Nutrition Coaching

\$75 per week

Finally reach your body composition goals by taking control of your nutrition and internal health. Our coaches will help you establish healthy habits that are sustainable long term, while getting you towards your goals through proper nutrition, correct portion sizes, and all natural supplements that support optimal health. Diets do not work long term, which is why we focus on lifestyle change, mindset change, and healing your gut so you can look and feel your best.

To kick start your nutrition coaching and build a solid foundation, try our **30 Days Of Healthy Living** program. It's a 30 day whole food eating plan geared towards improving the gut and optimizing internal health. You can eat as much as you need of almost any fruit and veggie, most proteins, and we supplement with 100% natural and vegan Arbonne supplements. These botanicals are the cleanest we have found, and they taste great. We avoid a few foods that cause inflammation and we focus on gut health. This is not a diet, rather a lifestyle change to achieve both optimal health and aesthetics.

Massage Therapy

Specializing In Deep Tissue, Trigger Point Therapy, Myofascial Release, IASTM, Cupping, Prenatal, Lymphatic Drainage, Swedish, and Sports Massage

1 Hour Massage

\$100 per session

Specialty Services

Interactive Neuromuscular Stimulus (INS) Training

The NXPro uses an **Interactive Neuromuscular Stimulus (INS)** which emits two currents: a high frequency alternating current and a low frequency pulse direct current. INS creates a balance on both ends of muscular contraction by enabling the muscle to maximally lengthen, and then create a subsequent maximal contraction. INS allows our Certified Exercise Therapist to search the client's body and identify not only the area of known dysfunction, but also the undetected dysfunctional tissue causing the pain. If the area of pain is treated without treating the root cause, the relief will only be temporary. It is imperative that the root cause be located in order to achieve successful rehabilitation, and INS does just that: the technology innervates muscle tissue in the area of dysfunction and the individual muscle at the root cause of the pain can be identified.

In other words, NXPro turns your muscles "on" during training or rehabilitation. By placing the gel pads on the targeted muscles and working through a full range of motion, we are able to stimulate that muscle to contract and lengthen in a far more efficient way.

While in use, the NXPro will send a continuous electrical current to the area being targeted. This will send a signal to the brain to increase the amount of muscle fibers being used while training. This will enable the client to achieve better results at a faster rate whether they are training to increase performance, improve muscular development, or rehabilitate an injury.

This advanced technology aids in recovery, increases mobility, stimulates blood flow, improves flexibility, stimulates muscle hypertrophy, and enhances overall performance.

50 Minute Sessions

Private Coaching (One On One)

One Session Per Week	\$115 Per Week
