

# Thinking of Changing your Car

.... and don't know where to start ?

## Hassle at every stage

The whole electric, hybrid, plug-in, hydrogen, bio-fuel dilemma only adds to the stress of the car changing procedure.

- Is that bid on my existing car a fair one?
  - Are these new car manufacturers anywhere near as good as the Old Guard?
- Are all these new electronic gadgets reliable?
- No one seems to stock exactly what I want. Are those commission-paid salesmen biased?

## The Right Car at the Right Price

At ADA Car Consultancy we take a Different Approach

### WE LISTEN TO YOU

Our unique independent status enables us to provide you with advice and services based entirely on your needs and not on the needs of the selling organisation.

## Why choose and trust ADA Car Consultancy?

We founded Clover Leaf Cars in the 60's when independent dealerships based their businesses on offering a standard of service which generated word-of-mouth recommendations.

We have now moved to the Customers' side of the counter.

At ADA Car Consultancy, we can now use the experience and knowledge we have gathered over the last sixty years to ensure that you enjoy the unique ADA Car Consultancy process.

**The Clever Way to Change Your Car**

## SERVICE WITH INTEGRITY

A promise we have stood by for the last 60 years
