

PROMISES TO ASHES FOUNDATION

Family Resource Center - Public Index

One doorway. Clear choices. Education first.

HOW THIS RESOURCE CENTER IS ORGANIZED

The Promises to Ashes Resource Center is being built so families can start with one landing page and move to the specific information they need. Each topic remains separate, source-controlled, and free of commercial purchase pathways.

PUBLIC RESOURCE	WHAT IT COVERS	STATUS
Kratom Leaf	Botanical context, common forms, trace naturally occurring 7-OH, and the distinction between leaf and concentrated products.	Core module built
Concentrated / Enhanced 7-OH	Added or enhanced 7-OH, common product forms, family recognition points, and current federal context.	Core module built
Synthetic 7-OH Derivatives	Mitragynine pseudoindoxyl, MGM-15, MGM-16, and careful terminology so 'synthetic' is not used too broadly.	Core module built
Tianeptine / ZaZa	Tianeptine as a separate substance category, ZaZa as an FDA-identified example name, and family recognition guidance.	Core module built
Parents & Caregivers	Recognition guide, label terms, packaging awareness, and practical family-facing education.	Guide built
Research & Sources	Curated government and vetted research destinations; deeper technical or enforcement records remain in the research archive unless appropriate for public use.	Structure built
Downloads	Community letter, family guides, core education modules, and future printable resources.	Being assembled

PUBLIC NAVIGATION RULE

The permanent QR code should open the Foundation Resource Center landing page, not an individual PDF. From there, families can choose the topic they need. When a module is updated, the content behind the landing page changes while the public QR can remain stable.

NO-PURCHASE-LINK POLICY

No retailer links. No manufacturer sales pages. No marketplaces. No affiliate links. No shopping carts. No product-ordering pathways. Public links move readers only toward Foundation, government, public-health, academic, or otherwise vetted educational resources.

WHAT HAPPENS NEXT

The next build step is the **Downloads and Family Access layer**: organize the completed public modules and guides under one consistent naming system so they can be connected cleanly to the eventual landing page.

PUBLIC FOOTER STANDARD

Educational information only. No product promotion. No purchase pathways. Sources are reviewed for accuracy and updated as evidence and regulations change.

For Justin, and for every family after.
