

# IMC

## INTERMEDIATE METAL CONDUIT

### **RYMCO Intermediate Metal Conduit (IMC)**

Developed as a lighter, but slightly wider version as our RMC. With 33% less steel and 1/3 less weight. The IMC comes in trade sizes from 1/2-4 inch in standard lengths of 10 feet (3.05 meters) including the coupling and threaded on both ends. The taper of the threads is  $\frac{3}{4}$  in. per foot (1 in 16) and are protected after cutting with molten zinc after. RYMCO IMC protects insulated electrical conductors and cables from magnetic interference, damage, impact and crushing. Color-coded end caps are applied opposite the couplings to protect the threads and provide quick visual indication of trade sizes.

### **Coatings:**

RYMCO IMC exterior is hot-dipped galvanized with special high-grade zinc along with C Coat for added protection against corrosion. In addition to the galvanizing process, the interior of the conduit has a FreedomCoat® layer for rust prevention and allow for easier wire pulling and pushing. Providing our customers with peace of mind and the highest level of confidence in the RYMCO conduit.

### **Application:**

RYMCO IMC can be installed in all occupancies and locations, including Class 1 Division 1 hazardous locations and is recognized in the NEC Section 250.118 as an acceptable equipment grounding conductor and offers shielding against electromagnetic fields generated during normal operation of electrical installations.

---

### **Codes & Standards Compliance:**

- UL 1242, File# E340533
- ANSI C80.6
- NEC Article 342
