

Step Up and Kiss Me

Shake your leg
Wiggle your hips
Now curl lips

Bat your eyes and
Flash me a smile
Your love is gonna be mine
And it will last a country mile

Tight faded blue jeans
And high heel shoes
Put your hair on my pillow
What do you have to lose

I kiss your cheek
Nibble on your ear
The feel the beat of my heart
Now tell me what you hear

**Step up and kiss me
We're gonna make love tonight
Step up and kiss me
We're gonna hold each other tight**

**Wrap your arms around my neck
Whisper in my ear
Sing me a love song
Say those words
I wanna hear**

**I hold you close, my object of desire
You're my eternal flame
Come on and
Light my fire**

Look into my eyes
Tell me what you see
A red-blooded country boy
Baby, did you know you needed me

I run my hands
up and down your spine
One more touch and

Baby you will be mine

I'm gonna take you on a ride
To the moon
Hang tight don't want it
To end too soon

Boy meets girl
The lovin starts
But be careful baby
I'm gonna steal your heart

Repeat Chorus
