

JAGOW ART
Artist Statement
Herb Jagow

The first 22 years of my life were spent growing up on a woodland farm in Western New York. Here I gained an appreciation of nature and the beauty of landscape. After 33 years in the educational field I decided to pursue my interest in the art world by taking a variety of Art classes at TMCC; Reno NV. I returned to my "roots" in my creations by seeking to portray the three elements which all living things need – sun, water, and trees. Therefore my creations stretch "From the mountain top to the Sea"
