Google AI: What is the value of a new nonconsumable energy source?

A new non-consumable free energy source holds profound human value by eliminating energy scarcity, powering global development, and healing the environment. The key benefits include ending energy poverty, stopping carbon emissions, and lowering the cost of living for everyone.

A new non-consumable free energy source would be worth trillions to quadrillions of dollars, transforming global wealth by ending fuel costs, eliminating carbon markets, and making energy nearly free.

What is an Autonomous Energy Over-unity Device (ACC)?

An Autonomous Energy Over-unity device is a mechanical system that creates more energy from its processes than it consumes. It creates no emissions, has little heat production, low noise, and is mobile off-grid energy technology. It can also be buried, submerged, and works in space because it is all mechanical.

It is also known now as ACC (Autonomous Constant Current) electricity, because unlike AC and DC currents this is a constant current of electricity. AC and DC are burst and not constant currents.

Autonomous Energy Over-unity also changes our understanding of the laws of thermodynamics in the fact it creates and destroys energy in its own processes. There is no energy lost or converted in its operations. Gravity has no effect on its operations and is the only human energy source that can affectively operate in zero gravity and in the darkness of space.

AUTONOMOUS ENERGY OVER-UNITY DEVICE AND AS A GENERATOR IN OPERATION

An aerial photograph showing a vibrant yellow field on the left, a central row of green trees, and a green field on the right. The trees cast long shadows to the right.

WHAT AN ACC LICENSE GETS YOU?

What it gets you:

- A yearly license to use ACC in your specific contracted products.
- Allows you to create your own products patents/trademarks.
- It allows you access to future Autonomous 0 Energy IP.

What it doesn't allow:

- Transfer or resale of license.
- Does not allow competitive IP creation by license holder and company.
- Does not give license holder rights to negotiate licensing to new license customers.

WHAT COMES WITH ACC LICENSING?

- One year license of ACC IP use in products.
- A fully functioning Autonomous Energy Generator for re-engineering and prototyping your products.
- One year of Autonomous 0 Energy SME consulting and support.
- Access to future Autonomous 0 Energy IP.
- Autonomous 0 Energy marketing and legal helping to access markets as a destructive energy innovation. *

* Autonomous 0 Energy will be responsible for its own IP; the license holder will be responsible for legal and marketing for their own products.

ACC Licensing process:

- 1) License meeting.
- 2) eBay purchase of a license negotiation processing (flat \$25k non-refundable).
- 3) Potential licensee site visit with a fully working Autonomous Energy Generator. First round of negotiations. NDA signing.
- 4) Legal processing, License creation.
- 5) Second site visit, License contract signing. First licensing payment.
- 6) Project readiness review at second site visit (what do you need from Autonomous 0 Energy to get started?)

ACC LICENSING COSTS

- Standard one year license of ACC \$50m
- Pre-September 30th, 2026 **first builder lifetime license** of ACC 5% of sales per product.
- Negotiation and start-up costs \$25k eBay purchase.
- Pre-September 30th, 2026 **first builder license** negotiation and start-up costs \$140k per year (minus the \$25k eBay fee first year) until their product sells 200 per piece in sales per year. **First builder** licensing period will be negotiated (lifetime or 20years).
- Total for non-first builder license per year \$50,025,000.00
- Total for **first builder** licensing per year \$140k until 200 volume sales, then just 5% of sales per piece paid quarterly.
