Specifications

Power Supply: DC 12V

Max Alarm Current: <635mA

Battery Backup: 3.7V/2200mA Lithium battery

Static Current: < 45mA

Receiving Distance: 10m

Max Siren Volume: 115dB

Operating Temperature: -25"C+55° C

Operating Humidity: ≤95%(non-condensing)

Housing Material: ABS

Measurement (L x H x W): 288x250x56.5 mm

The Outdoor Siren With Strobe Light has an output of 115dB that alerts across a large area to make sure that everyone on site knows about an activated system alarm. The Strobes offer visual indication to deter the intruders. The built-in tamper sensors trigger an alarm if there is any attempt to tamper with the siren. It is compatible with any security systems or sensors working on same app.
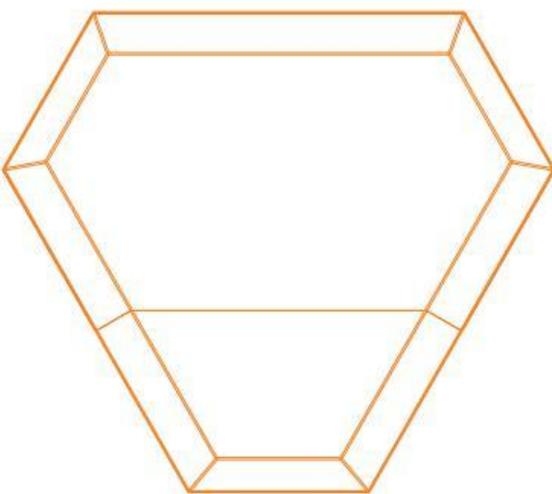

⭐ Features

* Tamper protection
* High powered siren & flashing strobe lens
* Wireless transmission, easy for installation
* Siren volume & alarming time management
* Automatic switch between AC & DC ensures uninterrupted power supply.

User Manual

| No	Name	Function
1	Status LED Indication	Status LED flashes once in 5 seconds： Working normally Status LED lights out: WiFi network lost. Status LED flashes red repadily: Connecting in Smart Inclusion.
2	Alarm LED	Alarm LED flashes: An alarm was activated. Flashing for 60 seconds: A tamper alarm was activated.
3	Buttons Enroll Button	Press enroll button for 5 seconds: Start setup with app Press 5 times: Restore the system to default setting. A long beep will be heard. Tamper Switch: Trigger a tamper alarm

Installation Steps

1. The wall tamper switch must remain closed when the outdoor siren is mounted.
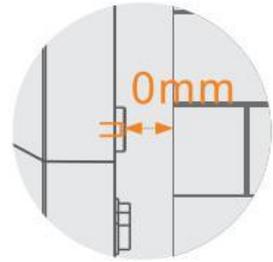

2. To install the self-tapping screws in right place with a piece of paper of screw mounting holes.
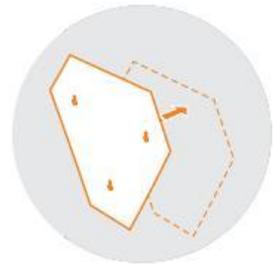

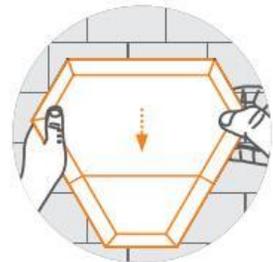

3. To nail the screws in to the wall.
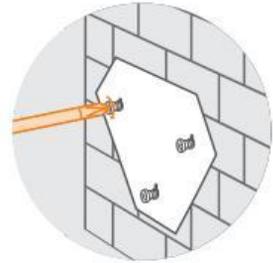

4. Plug the battery cable into the battery connector.

5. Finish the installation and put it in the right place.

Tips:
1. Do not heat or drop the Strobe Siren in case of the damage of the component inside.
2. In case of the unexceptional case, the Strobe Siren should be tested regularly, so that it can be fixed at once.

Installation

Fit the Siren to the outside of the building in a position that is clearly visible and at a height which is relatively inaccessible to an intruder. Mount the siren at a minimum distance of 1 meter away from any external or internal metalwork (drainpipes, gutters,radiators etc.)
Noted: The tamper switch could be triggered during the installation, you are able to disarm it on the mobile app.
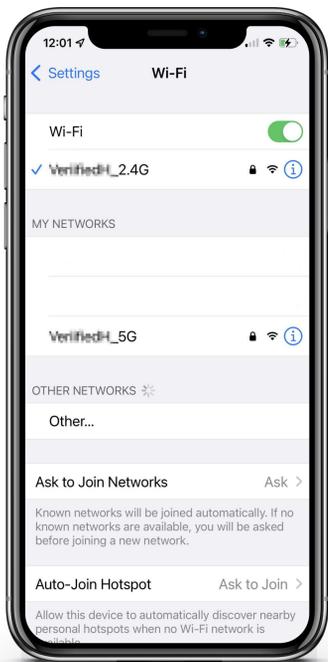

Placement Test

Perform a placement test to ensure there is sufficient signal strength at the desired mounting location for proper communication between the siren and router.

Customer Support

Two pairing modes are provided in the MySmartH app. The Wi-Fi Easy Connect (EZ) mode is the default mode, and the access point (AP) mode is the compatible mode. The user can tap the pairing mode drop-down list in the top-right corner of the page to switch between the pairing modes.

Manually add Wi-Fi devices in EZ mode

1. Open "MySmartH" APP, press the '+' in the upper right comer of the main screen;

2. Choose "Home Safety"、 click "Outdoor Flashing Siren".

Select 2.4 GHz Wi-Fi Network and enter password.

If your Wi-Fi is 5GHz, please set it to be 2.4GHz.
