

WHAT IS LIMFA® THERAPY

The IYASHI Limfa® Therapy System generates low-frequency electromagnetic waves. The waves have the same charge as the electric fields of our cells. Limfa® Therapy waves cause the walls of your cells to vibrate. The vibration allows the Limfa® Therapy System to send signals across the cellular membrane and repair the electrochemical balance and functions of cells.

CLINICALLY PROVEN OUTCOMES

INFLAMMATION & PAIN MANAGEMENT

Proven to reduce inflammation & pain.

OSTEOPOROSIS

Limfa® Therapy is the only known non-pharmaceutical treatment for osteoporosis and is proven more effective than drugs - *with no side effects*.

STEM CELLS TO CARTILAGE

Limfa® Therapy is the only proven method to convert stem cells into Type 2 Collagen- which becomes cartilage.

OSTEOARTHRITIS

Increases mobility and reduces pain.

BONE HEALING

90% union of fractures resolved in 1 mo.

FIBROMYALGIA & CARPAL TUNNEL

Clinically proven to radically reduce pain.

Ask your healthcare provider about the many additional applications of Limfa® Therapy.

TRUSTED BY HUNDREDS OF
PRACTITIONERS AND BENEFITTING
THOUSANDS OF PATIENTS IN
EUROPE SINCE 2013

The IYASHI Limfa® Therapy System is a medical device that uses low-frequency electromagnetic waves to communicate with your cells.

The treatments are proven to be safe, painless, and highly effective - more effective than existing therapies, including pharmaceuticals.

Limfa® Therapy was developed in Italy with two decades of intensive scientific research and clinical trials. Available in Europe since 2013, Limfa® Therapy is now available in the United States.

BACKED BY SCIENCE
USED BY THOUSANDS IN EUROPE
SAFE, EFFECTIVE & AFFORDABLE

HOW LIMFA® THERAPY CAN HELP YOUR BODY HEAL

Treats the root cause - at a cellular level

IYASHI Limfa® Therapy sends a series of low intensity signals to your cells. The signals are charged at the same energy level as the cells, allowing the System to communicate directly with the cells.

Developed through rigorous testing

Developed in Italy with leading medical schools and research centers, Limfa® Therapy delivers a variety of specific, pre-programmed treatments via patented sequences established through extensive research.

Deep healing

Depending on what is being treated, Limfa® Therapy is delivered by either a small, rectangular transmitter or by laying on a full body mat. The signals penetrate deep into tissue and even bones, delivering targeted healing at the location of injury.

THERAPEUTIC APPLICATIONS

TISSUE REPAIR

Bone Healing
Muscles
Tendons
Cartilage
Nerves
Osteoporosis
Stem Cell Therapy

PAIN THERAPY

Fibromyalgia
Rheumatology
Acute Trauma
Osteoarticular Pathologies
Musculoskeletal Pathologies
Inflammation & Edema
Delayed Onset Muscle Soreness

WHAT TO EXPECT DURING TREATMENT

PAIN FREE

Most patients do not feel the treatment. Occasionally, you may feel some tingling.

SAFE

In use and approved by European regulators since 2013, there have been no reports of injuries or negative side effects.

CLOTHES AND ELECTRONICS ARE OK

The low intensity signals reach through clothes and it's OK to use electronic devices while receiving treatment.
