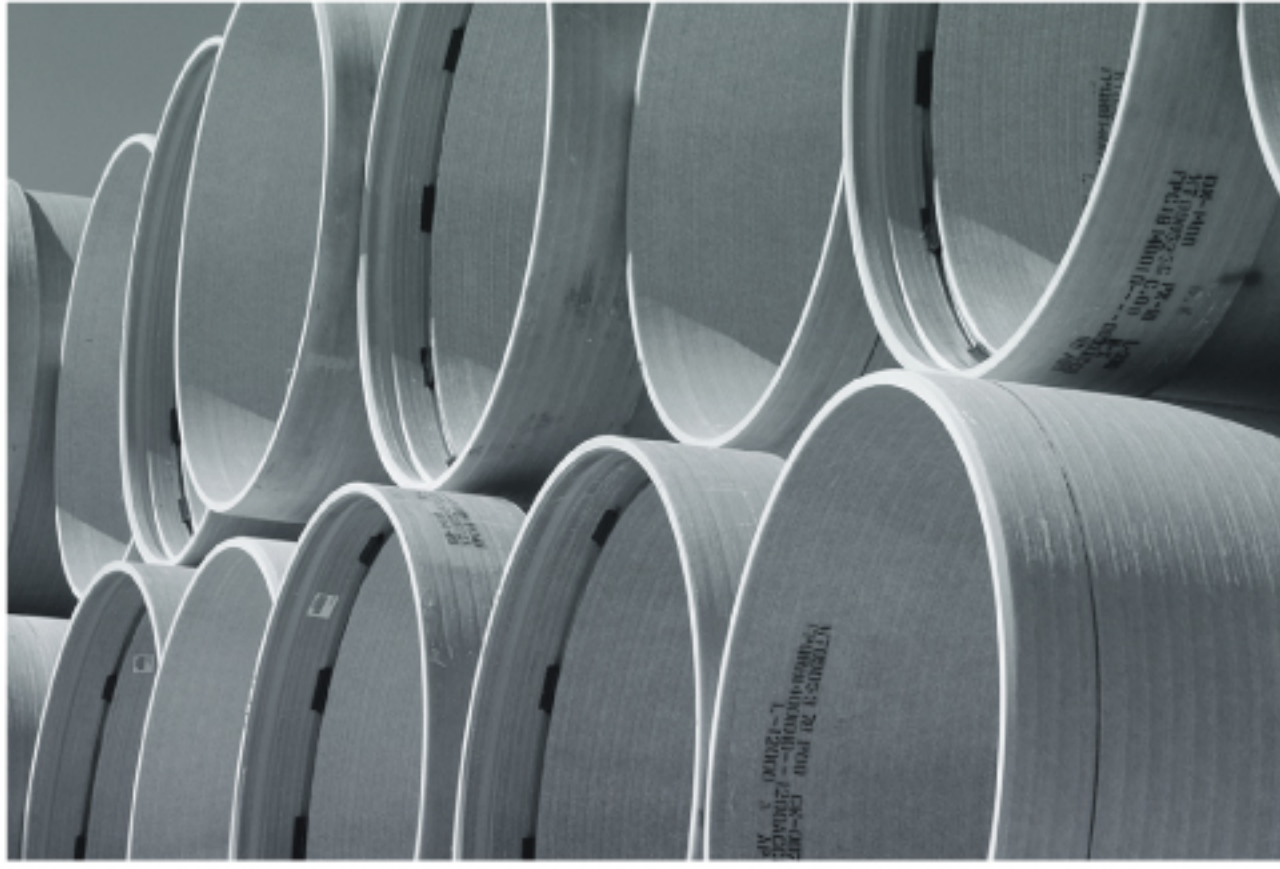

GRP/FRP Pipe Installation

GRP/FRP Fitting Production

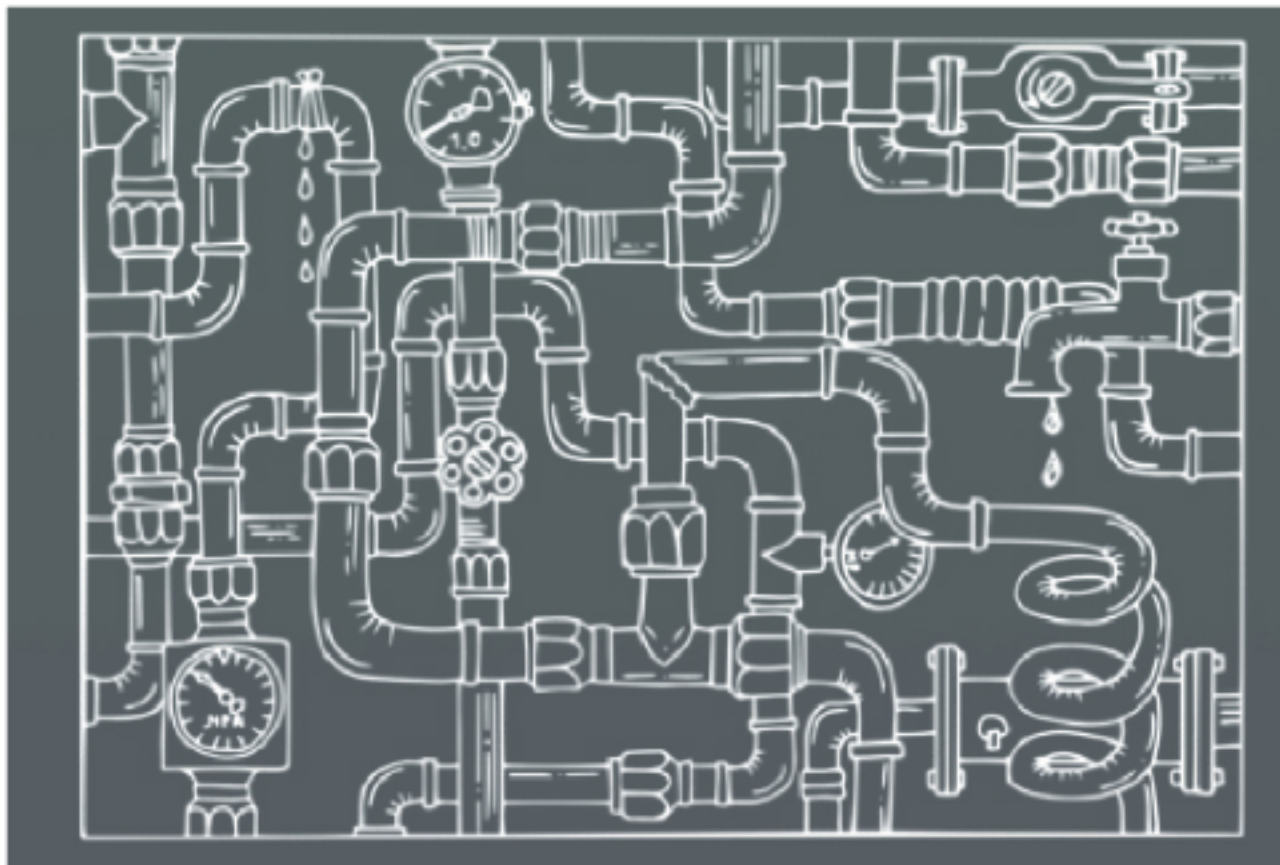

GRP/FRP Lamination(Butt-Wrap)

GRP/FRP Pipe Supply

Pipeline Repairing and Rehabilitation

Hydraulic Calculations

GRP/FRP Pipeline Design

GRP/FRP Technical Consultancy

GRP/FRP Tank and Manholes

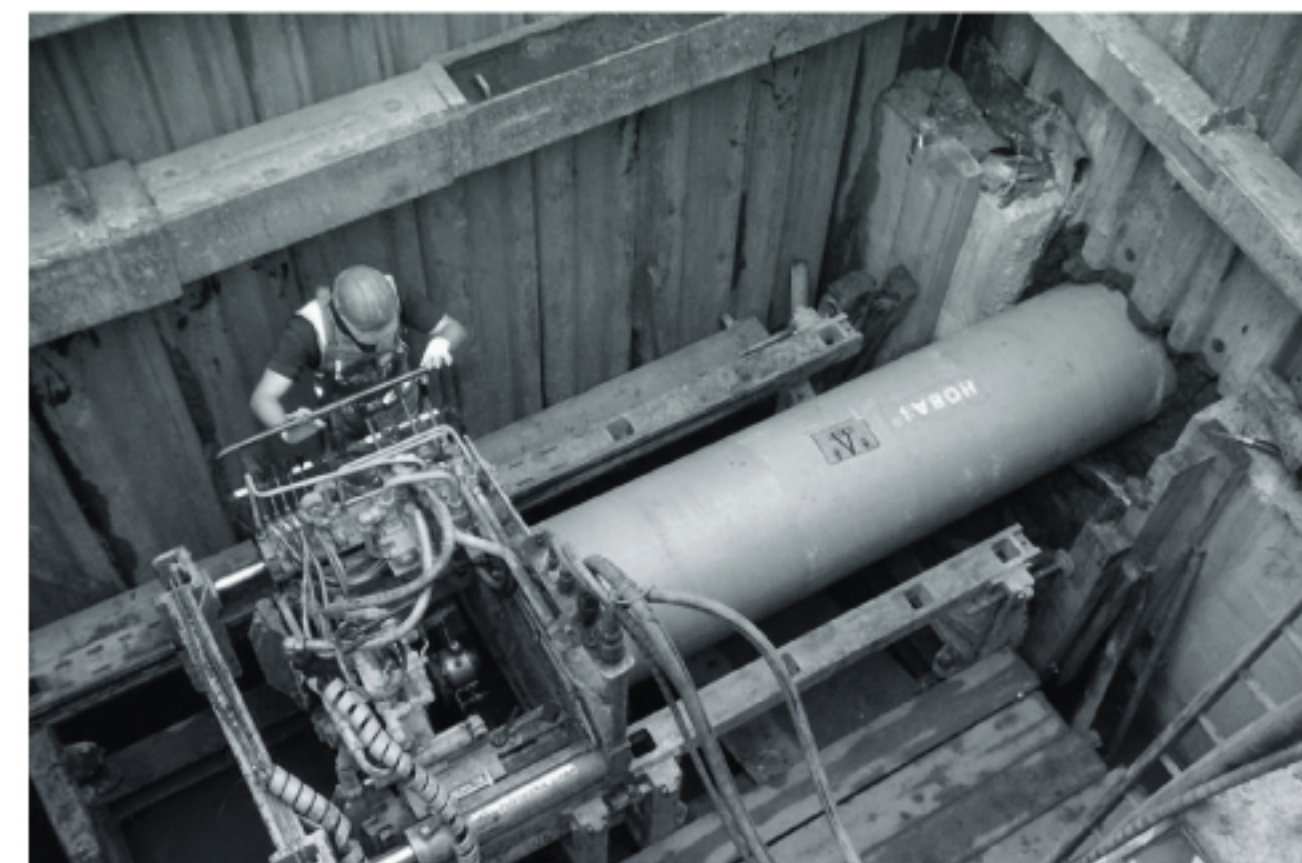

GRP/FRP Sub-Marine Applications

Raw Materials Supply

International Project Financing

Jacking Pipe / Slip-Lining
