Three Powerful Technologies in a Single Unit

- The unit turns water vapor into decontaminating ions.
- Widely used in schools, businesses, hospitals and government agencies, home & office
- NASA initially researched PCO, this company refined that technology into our proprietary AHPCO with germicidal UVC.
- They then added bi-polar ionization that releases a balance of both positive & negative ions that travel throughout the room & are highly effective in ridding air & surfaces of unwanted contaminants.
- Mold, viruses, bacteria, odors, VOCs, and allergens are reduced to trace levels.
