

"This is the biggest public health discovery we've ever seen."

— Laura Porter, Co-Founder, ACE Interface

Join

the Region 1 Family Connections and the Georgia Center for Child Advocacy

Wednesday January 13, 2021 11:00am-12:30pm

For a Virtual Screening of

RESILIENCE: THE BIOLOGY OF STRESS AND THE SCIENCE OF HOPE

a film chronicling the promising beginnings of a national movement to prevent childhood trauma, treat Toxic Stress, and greatly improve the health of future generations.

Following the film we will have a talk-back session with members of the Georgia Center Prevention Team about the film and designed to engage community members in understanding how our interactions can mitigate the impact of ACEs and childhood trauma.
