

PROJECT CASE STUDY

Fire Door Replacement & Glazing

Various Schools, East Anglia

Safer. Compliant. Built for Education.

Project Overview

TDP Group supplied and installed fully certified FD30 and FD60 fire doors across various schools in East Anglia. The project improved fire safety, compliance and appearance, with new doors, frames, fire-rated glazing, ironmongery and signage, all completed with minimal disruption to the school environment.

Project Details

Client:	Various Schools
Location:	East Anglia
Contract Value:	From £1,000
Programme:	2 days
Sector:	Education
Environment:	Live school environments

Project Highlights

- FD30 & FD60 fire doors
- Veneer or paint grade finishes
- Pyro fire rated glazing (optional)
- Door closures to BS EN 1154
- Push and pull handles and D handles
- Kick plates for added durability
- Fire exit and safety signage
- Fully certified installation
- Fast, efficient programme (from 2 days)
- Minimal disruption to school operations

Scope Included

- Supply and installation of fully certified FD30 & FD60 doors
- Veneer or paint grade finishes
- Pyro fire rated glazing as an option
- Door closures
- Push and pull handles and D handles
- Kick plates
- Fire exit and compliance signage
- Associated making good, finishes and final handover

The Challenge

Replace existing doors throughout live school environments, ensuring full compliance with current fire safety regulations while minimising disruption to teaching, staff and students across multiple sites within a tight timescale.

The Outcome

Enhanced fire safety, improved compliance and a modern, consistent look across school sites. The new doors and glazing provide durable, long-lasting performance and help create safer, brighter and more welcoming learning environments.
