Growing together

AI THAT PUTS PEOPLE FIRST

AI for Schools

A structured staff CPD programme · delivered by Grassroots Intelligence

AI isn't clever, it's useful. *It's non-deterministic, keen to please, biased and lazy. We make that tangible, so staff can play safe with Copilot and know exactly what they're working with.*

A programme, not pick-up-put-down PD. This is a sequence of workforce training sessions with online clinics interspersed throughout, held together by a school advocate group. It is built to embed and sustain, not a one-off INSET. The aim is capacity, not dependency.

The rhythm of the programme

The sessions

Session 1 · Demystifying & Playing Safe

Get past the hype, explore bias, see why AI gets things wrong, and build confidence with Copilot.

Session 2 · Quality In, Quality Out

Master prompts, and build reusable schema from a WAGOLL (a great example). Develop shared prompt dictionaries.

Session 3 · Sharing & Systemising

A shared bank of schema and prompts, plus Copilot agents that package your school's best practice into reusable tools.

Each session a half-day, or a twilight to suit your calendar.

The clinics: where it sticks

Online clinics sit between every session. They are the connective tissue of the programme.

- Bring real, live work (a scheme of work, a worksheet, a report, a parent letter) and we solve it together on the call.
- Troubleshoot, refine prompts and unblock, turning "I learned it" into "I use it every week."
- Keep momentum, so skills embed instead of fading after a training day.
- What surfaces in a clinic becomes shared practice across the school.

Clinics are normally charged separately. Here, they're included.

The model & foundations

Advocate-driven

Whole-staff training, with around a dozen advocates carrying practice forward between sessions and clinics. A breakthrough for one becomes a shared resource for all.

Strong foundations

Good IT and Office skills are the bedrock. Even shortcuts and bookmarking threads make a real difference.

Copilot videos included

The Grassroots Copilot training video library, plus optional sessions on using Copilot well.

Better together

Built for MATs & clusters

Whole-trust capacity, not one school at a time.

Reduced rates for additional schools in the same cluster, when initial sessions can be delivered in close geographical areas and within similar time windows.

Face-to-face and online. Workshops can be delivered on-site at one school for the cluster, with clinics always online. Flexible to your geography.

Split primary and secondary. We recommend separate cohorts so the WAGOLLs, prompts and Copilot use cases fit each phase properly.

The complete programme

Three training sessions, all interim online clinics, the Copilot video library, and advocate-group support.

£5,000

all-inclusive

"Great, very useful, and I have some good ideas to make my use of GPT more efficient."

Senior Leader, Cardinal Newman School, Hove

"Amazing training which dispelled the mystery of AI but, more importantly, has helped me to schedule time to learn how to implement it. I have already saved hours!!"

Ed Duffy, SEN Specialist

Let's begin an AI change you can plan for. joe@grassroots-intelligence.com · grassroots-intelligence.com
