

Love is Like a Puzzle

Love is pieces that go together to make a whole
Figure out the complicated parts
Those answers you have to know

When you're looking for love
It can seem an empty road
Looking for answers
Not knowing which way to go

You're searching for something special
Unique, one of a kind
There are no pictures
Just thoughts in your mind

Step by step love is leading you on
You're hoping for yesterday's answers
Because by tomorrow
They will be gone

**Love is like a puzzle
Goes together one step at a time
There's no use in rushin'
It's complicated by design**

**There's no simple solution
No magic key
There's no use in cryin'
It's no remedy**

Some people spend a lifetime
Hoping to find the other to become two
Others get lucky right away
But they are the few

There are a lot of false starts
Mistakes play their part
But desiring love is powerful
When found it can mend a broken heart

Finding the right one
Is a glorious thing
It can make the world shine brighter
With the happiness it brings

I would move mountains
And grab the stars from the sky
If I could only find you

The apple of my eyes

I close my eyes and
I see you in my mind
I want to touch you and hold
Make you mine

Repeat Chorus

The road is twisted
The path unclear
Looking for love
But I know it's near

Love is complicated
And I know by design
But I will see this to the end
To find my true love
Even if it takes the test of time

Repeat Chorus
