MEDICAL PRODUCTS

Luer-Lock syringes carrying EUPHORIA Medical Products brand, with its screw lock mechanism, prevent syringe's needle part from separating during injection and irrigation.

It provides 50% extra working area thanks to being 2,5 cc.

It provides easy slide compared to other syringes thanks to its special silicone piston, thus relieving pain during injection.

Standard needle for acid application can be attached by removing syringe needle when necessary. (Sending mixed calcium hydroxide to duct, etc.)
