

The softwash certification course by Spray Wash Academy is a two day hands-on course explaining the softwash process. Filled with extensive fact based knowledge, this course will also give you the opportunity to work with Spray Wash Exterior cleaning crews in the field to gather hands on experience.

At the conclusion of this coursework and after passing the exam, course attendees can proudly display the “Soft Wash Certified” badge on their marketing materials. If you are considering adding softwash to your menu of services, this course is for you
