Urinalysis Tests

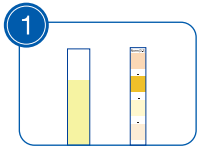

Technology and Innovation to Improve the Quality of Life

Urinalysis Tests >> Urinalysis Reagent Strip

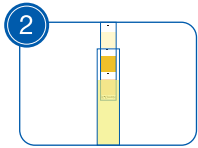

The Urinalysis Reagent Strip can test for 14 parameters:
Glucose, Bilirubin, Ketone, Specific Gravity, Blood, pH,
Protein, Urobilinogen, Nitrite, Leukocytes, Ascorbic Acid,
in urine specimen, Calcium, Creatinine and Microalbuminuria.

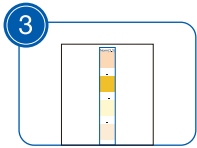

Test Procedure

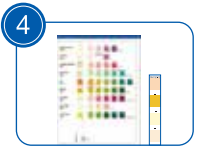

Completely immerse reagent areas of the strip in fresh, well-mixed urine.

Touch the side of the strip against the rim of the urine container

The lengthwise edge of the strip on an absorbent paper towel to further remove excess urine

Compare each reagent area to its corresponding color blocks on the color chart and read at the times specified.
