

HOOKSTICK OPERATED SWITCHES STV AND STU

The STV and STU types of outdoor disconnect are available in voltage ratings from 8.25 to 169 kV and in continuous current ratings from 600 to 4000 ampere. The STV and STU switches are identical in design except that one is arranged for vertical mounting and the other for underhung mounting.

Angular mounted, tandem transfer and regulator bypass switches are also available. Visit www.morpac.com for complete details.

APPLICATION: As a single pole disconnect it can be readily used in substations or on transmission and distribution lines.

	STU/STV
Primary Material	Copper
Current Range	600A – 4000A
Voltage Range (nom)	7.5kV – 161kV

Visit www.morpac.com for Complete Details
