

## Pet feeder with HD camera Instructions

Precautions

1.Read this instruction manual carefully before operation;

2.Indoor use only.

3. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

4.Children should be supervised to ensure that they do not play with the appliance.

5. The instructions for appliances having a part of class III construction supplied from a detachable power supply unit shall state that the appliance is only to be used with the power supply unit provided with the appliance.

6.DO NOT expose the feeder to sunlight, as the sunlight will affect the built-in infrared sensor to cause feeding result misreading.

7.Do not drop anything other than dry food into the food hopper. Otherwise, there is a risk of dysfunction or mistaken feeding;

8.Place the feeder on the floor. To prevent the feeder from being hit by pets, it is recommended to place the feeder at the corner or against the wall;

9.Please shield or organize the power cord well to prevent the pet from biting the cable and causing dangerous situations such as electric shock; 10.Do not disassemble or modify the device yourself;

11. This product is only suitable for DRY FOOD, and WET FOOD is prohibited;

12. This feeder is suitable for cats or small and medium-size dogs;

13. The pet food's shape and density will cause some deviations from the food hopper's capacity and the feeding unit's quantity;

14.After each fill-up of the hopper, there may be deviation of two portions at the initial feeding time. It is recommended to calibrate manually! (Click the manual feeding button until food is fed!)

15.Some power banks are not compatible with or not suitable for the pet feeder: a, please make sure when the power bank connects to the feeder alone, it can activate automatically; b, connect the feeder to the power adapter first, then connect the power bank. If the feeder does not draw current from the power bank (i.e. power bank does not wake up, stay in sleep mode), it is suitable to use with the pet feeder.

#### Introduction

## Set Up Router

The router supports the 2.4GHz WiFi (doesn't support the 5GHz), and is connected to the WiFi network. Please set the parameters of the router before connecting the WiFi network, and record the SSID and password of your WiFi.

## **Install Free App**

Download APP: scan the QR code below to download and install. Register and login: open the "MySmartH" APP to register and login according to the prompts.

### **Customer Support**

## **Ready to work**

Power on the feeder and wait for the Wi-Fi Indicator start blinking slowly along with a start-up sound. It may take a few minutes. (If not, please long press the Manual Feed Button to reset the device). Two pairing modes are provided in the MySmartH app. The QR Code mode is the default mode, and the access point (AP) mode is the compatible mode. The user can tap the pairing mode drop-down list in the top-right corner of the page to switch between the pairing modes.

# The default mode is QR Code pairing mode
