Comments:

3/2023

V/P: V=Volunteer inspector; P=Paid inspector \* IMPORTANT— Record the entire boat's bow registration number.

# STOP AQUATIC HITCHHIKERS

*Aquatic Invasive Species such as Eurasian watermilfoil, Asian clam and spiny water flea can spread between waterbodies on boating and fishing equipment that has not been cleaned, drained and dried. Help protect Maine waters by following the simple steps below.*

**C**LEAN off all plants (even small fragments), animals and mud from boat, trailer, and equipment.

**D**RAIN water from boat, motor, bilge, live wells and other equipment well away from water.

**D**RY boat and gear completely to kill hard to see small-bodied organisms. If you can't dry equipment, rinsing with hot, high pressure water will also remove many small-bodied organisms.

**N**EVER release plants, live fish or animals into a water body unless they came out of that body of water.
