

# Open Roads

Save Money. Give Water.  
We support CharityWater.org

## JANUARY 2023 NEWSLETTER

Nearly 80% of Cambodia's population lives in rural areas. Here 27% of the population lacks basic access to water and 52% lacks basic access to sanitation facilities. Wells that do exist are often in poor conditions.

The program Clear Cambodia was founded in 1999 with the goal of providing families in rural communities access to safe water, sanitations facilities, and hygiene education.

They operate the largest BioSand Filter (BSF) program in the world and implement roughly 22,000 BSF per year. After a family receives a BSF, the Clear Cambodia staff check in at least 4 times over the next two years. these visits ensure families are correctly using and maintaining their filters.

With your help, Open Roads was able to make a contribution at the end of the 4th quarter 2022 to build a new well in the school systems of Cambodia. This will serve approximately 280 people. That means 280 people will have clean drinking water and gender-specific latrines and handwashing stations.
