## Working Status of Keypad

Green LED Normal On: Power on  
Blue LED Flashes Once: Arm/Stay Arm or Disarm  
Red LED Flashes Once: Wrong programming  
Red LED Flashes Once Every 3 Seconds: Low battery indication, please replace the batteries.

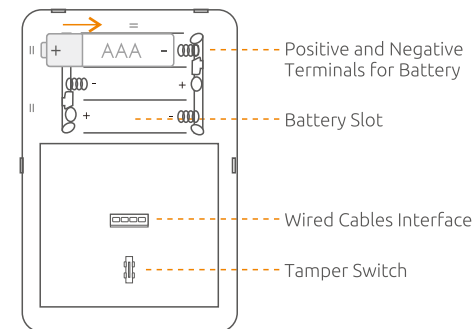

## Installation

## Get to Know Your System

The remote keypad is used to send commands to the system and to display the current system status via the various coloured lights(LED's). Each keypad will be mounted in convenient locations inside the protected premises, near designated points of entry/exits. Once there's an emergency situation, press the **SOS** panic button. Moreover, the keypad can be connected with an electronic door lock to work as an access control system. RFID tags enable user to disarm the system and open the door at the same time, which is very convenient and suitable for home and office.

## Parts List

Tamper Switch: The tamper switch will be activated if case is opened.

## Enroll the keypad to the control panel

Press enroll button of control panel, the enroll LED light up, press **\*** to activate keypad, and then press **SOS**, the connection is successful after 'enroll' LED flashes once and one beep is heard.

Note! System will exit automatically after 20 seconds; User can press the enrolling button to exit.

## Connecting Electronic Door Lock

- Connect PUSH and GND of electronic lock, when system is disarmed, door will be opened at the same time.
- Connect PUSH and GND of Door Release Exit Button; User can press the exit button to open the electronic door lock.
- Connect 12V and GND to offer power supply for wireless keypad.

Add/Delete RFID Tag/Card

RFID Enrollment (Up to 50 pcs can be expanded)

Press“ \* ” to activate keypad, then enter “admin password#8”, green LED light up; Put RFID tag close to the RFID reader, the enrollment is successful after one beep is heard and blue LED flashes once.

Note! If 2 deeps are heard and red LED flashes twice, it indicates that RFID tag has been enrolled before. RFID tags can be continuously enrolled into keypad within 30 seconds.

Clearing a RFID Tag

Press“ \* ” to activate keypad, then enter “admin password#0”, red LED light up; Put RFID tag close to the RFID reader, the RFID tag is deleted after blue LED flashes once and one beepis heard.

Note! RFID tags can be continuously deleted within 30 seconds.
