

ATR

ALL THREADED ROD

RYMCO All Threaded Rod (ATR) is a straight metal rod with threads running its entire length, built to handle high pressure and tension. It serves industries such as electrical, plumbing, HVAC, construction, telecom, and more. RYMCO USA provides a variety of materials, thread types, and sizes to meet diverse needs in threaded rods.

Material:

RYMCO USA offers All Threaded Rod (ATR) in zinc-plated low carbon steel for general use, T304 stainless steel for outdoor durability, and T316 stainless steel for harsh environments like marine and chemicals, ensuring reliability in construction, HVAC, and telecom.

Codes & Standards Compliance:

*ASTM A307

Application:

All Threaded Rod (ATR) is essential across construction, electrical, plumbing, HVAC, telecom, and mechanical industries. It supports structural elements, fixtures, conduit systems, pipes, equipment mounts, antennas, and machinery, offering versatility and durability for routine and specialized installations in diverse environments.
