Reopening Schools: Global Update #2
Facts & insights from synthesising country experiences

JUNE 7, 2020
We investigated 183 country level school closures and 53 reopenings in order to compare and synthesise key decision-influencing features for system leaders at national and local levels, and to complement existing closure tracking and reopening frameworks. This summary offers a pragmatic glance at the emerging results of an ongoing investigation to illuminate the factors and influences that guide decisions.

This is targeted especially towards COVID-19 response and reopening task forces, and will be updated regularly. At least three independent sources were reviewed for each reopened country, and include official databases, ministry websites, country response plans and policies, press reports, and social media announcements.

**TOP-OF-MIND CONSIDERATIONS FOR REOPENING:**

1. **WHEN?**
   What is the relationship between infection rates and school closure and reopening?

2. **PRECONDITIONS?**
   What are the observed must-haves and critical enablers to put in place before reopening?

3. **HOW?**
   How are countries staging reopening, and what can be learned from country examples?
GLOBALLY, CLOSURE AND REOPENING ARE NOT FOLLOWING PREDICTABLE PATTERNS

WE COMBINED VIRUS PROGRESSION & SCHOOL CLOSURE DATA FROM 183 COUNTRIES FOR THIS ANALYSIS

FOR ALL COUNTRIES:

+ 72% of countries closed in the same ten-day period from 11th March.

+ Infection rates reflect multiple factors, with school closures being only one contributor. Globally, there is no consistent relationship between school closure dates and the reported cases of infection in the population.

+ Since closure, some countries have seen infection levels drop, in many others they have risen – correlations that are likely due to multiple factors.

+ 35 of the 53 countries that have reopened are high income countries. Countries are reopening on average 31 days after the peak in infection levels.

Visit education.org for our COVID-19 Infection and School Status Tracker, updated daily.

Note: Excludes countries not issuing national school closure order. Closure period does not consider school holidays.
Sources: COVID-19 daily infection data: Our World in Data School closures: UNESCO Country data: World Bank
MORE THAN HALF THE WORLD’S STUDENTS LIKELY TO BE OUT OF SCHOOL MUCH LONGER

WE ANALYSED THE DATA AND FOUND FOUR GROUPINGS THAT HELP TO EXPLAIN THE DIFFERENT NATIONAL STRATEGIES ADOPTED

105 COUNTRIES 16 REOPENED
Lower cases on closure
Trend upwards/level
Largest group of mainly low or lower-middle income countries, least likely to meet requirements to open soon.

18 COUNTRIES 6 REOPENED
Lower cases on closure
Trend downwards
Mixture of income levels, but with low current infection levels. Increasing potential to return to school.

22 COUNTRIES 5 REOPENED
Higher cases on closure
Trend upwards/level
Mainly high income and middle upper income countries. Stuck longer out of school with stubbornly high infection rates.

38 COUNTRIES 26 REOPENED
Higher cases on closure
Trend downwards
Mainly high-income countries, most likely to be heading back to school already.

Country examples:

- India
- Kenya
- UK
- Singapore
- India
- Nepal
- Thailand
- Niger
- Singapore
- Switzerland
- New Zealand

When did schools close? (Cases per million, 7-day rolling average)

- MAYBE BACK SOON
  - Thailand
  - Niger
  - < 1

- HEADING BACK ALREADY
  - New Zealand
  - Switzerland
  - > 1

- LIKELY OUT LONGEST
  - 81 days
  - 71 days

- LIKELY OUT LONGER
  - 77 days
  - 63 days
THREE “MUST-HAVE” PRECONDITIONS FOR SUCCESSFUL REOPENING

MUST-HAVES

1. SAFETY

Planned in close cooperation with health officials, staff & learners: distancing, sanitation, protective equipment, infection monitoring & response

+ Distancing protocols range from 1m – 4m per student; WHO advises 1m minimum, schools on average arrange for 1.5m

+ Reorganizing school day to ensure safety (i.e., implementing half-day shifts to reduce number of people in school spaces)

+ Where running water is not sufficient, sanitiser is positioned at entrances or by large areas

+ Testing is not routinely offered: In 2 countries for teachers and learners, 1 country for teachers only, and 2 for any at-risk in the school community (note: broad school testing can result in early jump in cases previously undetected)

+ Temperatures are recorded upon entry in only 10% of countries using thermal scanners.

+ Use of masks and other protective equipment varies;

  + One-third require masks for teachers and students 12 years+

  + When required, masks are usually provided by school or subsidised partially

2. STAFF AVAILABILITY

Availability of educators, school leaders, and support staff

+ Large at-risk teacher populations, were cited as reasons for keeping schools closed in four countries, even if reopening had been advised at national level

+ Advance consideration for all enabling personnel, including transport, cleaning, medical, law enforcement – teacher supply has been only one of many shortages

3. COMMUNITY SUPPORT

With support of health ministry, communication and collaborative planning with parents, teachers, business, and other civil society actors

+ Usually occurring through multi-stakeholder reopening task forces or extended committees, and supported by media and in some cases broad SMS messaging

+ Majority of countries reported significant objections to reopening from parents or teachers due to safety concerns; in two cases concerns caused postponement

+ Countries that reported least tension with stakeholders tended to have early and deep community engagement, and supported effective and broad communication strategies along the way

CRITICAL ENABLERS

POLICIES

Policies required to enact new requirements, for example, ongoing distance learning, gender & whole-child responsive adjustments, admission requirements, national exam modifications

OPERATIONAL PLANS

Plans for administering new requirement around safety, school calendar and exam shifts, entrance & exit staging, resurgence response plans, distance learning, teaching, and assessment, and strengthening resilience for future challenges

BUDGET & RESOURCES

Financial and other resources required to enact and maintain reopening under new requirements, including monitoring and assessment of response
MEETING PRECONDITIONS REQUIRES PRIORITISATION

PRE-CONDITIONS MAKE IT VERY CHALLENGING TO REOPEN SCHOOLS NATIONWIDE AT ALL LEVELS, SO COUNTRIES ARE PRIORITISING

Sixteen countries prioritised learners in exam years to return first, because they require exams for advancement, exams which can be difficult to administer out of school, and because older students can better comply with distancing.

Of the 38 countries assessed, only three lower income countries have opened all school levels simultaneously; two are isolated island states with low and declining infection rates.

Day care and preschools are not uniformly captured in global data, as they are often provided privately, or not included in basic education plans. This likely will lead to leaving many young children without strong early learning over the course of the pandemic.

One country prioritised the last pre-primary year to return first, citing the criticality of solid preparation for transitioning to primary successfully.

One country prioritised primary learners on the basis that they mostly reached school in the village on foot, not needing public transportation, unlike secondary and tertiary levels.

WHICH CHILDREN ARE PRIORITISED TO RETURN FIRST?

| Category                      | Countries Prioritising
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Exam years</td>
<td>18</td>
</tr>
<tr>
<td>Transition years</td>
<td>4</td>
</tr>
<tr>
<td>All secondary</td>
<td>2</td>
</tr>
<tr>
<td>All primary</td>
<td>1</td>
</tr>
<tr>
<td>Pre-primary and primary</td>
<td>3</td>
</tr>
<tr>
<td>All vulnerable learners</td>
<td>2</td>
</tr>
</tbody>
</table>

In countries that mention public health concerns

In countries that mention economic concerns (while still following WHO guidelines)
THERE IS GREAT VALUE IN MAPPING & SHARING COUNTRY EXPERIENCES

EXAMPLES, NOT EXHAUSTIVE

STAFF & SPACE AVAILABILITY

Early graduation of teacher trainees and other critical professions (USA) or deputising professionals for other required services (Ireland)

“Growing your own” by recruiting and supporting recent graduates and/or senior students development and training with support and mentorship of fully trained personnel (USA)

Deploying at-risk teachers for distance teaching within comprehensive reopening framework and planning (UNESCO)

Using all available indoor and outdoor spaces to increase school capacity, repurposing community spaces, stadiums, churches, etc (China, Japan, others)

Inclusive task forces (Denmark), and community reopening chaperones, building consensus and having shared plan creation, ownership and accountability

RESILIENCE THROUGH CRISIS

Assume prolonged / repeated closures and permanently strengthen distance learning & teaching in parallel to preparing reopening.

Establish new dedicated divisions for distance learning as part of response plans

Consider blended learning and ongoing distance learning policies and infrastructure (Greece, Egypt)

See how others are permanently strengthening distance learning (Croatia) and guides for virtual learner assessment & distance school leadership, and even for hygiene training (South Korea)

Establish new dedicated divisions for distance learning

Apply key lessons from Education in Emergencies in the immediate crisis and for longer term reform:

• Accelerated Education (catch-up learning, Jordan)
• Whole-Child support
• Extra safeguards for most vulnerable (UK, South Africa)

Monitor effect of COVID-19 effect on student well-being (Finland, China)

Prioritise equity-advancing policies first (Greece, France, Sierra Leone)

ALL NATIONS, AND ESPECIALLY LOWER INCOME COUNTRIES, WILL FIND IT DIFFICULT TO MEET SCHOOL REOPENING PRECONDITIONS, THEREBY KEEPING MANY STUDENTS OUT OF SCHOOL FOR AN EXTENDED TIME.

WE CAN FIND STRENGTH IN CRISIS, BY LEARNING AND INNOVATING WITH ONE ANOTHER.
WHAT’S NEXT?

Questions for a next phase include:

• How can country experiences be harnessed to better support those who remain out of school?

• Given that a second (or more) waves are possible, how can systems, teachers and learners be better prepared for future closures?

We’d love to learn what would be helpful. Please contact us below to share your suggestions.

Insights for Education is a recently-established global resource for evidence-informed decision-making and implementation in education. Our vision is a world where decision making in education reflects the best evidence to reach each learner and improve learning outcomes for every child. We aim to do this by synthesising and translating relevant evidence and experience, to help education leaders solve their toughest challenges in strengthening equity and outcomes. To learn more please visit education.org or contact us: info@education.org

THANK YOU
