

Roof Cleaning Syllabus

Certification Class

This Spray Wash Academy certification course will take an expert level view of the roof cleaning process. Starting from the basics and working our way through to the hands on training, we will cover all aspects of the roof cleaning, including the ARMA (Asphalt Roofing Manufacturer's Association) standards, types of roofing, methods, chemicals, safety and much more.

Attendees who pass the course final exam will be able to proudly display the Spray Wash Academy "Roof Cleaning" certification logo on their marketing materials and web-site. This is a must have course to show your customers you have the knowledge and training essential to keep their property safe!
