

CareSource LIFE SERVICES®

True to our **non-profit** roots, our mission is to make a lasting difference in our members' lives by improving their health and well-being.

“The kinds of enhancements we have developed at CareSource help us look beyond the traditional health care model to find new and more meaningful ways to reach out to our members, our providers, our government partners and our employees.” Erhardt Preitauer, President & CEO

Working as a **non-profit** health plan has driven CareSource to be a stable and certain partner for our members when their lives are the most uncertain. Our CareSource Life Services® program walks along our members and provides a holistic foundation to address the social determinants that impact a member's health & wellbeing.

If our members have a poor quality of life, they will likely have poor health, too. When they gain a steady job and economic stability, they also gain better access to health care, financial empowerment and, ultimately, self-sufficiency.

The goal of **CareSource Life Services** is to remove barriers that may impede them on their way; every day hundreds of Life Coaches work with thousands of members to break down those barriers.

CareSource JobConnect™

The centerpiece of CareSource Life Services is an ambitious outreach called **JobConnect**. Through JobConnect, members are assigned life coaches who work with them on issues related to employment, employer access and support services. Our coaches remain engaged for up to 24 months with the goal of fostering retention and advancement. Meanwhile, our program's infrastructure connects members to other community resources: educational programs, food and nutrition, housing and transportation.

Healthy Beginnings at Home

In 2018, a staggering 136 infants died before their 1st birthday in one Ohio County alone. Meanwhile, research suggested that housing instability could increase a woman's risk of premature birth by 200%. Could the two statistics be related?

Our **Healthy Beginnings at Home** program began with that question and the goal of reducing these grim numbers. The program offers subsidized housing to 50 low-income, pregnant women in unstable housing.

OF THE 50 WOMEN IN THE STUDY:

51* live births

of babies that are still happy and healthy

87% of babies born were at a healthy birth weight

0% of babies were born pre-term

Supporting the Most Vulnerable

CareSource Life Services continues to create sustainable local collaborations to increase success for the most vulnerable. In collaboration with the **CareSource Foundation®** we have embraced the complex issues that often confound other insurers. Our holistic approach to health care becomes vital as we help members with clinical care and the societal factors that affect wellness like housing, employment, foster care and even the criminal justice system.
