Or bring your own creative sign!!*

Let's crash a political fundraiser for the Mundy Twp Supervisor (Tonya Ketzler) who is Flint Genesee Group President & CEO Tim Herman's puppet!

Governor Gretchen Whitmer thinks she can give them \$260 million to build a plant for the Chinese? Thousands of dollars are being spent weekly right now on TV commercials to promote electric cars to develop thousands of jobs? It's fiction!

If dealers say they can't sell electric vehicles, why use our tax dollars to let foreign companies own plants in our country for the failing EV industry?

Battery plants average only 92 jobs in the U.S.

U.S. Battery Manufacturing Plant Association lists average wages at \$17.70 per hour

Semiconductor chip making factories

U.S. Bureau of Labor Statistics say they employ only 24,340 total across the U.S. now with wages starting at \$15.20 per hour

So the push for EV can help climate change? Yet these factories will drain our great lakes water supply by using millions of gallons annually? And the run-off toxins will pollute the surrounding area ground water to create a water crisis worse than Flint?

Kick-off event to fight for our safe water supply and to stop toxins from poisoning our land!
