Gregory Brown

Currently I am painting, Silversmithing and Wood Carving

History:

I moved to Arizona in 1957 (I am almost a desert Rat). I graduated early from Phoenix Union High School. Next I joined the Navy for three and half years, started Phoenix Collage. I was told I needed to take a computer class. The outcome, I became a computer software designer. I built systems and programs for Schools, the Government and Farming companies for fifty years. During that time I became a successful silversmith, made furniture and remodeled houses.

When moving back to Arizona in a RV park I joined the wood caving group. In about 2023 my granddaughter visited with some unique water brushes. I went to Amazon, bought a set of the brushes and watercolor paints. From YouTube, I found how to paint a tomato, a pear, etc. That got me started painting. I now paint in watercolors, acrylics and oils.

I am having a tremendous amount of fun painting.
