

"Central Alabama Electric will be conducting planned maintenance on the power grid on County Road 133 on Monday 8/24/26, beginning at 8 am. Power could potentially be off for most of the day at some of the Town's water facilities. We are taking all necessary steps to ensure that customers will have adequate water pressure during the duration of the power outage. If you experience low pressure during this time, please contact the water department ASAP at 334-365-9563."

If you have any questions, please let me know.

Thanks,
Allen Fowler
