

Built-in Ovens

ALL FEATURES

▶ Panel Types

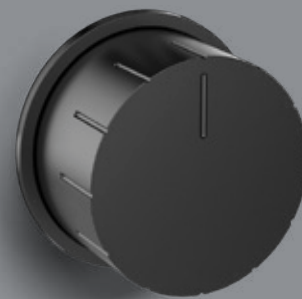

Standart Knob Control

- Oven function and temperature is set via knobs
- Control serigraphy is on the panel.

Large Pop-Up Knob Control

The 43 mm big pop-up Knobs pop up when you need them and can be retracted so you can clean the front of your oven quickly and easily, providing an excellent user experience combined with superior design and aesthetic appearance.

Small Pop-Up Knob Control

The 33 mm small pop-up Knobs pop up when you need them and can be retracted so you can clean the front of your oven quickly and easily, providing an excellent user experience combined with superior design and aesthetic appearance.

Digital Timer

- Clock setting
- Manual operation
- Alarm timer
- Change the alarm tone
- Cancel the alarm timer
- Cooking timer
- Delayed cooking timer

Mechanical Timer

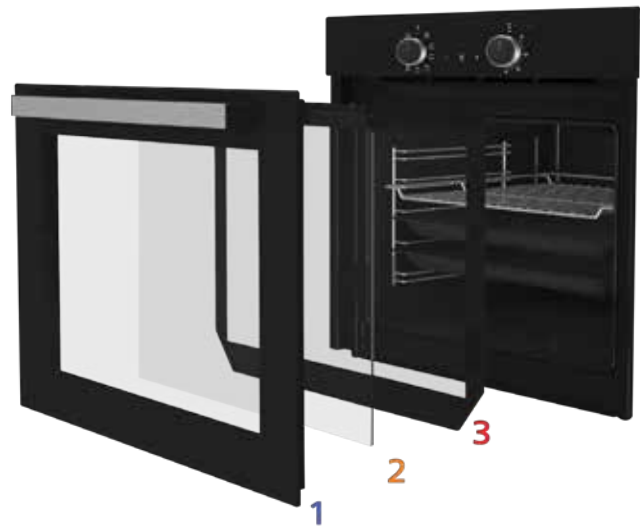

- Knob Control Unit with Mechanical Timer
- Timer with audible alarm

Analog Timer

- Knob Control Unit with Analog Timer
- Displays the day's time
- Timer with audible alarm

► Oven Door

Triple Glass Oven Door

Easy Removable Inner Glass

40 mm Door Thickness

With our 40mm door thickness we offer more solid design & provide an elegant appearance.

Two-Step Door

► Cavity

86^{lt}

XXL Oven Capacity

With a maximum capacity of 86 liters, our oven's XXL cavity offers more space for big meals, enhancing your cooking experience.

Removable Side Racks

Telescopic Rail

Central positioned Lamp

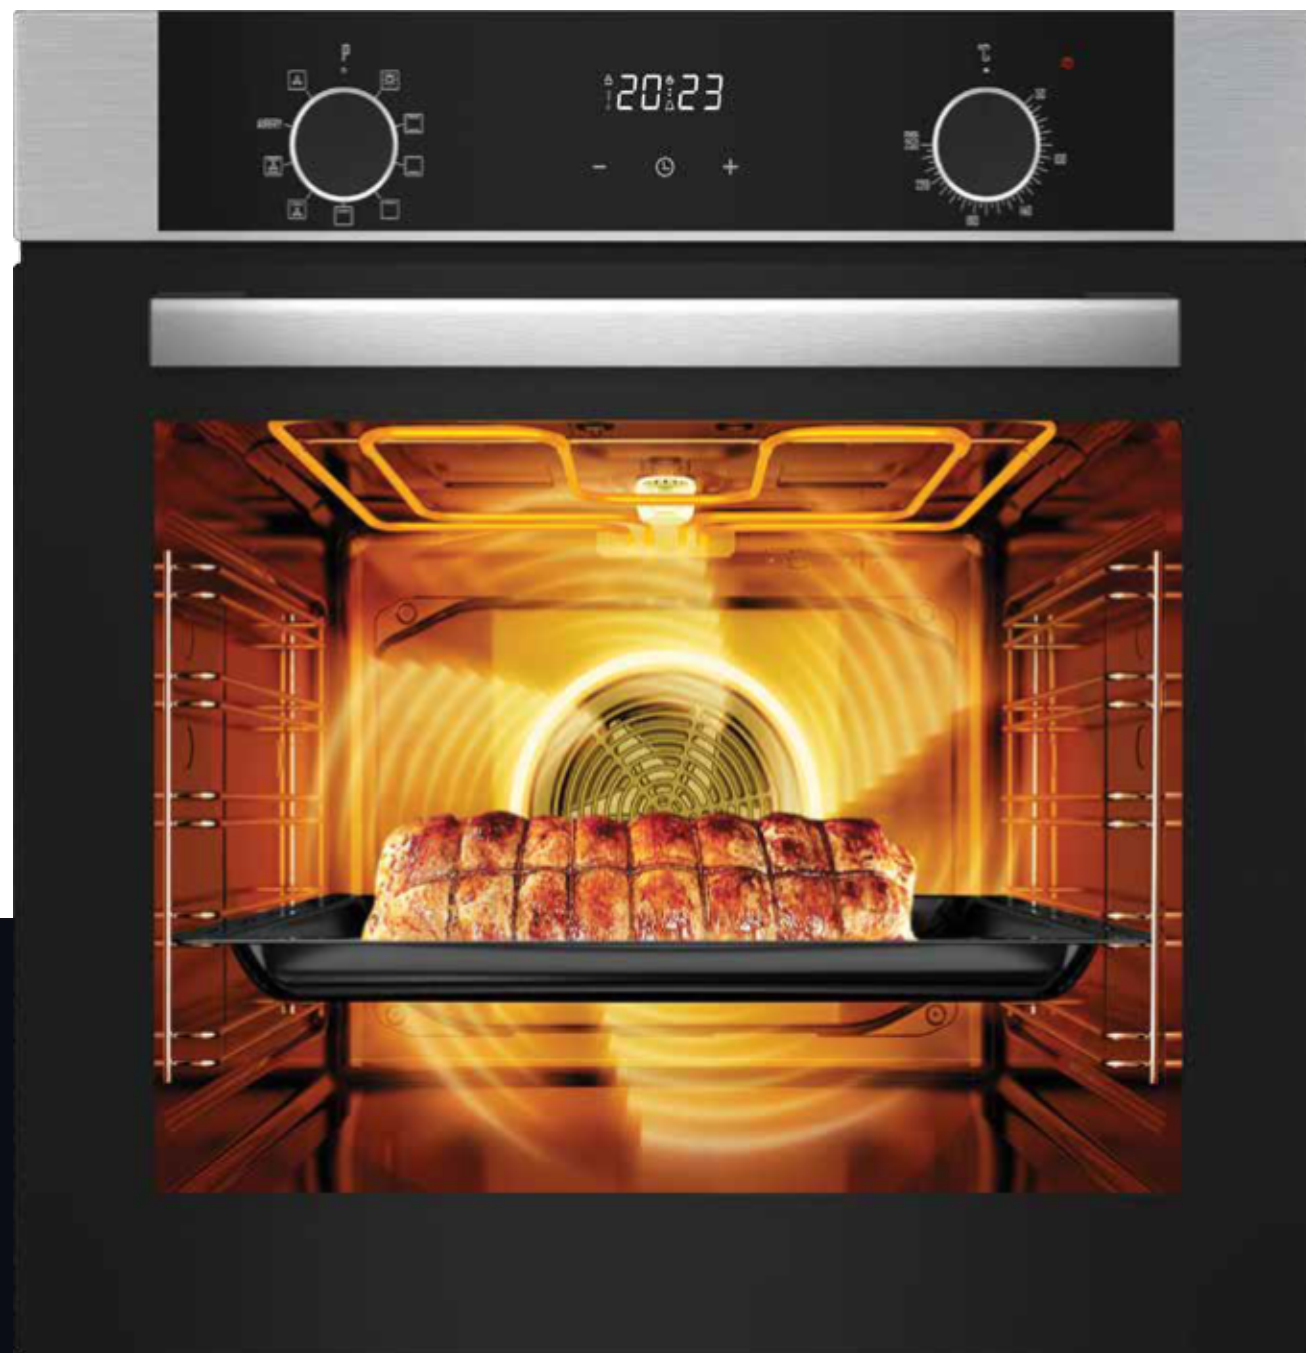

5 Level Shelf System

6 cm Deep Tray

► Cooking Functions

Cycle Pro Technology

Experience the unique performance and efficiency of Cycle Pro Technology: our 1600 RPM fan system provides fast, even heat distribution that reaches every corner of the oven.

Turbo Fan

The air heated by the lower and upper heaters is evenly distributed inside the oven with the help of the fan and a more effective heating occurs.

Static

The upper and lower resistances are activated at the same time. It ensures that both sides of the food are cooked evenly.

Grill

The inner and outer parts of the upper resistance are activated at the same time. It is the ideal cooking method for grilled foods such as meat and chicken.

Bigger Grill Area

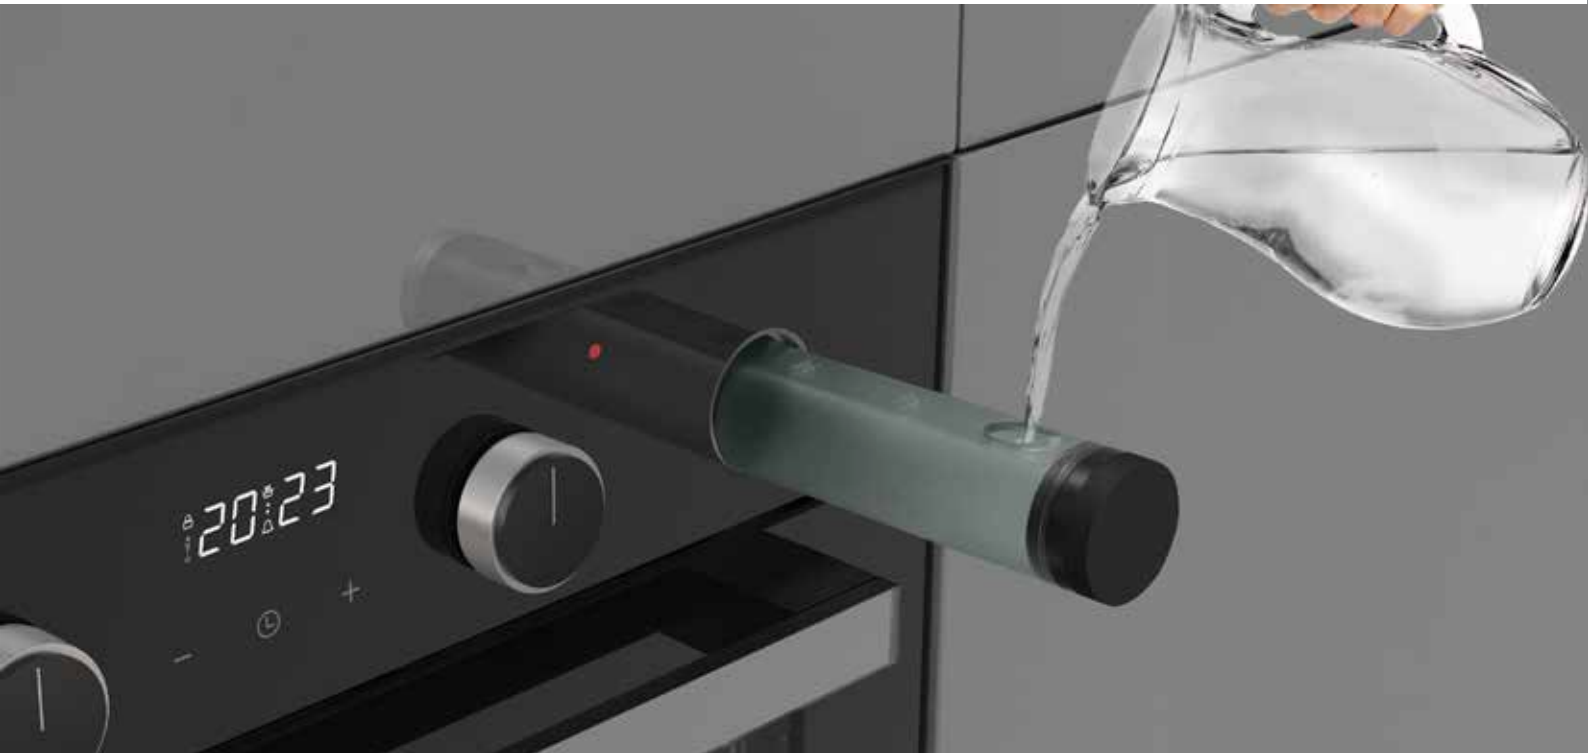

With the latest designed heating element, we achieve %25 wider grilling surface and more homogeneous cooking performance.

► Steam Assist

Steam Assisted Built-in Oven

Steam support technology enhances flavor and texture, creating juicy, crispy meals with even cooking throughout.

► AirFry

Powerful AirFry Function

We've upgraded our built-in oven with an Airfry feature, perfect for a variety of crispy dishes. It enables oil-free frying, ensuring a healthier, faster, and more even cooking experience.

AirFry Tray

Our Airfry tray's perforated design allows versatile cooking by maximizing air circulation. Its large surface area ensures even cooking, while the ETC enamel coating makes cleaning easy.

► Gas & Mix Built-in Oven

Built-in Gas Oven & Electric Grill

This premium built-in gas oven combines advanced safety and performance features, ensuring an exceptional cooking experience.

Carefully designed with user safety, efficiency, and reliability in mind, this oven provides peace of mind and outstanding results.

Advanced Safety Mechanisms:

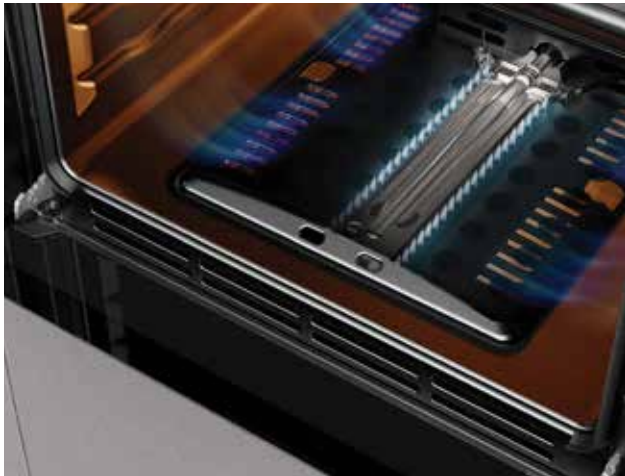

The gas burner is protected by a dedicated cover system, ensuring safe and secure operation.

Door Switch

All components are crafted from top-quality materials, ensuring durability and long-term performance.

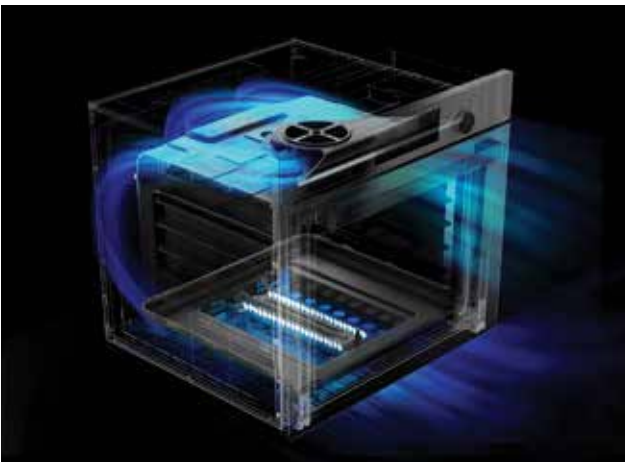

Gas flows safely through the burner and is precisely ignited to produce a steady blue flame, guaranteeing efficient energy usage and consistent heat.

Thermostatic Gas Valve & Safety Limit Thermostats

The built-in thermostatic gas valve ensures precise control of the oven's internal temperature.

Additionally, dual safety limit thermostats monitor the temperatures of both the oven cavity and the cooling fan, cutting off the gas supply if temperatures exceed safe levels. flame, guaranteeing efficient energy usage and consistent heat.

Cooling Fan for Enhanced Safety and Comfort:

A built-in cooling fan helps maintain the oven's exterior surface temperature at safe levels, even during extended use.

This ensures safety in the kitchen while preserving the integrity of surrounding cabinetry.

Homogeneous and Efficient Cooking:

The oven features a high-performance air circulation system that ensures uniform heat distribution inside the cavity.

This homogeneous airflow results in evenly cooked dishes, saving energy and enhancing cooking efficiency.

► Cooling Technology

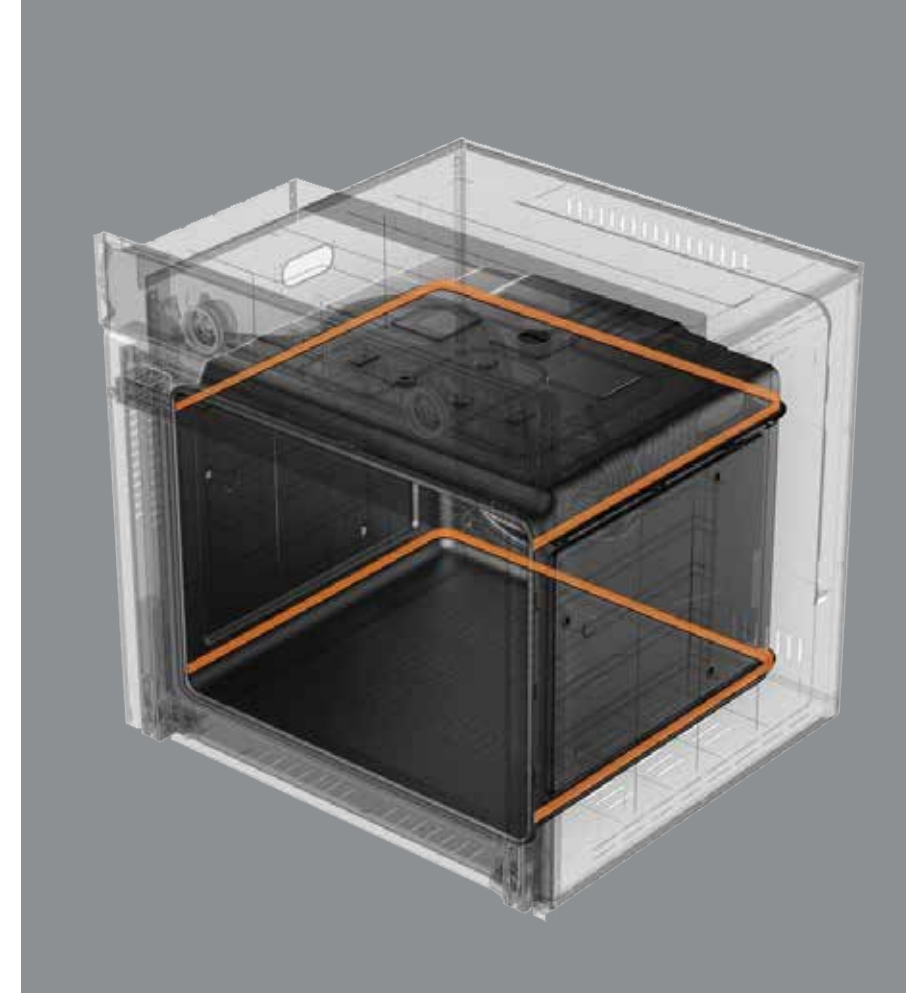

Cooling Fan

The cooling fan feature, which is standard on our built-in ovens, keeps the glass door cold with its ventilation holes. In this way, the outer glass always remains cold. After cooking, the cooling fan continues to run until it drops to a certain temperature to cool the hot oven interior.

► C-Type Cavity

C-type Cavity Technology

Our C-type cavity design and continuous seam welding ensure even air circulation, resulting in more consistent cooking. This method also prevents heat loss, achieving an A energy rating with less energy use.

C-type Cavity

C type cavity makes the oven's main chassis more robust and resistant to deformation. It is less likely to bend or suffer damage from external impacts, ensuring long-lasting durability.

Standard Square Tray

With a depth of **30mm** and a cooking capacity of 4 liters, the ETC enameled Square tray offers more cooking possibilities with its larger size than the competition.

Deep Tray

With a depth of **60mm** and a cooking capacity of 7.5 liters, the ETC enameled Deep tray offers more cooking possibilities with a larger size than the competition.

Air Fry Tray

The air fryer tray is specially made for versatile cooking thanks to its well-designed perforated structure. The large surface area ensures that the food is exposed to more air circulation during the cooking process. ETC enamel coating ensures easy cleaning.

Deep Round Tray

ETC enameled **370mm** diameter inox circle round tray.

Pizza Tray

370mm diameter pizza tray with PTP non-stick coating.

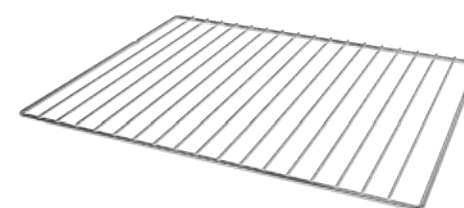

Tray Holder

Durable chrome nickel plated tray holder for holding hot trays.

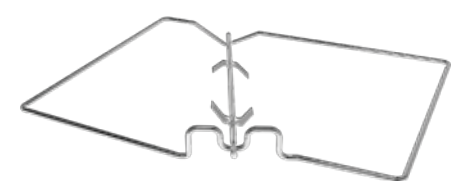

Premium Grid

Premium wire grill with reinforced chrome nickel plated.

Classic Grid

Classic grill with durable chrome nickel plated.

Rotisserie Set

Chicken dishes are cooked healthy and easily with the practically designed chrome-plated support wire and stainless chicken rotisserie skewer.

Cooking Functions

Oven Lamp

Conventional

Cooking Ideal for traditional static cooking for one shelf only.

Bottom

Ideal for slow cooking, keeping cooked food warm.

Top

Ideal for browning food.

Oven Fan

This function allows frozen foods to thaw faster.

Fan + Turbo Resistance

The heat is distributed homogeneously thanks to the fan and ring heater and more than one food can be cooked.

Grill + Fan

Homogeneous heat distribution occurs thanks to the fan.

Top + Fan

Ideal for cooking pasta-style foods in the oven.

Bottom + Fan

Ideal for completing the cooking process.

Fan Assisted Cook

The heat in the oven is distributed homogeneously thanks to the fan.

Grill

This function is used to cook the top of the food or fry the top of the cooked food.

AirFry

The fan and turbo heat system spreads the temperature evenly, allowing several dishes to be cooked simultaneously.

Optional Features

- Turbo Fan
- Telescopic Rails
- Easily Detachable Side Wire Racks
- Triple Glassed Oven Door
- Deep Tray (6 cm)
- Round Tray (Ø37 cm)

Built-in Hobs

ALL FEATURES

► Gas Hob Features

Flame Failure Safety Device

Hobs with FFD automatically cut off gas if the flame goes out, ensuring kitchen safety.

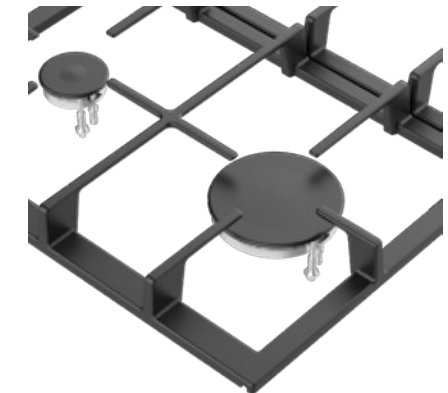

Powerful Big Wok Burner

3600 W Wok Burner provides powerful, fast and evenly heated cooking.

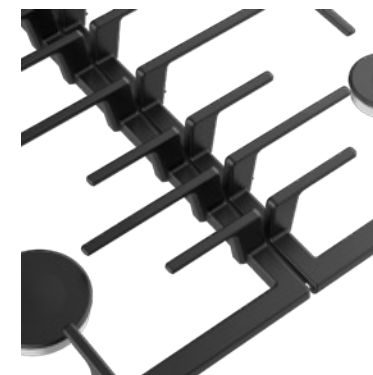

Round Cast Iron Pan Support

Designed for gas glass hobs, it ensures stable, safe use for pots of all sizes.

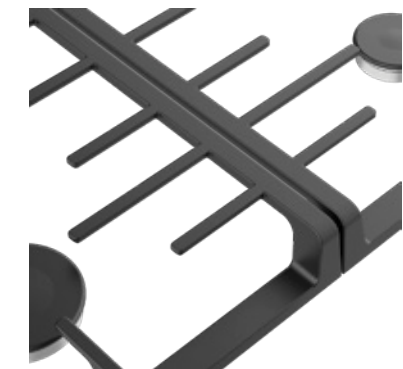

Cast Iron Pan Support

Rectangular cast iron support ensures stable, safe use for pots of all sizes.

Intensive Cast Iron Support

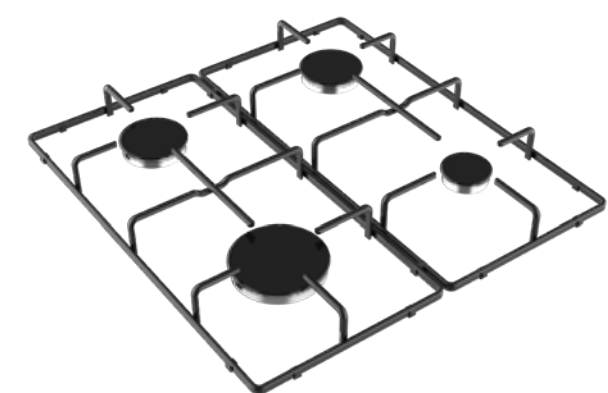

With an intensive design, this model ensures superior stability and a modern look for your kitchen.

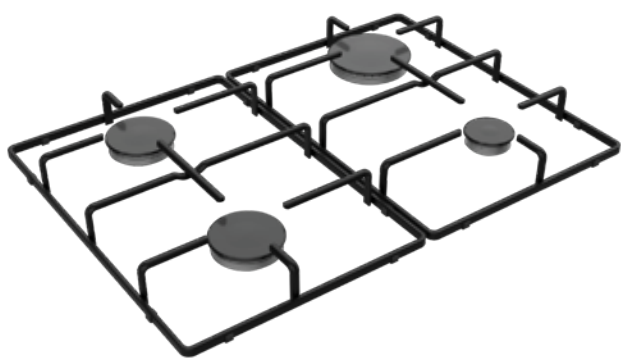

High & Intensive Cast Iron Pan Support

With its robust, high-leg integrated design, this rectangular cast iron pan support offers exceptional stability and safe use for pots of all sizes.

Built-in Hood

ALL FEATURES

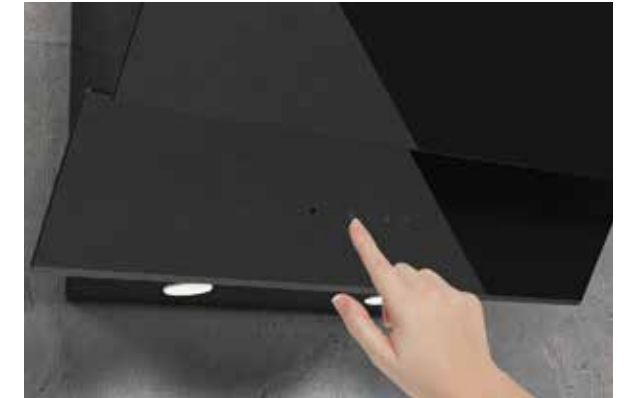

► Features

Bright LED Lamps and Functional Remote Control

With the remote control, you can adjust the engine power, use the timer function, turn on the ventilation mode or turn the led lamps on and off Energy saving and aesthetic LED lamps will create a bright space on your counter rely on a single pot in a single area.

Timer Function within Touch Buttons

When the speed level button is pressed for 3 seconds, it switches to the timer function and flashes every half a second, indicating that the timer is working The hood switches itself off automatically after 15 minutes of operation at the relevant speed level

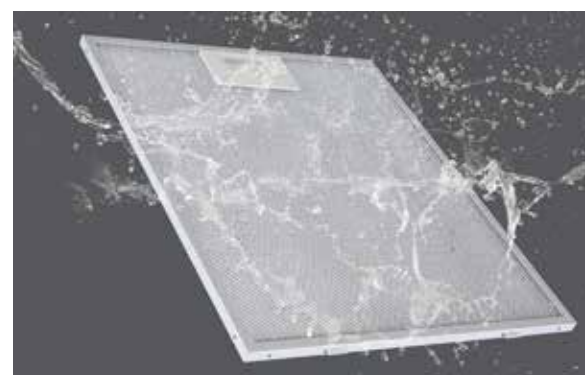

2 Step Hood Lid with Double Magnetic Lock

Strong magnets increase the durability of the 2 step hood lid Thanks to the magnets that provide practical use, the lid of the hood can be opened easily, and the filter can be removed

3 Levels of Suction Power

The hoods can be used at low speed to ventilate the kitchen, at medium speed for daily use, and at high speed for dishes that produce high amounts of oil and smoke, such as fish or fries With the powerful suction, hoods provide a functional use in everykitchen

Dishwasher Safe Aluminum Filter

Aluminum filters consisting of 3 layers trap dust and oil in the air and clean the air of the environment In addition, removable filters can be easily cleaned from accumulated oil and dust by washing in the dishwasher

Energy-Saving and Eco-Friendly Hoods

Carino hoods are limited to 4 hours maximum working time in order to save energy and provide safety In this way, even if you leave the hood on, it automatically shuts off after 4 hours and prevents unnecessary energy use
