

FlameSmart Rapid & Autonomous Detection • Alerts • Control within seconds of detection

FlameSmart reduces fire risk at Melbourne Waste Transfer Station

THE PROBLEMS

- Lithium-ion battery fires
- Excessive Insurance Premiums
- Extended Business Interruption

THE SOLUTION

- Early Detection – Precision FLIR A50 thermal cameras
- Intelligent Targeting – FlameSmart's AI-driven fire control software
- Rapid Fire Control – High-flow Elkhart Brass Sidewinder monitor
- Continuous Readiness – Automated system health checks supporting 24/7 operation

THE RESULTS

- Extensively tested & refined in real fire scenarios
- Automatic fire detection & control response 24/7
- Greater business continuity & risk management
- Designed to relevant Australian Standards
- Reduces insurance risk profiles
