## SCOPE

Design and manufacture of **4 units** 1,500,000 BTU/hr Transferred to Gas 2,143,000 BTU/hr Gross Release, and **10 units** 750,000 BTU/hr Transferred to Gas – 2,143,000 BTU/hr Gross Release **for Empresa Nacional del Petróleo (ENAP – Chile).**

In a joint effort with **MORKEN Chile**, we were able to integrate **QB Johnson** from Oklahoma, a manufacturer specializing in gas treatment equipment, into the solution proposal, thus satisfying all of the customer's technical conditions.

The work was executed in 8 months, managing to comply in a timely manner with the planned.
